

CONTENTS

1. Introduction to Plant Biotechnology	Mavituna, F	1
2. The Contributions and Prospects of Plant Biotechnology - an Assesment	Vasil, I. K	15
3. Somatic Hybridization of Plants and its Use in Agri- culture	Hamill, J. D. , Cocking, E. C.	21
4. Biotechnology for the Improvement of Cereal and other Grass Crops	Vasil, I. K	43
5. Cell Culture of the Poaceae (Gramineae)	Conger, B. V., Trigiano, R.N., Gray, D. J.	49
6. Callus Induction in Endosperms from Maize Mutants with Different IAA Content	Castelli, S., Manzocchi, L. A., Torti, G.	63
7. Somatic Embryogenesis in <u>Hordeum vulgare</u> and <u>Secale vavilovii</u>	Vázquez, A. M., Candela, M., Espino, J., Rueda J., Ruíz, M. L., Peláez, M. I.	69
8. Somatic Embryogenesis in Conifers	Fowke, L., Hakman, I.	75
9. Regeneration of thalliclones (*) from <u>Laurencia</u>	Garcia-Reina, G., Romero, R. R., Luque, A.	81
10. Genetic Instability in Plant Cell Cultures: Utiliza- tion in Plant Breeding and Genetic Studies	Reisch, B. I.	87
11. Gene characterization in Higher Plants	Weil, J. H.	97
12. Regulation of Genes Involved in T-DNA Processing : An Initial Step in the Genetic Modification of Plant Cells	Kado, C. I., Rogowsky, P., Close, T. J., Quayle, T. J.A.	115
13. Effect of N ⁶ - Benzyl Aminopurine on the Transla- tion and Transcription Activity from Apple Cells	Ordás, R. J., Rodriguez, R., Fernández, B., Sanchez, R.	135

14. Characteristics of NaCl-Tolerant Calli and Somatoclasts of Tomato Luque, A., Robaina, R., Garcia-Reina, G.	143
15. Investigations on the Molecular Mechanism of Resistance to Fungi in Barley (<i>Hordeum vulgare</i> L.) Andersen, J. B., Smedegaard-Peterson, V.	149
16. The Structure and Function of Plant Coated Vesicles Fowke, L. C., Tanchak, M. A.	153
17. Natural Products from Higher Plants and Plant Cell Culture Fowler, M. W., Scragg, A. H.	165
18. Physiological and Biochemical Characteristics of Photoautotrophic Plant Cell Cultures Hüsemann, W.	179
19. Stress Induced Secondary Metabolism in Plant Cell Cultures Brodelius, P.	195
20. Elicitation and Metabolism of Phytoalexins in Plant Cell Cultures Barz, W., Daniel, S., Hinderer, W., Jaques, U., Kessmann, H., Köster, J., Tiemann, K.	211
21. In Vivo Characterization of NADPH : 2'-Hydroxyisoflavone Oxidoreductase in Elicitor Treated Chickpea Cell Cultures and Stereochemical Aspects of Phytoalexins Medicarpin and Maackiain Kessmann, H., Tiemann, K., Jansen, J. R., Reuscher, H., Bringmann, G., Barz, W.	231
22. Nicotinate Conjugate Metabolism in Plant Cell Cultures Upmeyer, B., Köster, S., Otto, C., Barz, W.	239
23. Alkaloids from Organized <i>Atropa belladonna</i> Cultures Lang, J., Hamilton, R., Pedersen, H.	245
24. Cultivated Plant Cells: An Enzyme Source for Alkaloid Formation Stockigt, J., Schubel, H.	251
25. Glucose Repression and cAMP Effect on Enzyme Activities in Callus Tissues of <i>Nicotiana tabacum</i> Bottacin, A., Cacco, G.	265
26. Long Term Storage of <i>Vinca minor</i> Cell Cultures Caruso, M., Crespi-Perellino, L., Garofano, L., Guicciardi, A.	271
27. Biotransformation of Synthetic and Natural Compounds by Plant Cell Cultures Alfermann, A. W., Reinhard, E.	275

28. Growth and Substrate Utilization of Cell Suspension Cultures of <u>Cucumis sativus</u> on Milk Whey Based Media Callebaut, A., Motte, J-C, Hoenig, M., De Cat, W., Baeten, H.	285
29. Changes in Anion and Sugar Content in Liquid Media During In Vitro Culture of Cells from Cereals, Sugarcane and Tobacco Schmitz, U., Lorz, H.	291
30. Conditioning of Media; An Elaborate Method of Optimizing Initial Growth Hormone Concentrations ? Wijnsma, R., Verpoorte, R., Harkes, P. A. A., van Iren, F., ten Hoopen, H. J. G.	297
31. Papain Inhibition by New α -Methylene- γ - Lactone Carbohydrate Derivatives Rauter, A.P., Pais, M.S., Duarte, C., Eusébio, A., Pinto, L., Simões, C., Cabral, J. S.	305
32. The Large-Scale Cultivation of Plant Cells Pareilleux, A.	313
33. Bioreactors for Plant Cell Culture Shuler, M. L.	329
34. Effect of Aeration on <u>Cynara cardunculus</u> Plant Cell Cultures Lima-Costa, E., Novais, J. M., Pais, M. S., Cabral, J. M. S.	343
35. Methods of Immobilization of Plant Cells Novais, J. M.	353
36. Characterization and Immobilization of Digitoxin 12 - Hydroxylase from Cell Cultures of <u>Digitalis lanata</u> Ehrh Petersen, M., Alfermann, A. W., Seitz, H. U.	365
37. The Effect of Oxygen Stress on Secondary Metabolite Production by Immobilised Plant Cells in Bioreactors Wilkinson, A. K., Williams, P. D., Mavituna, F.	373
38. Continuous Coagulation of Milk using Immobilized Cells of <u>Cynara cardunculus</u> Esquivel, M. G., Fonseca, M. M. R., Novais, J. M., Cabral, J. M. S., Pais, M. S.	379
39. Engineering Aspects of Plant Cell Culture Fonseca, M. M. R., Mavituna, F., Brodelius, P.	389
40. Cloning and Cell Sorter Bariand-Fontanel, A., Jullien, M., Coutos-Thevenot, P., Brown, S., Courtois, D., Petiard, V.	403

41. Secretion of Thiophenes by Differentiated Cell Cultures of <u>Tagetes</u> Species Helsper, J. P. F. G., Ketel, D. H., Hulst, A. C., Breteler, H.	421
42. The Use of Hairy Root Cultures, Transformed by <u>Agrobacterium rhizogenes</u> for the Production of Plant Secondary Products In Vitro Hamill, J. D., Parr, A. J., Martin, C., Walton, N. J., Robins, R., Rhodes, M. J. C.	425
43. The application of Germplasm Storage in Biotechnology Benson, E. E., Withers, L. A.	431
44. Future Trends in Plant Cell Biotechnology Staba, E. J.	445
45. Aspects of Screening Plant Cell Cultures for New Pharmacologically Active Compounds Ulbrich, B., Osthoff, H., Wiesner, W.	461
46. Economic Aspects of Plant Cell Biotechnology Yoshioka, T., Fujita, Y.	475
47. Plant Biotechnology and Community Development Magnien, E.	483
48. The IPGBR In Vitro Conservation Databases Wheelans, S. K., Withers, L. A.	497
49. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
50. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
51. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
52. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
53. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
54. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
55. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
56. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
57. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
58. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
59. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
60. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
61. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
62. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
63. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
64. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
65. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
66. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
67. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
68. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
69. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
70. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
71. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
72. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
73. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
74. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
75. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
76. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
77. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
78. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
79. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
80. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
81. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
82. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
83. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
84. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
85. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
86. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
87. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
88. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
89. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
90. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
91. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
92. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
93. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
94. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
95. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
96. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
97. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
98. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
99. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
100. The Use of Plant Cell Cultures for the Production of Secondary Metabolites Kessman, H.	501
