|                                                                         |     |
|-------------------------------------------------------------------------|-----|
| Contributors .....                                                      | vii |
| Preface .....                                                           | ix  |
| Abbreviations .....                                                     | xi  |
| 1 Energy Production in Plant Cells .....                                | 1   |
| <i>J.H. Bryce and S.A. Hill</i>                                         |     |
| 2 The Calvin Cycle and Photorespiration .....                           | 27  |
| <i>R.C. Leegood</i>                                                     |     |
| 3 Carbon Dioxide-Concentrating Mechanisms .....                         | 47  |
| <i>R.C. Leegood</i>                                                     |     |
| 4 Carbohydrate Chemistry .....                                          | 73  |
| <i>C.J. Smith</i>                                                       |     |
| 5 Plant Lipids: Their Metabolism, Function and Utilization .....        | 113 |
| <i>D.J. Murphy</i>                                                      |     |
| 6 Nitrogen Fixation .....                                               | 129 |
| <i>R.J. Smith and J.R. Gallon</i>                                       |     |
| 7 Nitrogen Metabolism .....                                             | 155 |
| <i>P.J. Lea</i>                                                         |     |
| 8 Plant Pigments .....                                                  | 181 |
| <i>G. Hendry</i>                                                        |     |
| 9 Genome Organization, Protein Synthesis and Processing in Plants ..... | 197 |
| <i>M.D. Watson and D.J. Murphy</i>                                      |     |

|    |                                                               |     |
|----|---------------------------------------------------------------|-----|
| 10 | <b>Regulation of Gene Expression</b> .....                    | 221 |
|    | <i>N.J. Robinson, A.H. Shirsat and J.A. Gatehouse</i>         |     |
| 11 | <b>Molecular Control of Development</b> .....                 | 241 |
|    | <i>J.A. Bryant and A.C. Cuming</i>                            |     |
| 12 | <b>Cell Culture, Transformation and Gene Technology</b> ..... | 275 |
|    | <i>R. Walden</i>                                              |     |
|    | <b>Index</b> .....                                            | 297 |
