<i>List of Contributors</i>	ix
<i>Preface</i>	xi
<i>Anselme Payen Award 1977</i>	xiii

PART 1 INTRODUCTION—AWARD ADDRESS

The Versatility of Cellulose <i>Kyle Ward, Jr.</i>	3
Practical Textile Finishes Based on Chemical Modification of the Cotton Fiber <i>J. David Reid and Robert M. Reinhardt</i>	11

PART 2 OVERVIEW OF CELLULOSE SOURCES AND MODIFICATION REACTIONS

Chemical Modification of Cellulose: A Historical Review <i>Donald F. Durso</i>	23
Cotton: A World Cellulose Fiber <i>R. S. Corkern, M. E. Carter, and B. M. Kopacz</i>	39
Outlook for Wood Cellulose <i>Necmi Sanyer</i>	65
Rayon Fibers of Today <i>G. C. Daul and F. P. Barch</i>	81

vi CONTENTS

Modified Cellulosics—An Overview of the Future <i>H. L. Hergert and T. E. Muller</i>	95
---	----

PART 3 CELLULOSE ACCESSIBILITY AND REACTIVITY

Determination of Accessibility and Crystallinity of Cellulose <i>Larry C. Wadsworth and John A. Cuculo</i>	117
---	-----

Hydroxyl Reactivity and Availability in Cellulose <i>Stanley P. Rowland</i>	147
--	-----

PART 4 CELLULOSE MODIFICATION BY GRAFTING TECHNIQUES

New Methods for Graft Copolymerization onto Cellulose and Starch <i>Bengt Rånby</i>	171
---	-----

Modifications to Cellulose Using UV Grafting Procedures <i>Neil P. Davis and John L. Garnett</i>	197
--	-----

Wood Pulp Grafting with Different Monomers by the Xanthate Method <i>V. Hornof, C. Daneault, B. V. Kokta, and J. L. Valade</i>	227
--	-----

A Novel Process for the Treatment of Pulp Mill Effluents Using the Grafted Pulp Fibers <i>P. Lepoutre, S. H. Hui, and A. A. Robertson</i>	241
---	-----

PART 5 GENERAL CELLULOSE MODIFICATION REACTIONS

Antibacterial Fibers <i>Tyrone L. Vigo</i>	259
---	-----

Preparation, Structure, and Properties of some Derivatives of Cellulose and of Thermomechanical Pulp <i>Shyam S. Bhattacharjee and Arthur S. Perlin</i>	285
---	-----

The Effect of Liquid Anhydrous Ammonia on Cellulose II <i>Luis G. Roldan</i>	303
Effect of Changes in Supramolecular Structure on the Thermal Properties and Pyrolysis of Cellulose <i>K. E. Cabradilla and S. H. Zeronian</i>	321
Recent Developments in the Industrial Use of Hemicelluloses <i>Roy L. Whistler and R. N. Shah</i>	341
<i>Index</i>	357
