Preface	xi
1 The Plant, the Cell and its Molecular Components <i>P.M. Dey, M.D. Brownleader and J.B. Harborne</i>	
1.1 Introduction	1
1.2 Comparative biochemistry	3
1.3 The eukaryotic plant cell	5
1.4 Techniques of cell fractionation	24
1.5 Molecular aspects	31
References	47
Further reading	47
2 Photosynthesis <i>J.R. Bowyer and R.C. Leegood</i>	
2.1 Introduction	49
2.2 Light energy utilization to produce ATP and NADPH	49
2.3 The Benson-Calvin cycle	84
2.4 Photorespiration	90
2.5 C ₄ photosynthesis	93
2.6 Crassulacean acid metabolism	100
Acknowledgements	102
Background reading	102
Further reading	102
Other reference	104
3 Carbohydrate Metabolism: Primary Metabolism of Monosaccharides <i>M.D. Brownleader, J.B. Harborne and P.M. Dey</i>	
3.1 Introduction	111
3.2 Glycolysis	111
3.3 Pentose phosphate pathway	116
3.4 The citric acid cycle	121
3.5 Electron transport and oxidative phosphorylation	126
References and further reading	140
4 Carbohydrate Metabolism: Storage Carbohydrates <i>G. Avigad and P.M. Dey</i>	
4.1 Introduction	143
4.2 Sucrose	143
4.3 α,α -Trehalose	158
4.4 Other oligosaccharides	161
4.5 Fructans	169
4.6 Starch	177
4.7 Other reserve polysaccharides	191
References	195
Further reading	203
5 Carbohydrate Metabolism: Structural Carbohydrates <i>J.S. Grant Reid</i>	
5.1 Introduction	205
5.2 The plant cell wall or extracellular matrix	205
5.3 Structures and interactions of plant cell wall polysaccharides	209
5.4 Supramolecular interactions of structural polysaccharides in cell walls	218

5.5	Biosynthesis of structural polysaccharides	223
5.6	Metabolic turnover of structural components	231
5.7	Conclusions	235
	References	235
6	Plant Lipid Metabolism	
	<i>John L. Harwood</i>	
6.1	The chemistry of plant lipids	237
6.2	Fatty acid biosynthesis	244
6.3	Triacylglycerol synthesis	248
6.4	Membrane lipid biogenesis	250
6.5	Lipid catabolism and turnover	254
6.6	Cutins, suberins and waxes	260
6.7	Plant membranes	263
	Further reading	271
7	Primary Nitrogen Metabolism	
	<i>Peter J. Lea</i>	
7.1	Introduction	273
7.2	Nitrogen fixation	273
7.3	Nitrate uptake and reduction	281
7.4	Ammonia assimilation	285
7.5	Asparagine metabolism	290
7.6	Aminotransferases	292
7.7	The aspartate family	293
7.8	The branched chain amino acids	300
7.9	The biosynthesis of proline and arginine	302
7.10	Sulfur amino acids	305
7.11	Histidine	306
	Acknowledgements	306
	References	306
8	Nucleic Acids and Proteins	
	<i>Eric Lam</i>	
8.1	Introduction	315
8.2	DNA	318
8.3	RNA	324
8.4	Proteins	338
8.5	Summary	349
	References	350
9	Regulation of Gene Expression in Plants	
	<i>J.A. Gatehouse</i>	
9.1	Introduction	353
9.2	Nuclear genes	353
9.3	Organellar genes	367
9.4	Signaling mechanisms in gene regulation	370
9.5	Gene regulation in plant development	372
9.6	Transgenic plants	376
9.7	Conclusion	381
	Further reading	381
10	Phenolic Metabolism	
	<i>D. Strack</i>	
10.1	Introduction	387
10.2	Shikimate/arogenate pathway	390

10.3	Phenylalanine/hydroxycinnamate pathway	393
10.4	Phenylpropanoid pathways	395
10.5	Hydroxycinnamate conjugates	397
10.6	Hydroxycoumarins	398
10.7	Hydroxybenzoates	399
10.8	Flavonoids	400
10.9	Lignins	408
10.10	Lignans and Neolignans	409
10.11	Tannins	410
10.12	Quinones	413
	References	416
11	Isoprenoid Metabolism	
	<i>Peter M. Bramley</i>	
11.1	Introduction	417
11.2	Nomenclature, classification and occurrence	417
11.3	General pathway of terpenoid biosynthesis	418
11.4	Monoterpenoids	419
11.5	Sesquiterpenoids	421
11.6	Diterpenoids	423
11.7	Triterpenoids	425
11.8	Carotenoids	427
11.9	Polyterpenoids	432
11.10	Minor classes of terpenoids	432
11.11	Control and compartmentation of isoprenoid biosynthesis	433
	References	434
12	Special Nitrogen Metabolism	
	<i>Michael Wink</i>	
12.1	Introduction	439
12.2	Non-protein amino acids	440
12.3	Amines	443
12.4	Cyanogenic glycosides and glucosinolates	453
12.5	Alkaloids	458
12.6	Auxins, cytokinins and ethylene	471
12.7	Nitrogen bases and cofactors	474
	References	485
13	Biochemical Plant Pathology	
	<i>Jonathan D. Walton</i>	
13.1	Introduction	487
13.2	Genetics of host/pathogen interactions	489
13.3	Mechanisms of pathogenicity: penetration and spread	491
13.4	Mechanisms of plant resistance	495
	References	502
	Further reading	502
14	Biochemical Plant Ecology	
	<i>Jeffrey B. Harborne</i>	
14.1	Introduction	503
14.2	Plant responses to the environment	503
14.3	Plant response to herbivory: toxin production	506
14.4	Constitutive defense mechanisms	508
14.5	Induced phytochemical response to herbivory	512
14.6	Conclusion	515
	References	515

15 Plant Cell Biotechnology

M.D. Brownleader and P.M. Dey

15.1 Introduction

15.2 Plant cell culture

15.3 Micropropagation

15.4 Commercial exploitation of plant biotechnology

15.5 Definitions

Further reading
