Foreword by Michael J. Donoghue xi
Preface xiii

1

The Science of Plant Systematics 1

What Do We Mean by Plant? 1

What Do We Mean by Systematics? 2

A Phylogenetic Approach 3

The Practice of Plant Systematics 4

Why Is Systematics Important? 5

Aims and Organization of This Book 6

Literature Cited and Suggested Readings 7

2

Methods and Principles of Biological Systematics 9

What Is a Phylogeny? 9

Determining Evolutionary History 11

Characters, Character States, and Networks 11

Evolutionary Trees and Rooting 13

Choosing Trees 16

Summarizing Evolutionary Trees 18

The Probability of Evolutionary Change in Characters 19

Do We Believe the Evolutionary Tree? 21

Describing Evolution: Mapping Characters on Trees 25

Constructing a Classification 27

Grouping: Named Groups Are Monophyletic 28

Naming: Not All Groups Are Named 28

Ranking: Ranks Are Arbitrary 29

Comparing Phylogenetic Classifications with Those Derived Using Other Taxonomic Methods 30

Literature Cited and Suggested Readings 32

3

Classification and System in Flowering Plants: The Historical Background 35

Classification, Nature, and Stability 35

Understanding Relationships 37

Classifications and Memory 38

Higher Taxa and Their Formation 39

Plant Groupings 42

Literature Cited and Suggested Readings 44

4

Taxonomic Evidence: Structural and Biochemical Characters 45**Morphology 45**

- Duration and Habit 46
- Roots 46
- Stems 47
- Buds 47
- Leaves 48
- Floral Morphology 53
- Floral Formulas and Diagrams 57

Pollination Biology 58

- Pollination Syndromes 58
- Coevolution Between Plant and Pollinator 59
- Deception in Orchid Pollination 60
- Self-Incompatibility 61

Inflorescences, Fruits, and Seeds 63

- Fruit Types 66
- Seeds 68
- Fruit and Seed Dispersal 69

Anatomy 70

- Secondary Xylem and Phloem 70
- Nodal Anatomy 72
- Leaf Anatomy 72
- Secretory Structures 73
- Crystals 74
- Arrangement of Xylem and Phloem in the Stem 75
- Floral Anatomy and Development 76

Embryology 76

- Ovules and Megagametophytes 77
- Embryo and Endosperm 77
- Agamospermy 78

Chromosomes 78

- Chromosome Number 78
- Chromosome Structure 80
- Methods of Chromosome Study 81

Palynology 82

- Development of the Anther 82
- Pollen Structure, Viability, and Methods of Study 82

Secondary Plant Compounds 84

- Alkaloids 84
- Betalains and Anthocyanins 85
- Glucosinolates 85
- Cyanogenic Glycosides 85
- Polyacetylenes 86
- Terpenoids 86
- Flavonoids 87

Proteins 87

- Amino Acid Sequencing 87
- Systematic Serology 88

Electrophoresis 88

Literature Cited and Suggested Readings 88

5

Molecular Systematics 93**Plant Genomes 94****Generating Molecular Data 95**

- Gene Mapping 95
- Gene Sequencing 95

Types of Molecular Data 96

- Genome Rearrangements 97
- Sequence Data 97

Analysis of Molecular Data 98

- Alignment of Sequences 98
- Homoplasy and Long Branches 98
- Methods of Phylogeny Reconstruction 99
- Gene Trees versus Species Trees 99

Molecular Characters 99

- Chloroplast DNA Structure 100
- Other Chloroplast Genes 102
- Nuclear Genes 103
- Summary 105

Literature Cited 106

6

The Evolution of Plant Systematic Diversity 107**Plant Systematic Diversity Is the Result of Evolution 108****Variation in Plant Populations and Species 111**

- Sources of Variation 111
- Local and Geographic Patterns of Variation 112

Speciation 113

- Preservation of Diversity against Gene Flow 114
- A Classification of Reproductive Isolating Mechanisms 114
- Origins of Reproductive Isolating Mechanisms 117
- Hybridization and Introgression 118
- Polyploidy 125
- Plant Breeding Systems 126

Species Concepts 127

- Case Studies in Plant Species 130
- Guidelines for Recognizing Plant Species 132
- Summary 132

Literature Cited and Suggested Readings 133

7

Phylogenetic Relationships of Major Groups of Tracheophytes, Excluding Angiosperms 135

Lycopodiophytes, Psilotophytes, Equisetophytes, and Leptosporangiate Ferns 137

- Lycopodiophytes 139
 - Lycopodiaceae* 140 • *Selaginellaceae* 140
- Equisetophytes 141
 - Equisetaceae* 141
- Psilotophytes 142
 - Psilotaceae* 142
- Leptosporangiate Ferns 143
 - Osmundaceae* 144 • *Cyatheaceae* 144 • *Marsileaceae* 146 • *Polypodiaceae* 146

Non-Angiosperm Seed Plants 148

- Cycads 149
 - Cycadaceae* 149 • *Zamiaceae* 150
- Ginkgos 150
 - Ginkgoaceae* 150
- Conifers 152
 - Cupressaceae* 153 • *Pinaceae* 155 • *Podocarpaceae* 155 • *Taxaceae* 157
- Gnetophytes 158
 - Ephedraceae* 159

Literature Cited and Suggested Readings 159

8

Phylogenetic Relationships of Angiosperms 161

"Non-Monocot Paleoh herbs" 168

- Nymphaeales 168
 - Nymphaeaceae* 168
- Ceratophyllales 170
 - Ceratophyllaceae* 170
- Piperales 171
 - Piperaceae* 171
- Aristolochiales 172
 - Aristolochiaceae* 172

Monocots 174

- Alismatales 174
 - Araceae* 175 • *Alismataceae* 177 • *Hydrocharitaceae* 179 • *Potamogetonaceae* 179
- Liliales 180
 - Liliaceae* 181 • *"Uvulariaceae"* 182 • *Trilliaceae* 182 • *Smilacaceae* 183 • *Melanthiaceae* 183

- Asparagales 185
 - Convallariaceae* 185 • *Asphodelaceae* 188 • *Agavaceae* 189 • *Alliaceae* 189 • *Amaryllidaceae* 190 • *Iridaceae* 191 • *Orchidaceae* 193
- Dioscoreales 195
 - Dioscoreaceae* 195
- Arecales 197
 - Arecaceae* 197
- Bromeliales 199
 - Bromeliaceae* 199
- Philydrales 201
 - Haemodoraceae* 201 • *Pontederiaceae* 202
- Commelinales 203
 - Commelinaceae* 204 • *Eriocaulaceae* 205 • *Xyridaceae* 206
- Typhales 206
 - Typhaceae* 206
- Juncals 209
 - Juncaceae* 209 • *Cyperaceae* 210
- Poales 210
 - Poaceae* 210
- Zingiberales 216
 - Zingiberaceae* 218 • *Marantaceae* 218 • *Cannaceae* 220

"Magnoliid complex" 222

- Magnoliales 222
 - Magnoliaceae* 222 • *Annonaceae* 224
- Laurales 226
 - Lauraceae* 226
- Illiciales 227
 - Illiciaceae* 228 • *Winteraceae* 228

Tricolpates (Eudicots) 230

- Ranunculales 230
 - Ranunculaceae* 230 • *Berberidaceae* 233 • *Papaveraceae* 233
- Proteales 236
 - Platanaceae* 237 • *Proteaceae* 237
- Vitales 238
 - Vitaceae* 238
- Caryophyllales 240
 - Caryophyllaceae* 240 • *Phytolaccaceae* 243 • *Nyctaginaceae* 243 • *Amaranthaceae* 245 • *Aizoaceae* 246 • *"Portulacaceae"* 248 • *Cactaceae* 250
- Polygonales 252
 - Droseraceae* 253 • *Polygonaceae* 253
- Saxifragales 256
 - Saxifragaceae* 256 • *Crassulaceae* 258 • *Hamamelidaceae* 260 • *Altingiaceae* 262
- Santalales 262
 - Loranthaceae* 263 • *Viscaceae* 264
- Zygophyllales 264
 - Zygophyllaceae* 264
- Geraniales 266
 - Geraniaceae* 266
- Celastrales 268
 - Celastraceae* 268

Malpighiales 268
 Malpighiaceae 268 • *Euphorbiaceae* 271 •
 Clusiaceae 274 • *Rhizophoraceae* 275 • *Violaceae*
 277 • *Passifloraceae* 278 • *Salicaceae* 280
 Oxalidales 282
 Oxalidaceae 282
 Fabales 282
 Fabaceae 283 • *Polygalaceae* 288
 Rosales 290
 Rosaceae 292 • *Rhamnaceae* 299 • *Ulmaceae* 299 •
 Celtidaceae 300 • *Moraceae* 302 • *Urticaceae* 304
 Cucurbitales 306
 Cucurbitaceae 306
 Fagales 306
 Fagaceae 308 • *Betulaceae* 309 • *Casuarinaceae*
 313 • *Myricaceae* 314 • *Juglandaceae* 315
 Myrtales 317
 Lythraceae 318 • *Onagraceae* 320 • *Myrtaceae* 321
 • *Melastomataceae* 323 • *Combretaceae* 325
 Brassicales 326
 Brassicaceae 326
 Malvales 329
 Malvaceae 329 • *Cistaceae* 333
 Sapindales 333
 Rutaceae 333 • *Meliaceae* 336 • *Simaroubaceae*
 337 • *Anacardiaceae* 338 • *Sapindaceae* 340
 Cornales 343
 Hydrangeaceae 343 • *Cornaceae* 344
 Ericales 346
 Sapotaceae 346 • *Primulaceae* 348 • *Myrsinaceae*
 348 • *Theaceae* 351 • *Ericaceae* 351 •
 Sarraceniaceae 354 • *Polemoniaceae* 354
 Solanales 357
 Solanaceae 357 • *Convolvulaceae* 359 •
 "Hydrophyllaceae" 360 • *Boraginaceae* 361
 Gentianales 363
 Gentianaceae 364 • *Rubiaceae* 365 •
 Apocynaceae 366
 Lamiales 369
 Oleaceae 372 • *Plantaginaceae* 373 •
 Scrophulariaceae 375 • *Orobanchaceae* 375 •
 Bignoniaceae 377 • *Acanthaceae* 379 •
 Gesneriaceae 379 • *Lentibulariaceae* 381 •
 Verbenaceae 382 • *Lamiaceae* 383
 Aquifoliales 385
 Aquifoliaceae 385

Apiales 387
 Apiaceae 387
 Dipsacales 390
 Caprifoliaceae 390
 Asterales 392
 Campanulaceae 393 • *Asteraceae* 396

Suggested Readings 401

Literature Cited 402

Appendix 1

Botanical Nomenclature 423

Scientific Names 423

Pronunciation of Scientific Names 427

Nomenclatural Principles 427

Requirements for Naming a New Species 428

Cultivated Plants 428

Hybrid Names 429

Literature Cited and Suggested Readings 429

Appendix 2

Specimen Preparation and Identification 431

Collecting Plants 431

Pressing and Drying Plants 432

Conservation and the Law 434

Plant Identification 434

Keys 434

Floras and Monographs 436

Herbaria, Botanical Gardens, and Taxonomic
Experts 437

Mounting and Processing Herbarium Specimens 437

Major North American Floras 438

Other Useful References 439

Taxonomic Index 441

Subject Index 457
