

CONTENTS

1. BORON	1
D. F. Boltz and H. K. L. Gupta	
I. Separations	2
A. <i>Precipitation Method</i>	2
B. <i>Distillation Method</i>	3
C. <i>Extraction Method</i>	5
D. <i>Ion Exchange Method</i>	6
E. <i>Electrodeposition Method</i>	8
II. Methods of Determination	8
A. <i>Curcumin Method</i>	8
B. <i>Carminic Acid Method</i>	14
C. <i>Quinalizarin Method</i>	17
D. <i>1,1'-Dianthrimide Method</i>	19
E. <i>Methylene Blue-Tetrafluoroborate Method</i>	21
F. <i>Other Reagents</i>	22
III. Applications	24
A. <i>Boron in Water</i>	24
B. <i>Boron in Carbon Steels</i>	26
C. <i>Boron in Alloy Steels</i>	28
D. <i>Boron in Aluminum Alloys</i>	31
E. <i>Boron in Soils and Plants</i>	32
2. BROMINE	39
E. R. Wright, R. A. Smith, and B. G. Messick	
I. Separations	40
A. <i>Volatilization as Free Bromine</i>	40
B. <i>Volatilization as Cyanogen Bromide</i>	41
C. <i>Oxidation to Bromate</i>	42
II. Methods of Determination	44
Direct Colorimetric Methods	44
A. <i>Phenol Red Method</i>	44
B. <i>Methyl Orange Method</i>	46
C. <i>König Reaction Method</i>	47
D. <i>Rosaniline Method</i>	47

E. <i>Fluorescein Method</i>	48
F. <i>Gold Chloride Method</i>	48
G. <i>Cresol Red Method</i>	48
Indirect Colorimetric Methods	48
H. <i>Oxidation of Iodine Catalyzed by Bromide Method</i>	48
I. <i>Chlorination of Ammonia Inhibited by Bromide Method</i>	49
III. Applications	49
A. <i>Bromine in Seawater or Brackish Water</i>	49
B. <i>Total Bromine in Blood</i>	50
C. <i>Total Bromine in Flour</i>	52
D. <i>Bromine in Brine</i>	53
3. CARBON	57
Larry G. Hargis	
Carbon Dioxide	58
I. <i>Methods of Determination</i>	58
A. <i>Phenolphthalein Method</i>	58
B. <i>Other Methods</i>	60
II. <i>Applications</i>	60
A. <i>Continuous Determination of Carbon Dioxide in Gas Stream</i>	60
Carbon Monoxide	63
I. <i>Methods of Determination</i>	63
A. <i>Silver p-Sulfaminobenzoate Method</i>	63
B. <i>Palladium Chloride-Molybdophosphoric Acid Method</i>	64
C. <i>Palladium Chloride-Palladium Iodide Method</i>	65
Cyanide	68
I. <i>Separations</i>	68
A. <i>Distillation Method</i>	69
B. <i>Extraction Method</i>	69
C. <i>Precipitation Method</i>	69
D. <i>Diffusion Method</i>	70
II. <i>Methods of Determination</i>	70
A. <i>Pyridine-Pyrazolone Method</i>	70
B1. <i>Pyridine-Benzidine Method</i>	72
B2. <i>Pyridine-Phenylenediamine Method</i>	72
C. <i>Picric Acid Method</i>	73
D. <i>Phenolphthalein Method</i>	74
E. <i>Other Methods</i>	74

III. Applications	75
A. <i>Total Cyanide in Sewage</i>	75
B. <i>Cyanide in Refinery Gases and Separator Water Containing Sulfide</i>	76
Thiocyanate	78
I. <i>Separations</i>	78
II. <i>Methods of Determination</i>	78
A. <i>Copper-Pyridine Method</i>	78
B. <i>Pyridine-Pyrazolone Method</i>	79
C. <i>Pyridine-Benzidine Method</i>	79
D. <i>Iron(III) Thiocyanate Method</i>	79
E. <i>Other Methods</i>	80
4. CHLORINE	83
D. F. Boltz, W. J. Holland, and J. A. Howell	
I. <i>Separations</i>	85
A. <i>Precipitation Method</i>	85
B. <i>Distillation Method</i>	86
C. <i>Extraction Method</i>	86
D. <i>Ion Exchange Method</i>	87
E. <i>Electrodeposition Method</i>	87
II. <i>Methods of Determination</i>	88
A. <i>Orthotolidine Method for Chlorine</i>	88
B. <i>Methyl Orange Method for Chlorine</i>	89
C. <i>König Reaction Method for Chlorine</i>	90
D. <i>Other Methods for Chlorine</i>	92
E. <i>Nephelometric Method for Chloride</i>	93
F. <i>Indirect Ultraviolet Spectrophotometric Determination of Chloride: Mercury(II) Chloranilate Method</i>	94
G. <i>Other Methods for Chloride</i>	96
H. <i>Benzidine Method for Chlorate</i>	97
I. <i>Nephelometric Method for Chlorate</i>	98
J. <i>Indirect Spectrophotometric Method for Perchlorate</i>	99
K. <i>Other Methods for Perchlorate</i>	100
L. <i>Acid Chrome Violet Method for Chlorine Dioxide</i>	101
M. <i>Indirect Spectrophotometric Method for Chlorine Dioxide</i>	102
III. Applications	103
A. <i>Chlorine in Water</i>	103
B. <i>Chloride in Water</i>	104

5. FLUORINE	109
Stephen Megregian	
I. Separations	110
A. Preliminary Treatment of Sample	110
B. Distillation Method	111
C. Other Methods of Separation	117
II. Methods of Determination	118
A. Zirconium—Erichrome Cyanine R Method	119
B. Zirconium—SPADNS Method	128
C. Alizarin Fluorine Blue Method	129
D. Other Methods	131
III. Applications	132
A. Biologic Samples	132
1. Urine	132
2. Teeth and Bones	132
3. Blood and Soft Tissues	133
B. Agricultural Samples	133
C. Water Samples	134
6. IODINE	139
Bennie Zak	
I. Separations	140
A. Distillation Method	141
B. Microdiffusion Method	141
C. Extraction Method	142
D. Destruction of Iodine-Containing Medium Method	144
E. Chromatographic Method	145
II. Methods of Determination	146
A. Iodide as a Catalyst Method	146
1. Catalytic Calibration Technique	155
2. Catalytic Computation Technique	156
3. Kinetic Curve Calculation Technique	157
4. Arrested Catalytic Technique	158
5. Miscellaneous Catalytic Techniques	159
B. Starch—Iodine Methods	162
1. Method of Gross et al.	163
2. Method of Houston	164
3. Cadmium Iodide—Linear Starch Method	165
C. Triiodide Methods	165
1. Method of Custer and Natelson	167
2. Method of Shahrokh and Chesbro	168

3. Chloric Acid Method	168
D. Other Methods	169
III. Applications	169
A. Iodine in Physiologic Media (Serum)	169
1. Wet Ash (Manual) Method	169
2. Wet Ash (Semiautomatic) Method	171
3. Wet Ash (Automatic) Method	173
4. Method of Bromine Oxidation After Chromatographic Separation	176
5. Microdiffusion Method	177
6. Manual Analysis by Alkaline Fusion Method	179
7. Distillation Method	182
B. Iodine in Rocks, Soil, Plants, and Animal Tissue	183
1. Rock Samples, Alkaline Fusion Method	183
2. Plant Material, Wet Ash Method	184
3. Distillation Method	185
C. Iodine in Water	185
1. Alkaline Ash Method	185
2. Direct Determination Method	186
3. Method for Seawater	187
7. NITROGEN	197
D. F. Boltz and Michael J. Taras	
I. Separations	201
A. Distillation Method	201
B. Aeration Method	202
C. Microdiffusion Method	203
D. Ion Exchange Method	204
II. Methods of Determination	204
A. Ammonia by Nessler Method	205
B. Ammonia by Indophenol Method	210
C. Ammonia by Bispyrazolone Method	213
D. Ammonia by Indirect Ultraviolet Spectrophotometric Method	215
E. Nitrite by Modified Griess Method	216
F. Nitrite by Diazotized 4-Aminobenzenesulfonic Acid Method	221
G. Nitrite by Antipyrine Method	222
H. Nitrate by Phenoldisulfonic Acid Method	222
I. Nitrate by Brucine Method	227
J. Nitrate by Chromotropic Acid Method	229
K. Nitrate by Reduction—Diazotization Method	230
L. Miscellaneous Methods	232

III. Applications	233
A. <i>Ammonia Nitrogen in Water by Nessler Method</i>	233
B. <i>Albuminoid Nitrogen in Water by Nessler Method</i>	235
C. <i>Ammonia Nitrogen in Water by Indophenol Method</i>	236
D. <i>Nitrite in Water by Modified Griess Method</i>	237
E. <i>Nitrite in Cured Meats</i>	238
F. <i>Nitrate in Plant Materials</i>	240
G. <i>Nitrogen Dioxide in Air</i>	241
H. <i>Miscellaneous Applications</i>	242
8. OXYGEN	253
Gordon A. Parker	
Oxygen	255
I. Methods of Determination	255
A. <i>Winkler Method</i>	255
B. <i>Indigo Carmine Method</i>	264
C. <i>Copper-Ammine Method</i>	264
D. <i>Iron-Thiocyanate Method</i>	266
E. <i>Pyrogallol Method</i>	269
F. <i>Methyl Viologen Method</i>	270
G. <i>Miscellaneous Methods</i>	273
II. Applications	275
A. <i>Oxygen in Certain Gases</i>	276
B. <i>Dissolved Oxygen in Water</i>	279
Ozone	282
I. Methods of Determination	282
A. <i>Iodine Method</i>	282
B. <i>Iron-Thiocyanate Method</i>	286
C. <i>Diphenylaminesulfonate Method</i>	287
D. <i>4,4'-Dimethoxystilbene Method</i>	288
E. <i>1,2-Di(4-pyridyl)ethylene Method</i>	290
F. <i>Diacetyldihydrolutidine Method</i>	292
G. <i>Manganese-Tolidine Method</i>	293
H. <i>Miscellaneous Methods</i>	295
II. Applications	296
A. <i>Atmospheric Ozone</i>	296
B. <i>Ozone in Water</i>	299
Hydrogen Peroxide	301
I. Methods of Determination	301
A. <i>Titanium Method</i>	301
B. <i>Iodine Method</i>	303

C. <i>Iron-Thiocyanate Method</i>	304
D. <i>Benzohydroxamic Acid Method</i>	305
E. <i>1,2-Di(4-pyridyl)ethylene Method</i>	306
F. <i>p-Dimethylaminobenzaldehyde Method</i>	307
G. <i>Oxidase Method</i>	308
H. <i>Miscellaneous Methods</i>	310
II. Applications	311
A. <i>Atmospheric Hydrogen Peroxide</i>	311
B. <i>Hydrogen Peroxide in Aqueous Solution</i>	312
C. <i>Hydrogen Peroxide in Organic Solvents</i>	314
Water	316
I. Methods of Determination	316
A. <i>Cobalt Chloride Method</i>	316
B. <i>Lithium Copper Chloride Method</i>	317
C. <i>Diethylaluminum Hydride-2-Isoquinoline Method</i>	318
D. <i>Chloranilic Acid Method</i>	320
E. <i>Miscellaneous Methods</i>	320
II. Applications	322
A. <i>Water in Gases</i>	322
B. <i>Water in Organic Solvents</i>	323
9. PHOSPHORUS	337
D. F. Boltz, Charles H. Lueck, and Robert J. Jakubiec	
I. Separations	340
A. <i>Precipitation Method</i>	340
B. <i>Distillation Method</i>	341
C. <i>Extraction Method</i>	341
D. <i>Ion Exchange Method</i>	342
E. <i>Electrodeposition Method</i>	342
II. Methods of Determination	342
A. <i>Molybdophosphoric Acid Method</i>	343
B. <i>Extraction Molybdophosphoric Acid Method</i>	343
C. <i>Indirect Molybdophosphoric Acid Method</i>	345
D. <i>Heteropoly Blue Method</i>	346
E. <i>Extraction Heteropoly Blue Method</i>	348
F. <i>Molybdovanadophosphoric Acid Method</i>	350
G. <i>Extraction Molybdovanadophosphoric Acid Method</i>	351
H. <i>Indirect 2-Amino-4-chlorobenzenethiol Method</i>	353
I. <i>Indirect Chloranilate Method</i>	354
J. <i>Indirect Carminic Acid Method</i>	356

III. Applications	357
A. Total Phosphate in Water	357
B. Orthophosphate in Water	358
C. Phosphorus in Plain Carbon Steels and Cast Iron	359
D. Phosphorus in Alloy Steels	361
E. Phosphorus in Copper-Base Alloys	362
F. Inorganic Phosphorus in Serum	364
G. Total Phosphorus in Biological Materials	365
H. Phosphorus in Organic Compounds	365
I. Total Phosphorus (P_2O_5) in Fertilizers	366
10. SELENIUM AND TELLURIUM	371
K. L. Cheng and Ralph A. Johnson	
Physical and Chemical Properties of Selenium and Tellurium	373
I. Separations	375
A. Precipitation Method	375
B. Volatilization Method	377
C. Ion Exchange Method	377
D. Extraction Method	377
II. Methods of Determination	380
A. Determination of Tellurium and Selenium by Sol Methods	381
1. Stannous Chloride Method for Tellurium and/or Selenium	382
2. Hypophosphorus Acid Method for Tellurium	384
3. Hydrazine Method for Selenium	386
B. Iodine Methods for Tellurium and Selenium	388
1. Iodotellurite Method	388
2. Iodine Method for Selenium	389
C. 3,3'-Diaminobenzidine Method for Selenium	391
D. 1-Pyrrolidine carbodithiolate Method for Selenium	393
E. Dianthrimide Method for Selenium	394
F. Diphenylthiosemicarbazide Method for Selenium	394
G. Method for Selenium Based on Nitrite Reaction	395
H. $M \cdot SO_3$ Addition Compound Methods	397
I. Thiourea Method for Tellurium	397
J. Thiourea Method for Tellurium by Extraction with Tributylphosphate	399
K. Hypophosphorus Acid Method for Tellurium by Induced Precipitation of Gold	400
L. Bismuthiol II Method for Tellurium	401
M. Dithiocarbamate Method for Tellurium	402

N. Tungsten Blue Method for Tellurium	405
O. Other Reagents for Selenium and Tellurium	406
III. Applications	406
A. Selenium in Natural Waters—Iodine Method	406
B. Selenium in Copper, Stainless Steel, and Arsenic Piazselenol Method	408
C. Tellurium in Lead	409
D. Tellurium in Copper – Stannous Chloride Method	409
E. Selenium in Pharmaceuticals	410
F. Selenium in Steroids	410
G. Selenium in Seawater Silicates and Biomaterials – DAB Method	411
H. Selenium in Iron and Steel – 4-Methyl-o-phenylene-diamine Method	414
I. Selenium in Lead	415
J. Selenium in Copper	416
K. Tellurium in Lead	416
L. Tellurium in Copper	416
11. SILICON	421
D. F. Boltz, Louis A. Trudell, and G. Victor Potter	
I. Separations	423
A. Precipitation Following Dehydration Method	423
B. Distillation or Volatilization Method	424
C. Extraction Method	425
D. Ion Exchange Method	426
E. Electrodeposition Method	427
II. Methods of Determination	428
A. Molybdosilicic Acid Method	428
B. Extraction–Molybdosilicic Acid Method	430
C. Heteropoly Blue Method	430
D. Extraction–Heteropoly Blue Method	433
E. Indirect Ultraviolet Spectrophotometric Method	434
F. Indirect 2-Amino-4-chlorobenzenethiol Method	436
G. Indirect Peroxymolybdic Acid Method	438
III. Applications	440
A. Silica in Water	440
B. Silicon in Ferrous Materials	442
C. Silicon in Steel	448
D. Silicon in Copper and Copper Alloys	449
E. Silicon in Aluminum Alloys	451

F.	<i>Silicon in Nickel</i>	453
G.	<i>Silicon in Beryllium, Zirconium, and Titanium Alloys</i>	454
