

Table of contents

I. Introduction	1
A Status Report	1
A Comparison of Container and Field Nurseries	3
Designing the Nursery	7
Literature Cited	8
II. Nursery Site Selection	9
The Land and its Soil	10
Water	12
Environmental Factors	16
Labor Supply	19
Access Roads, Transportation and Utilities	20
Proximity to Potential Markets	21
Proximity to Other Nurseries	21
Literature Cited	22
III. Beginning the Nursery On Paper	23
"The Nursery-Design Attack Plan"	24
The Preliminaries	24
Designing the Production Areas	26
Designing the Support Areas	27
Implementing the Attack Plan	30
Double Checking the Nursery Design	32

A Few Last Items to Check	34
The Nursery-Design Attack Plan - Summary	37
Construction Priority List	37
Literature Cited	39
References for Financing a Nursery	39
 IV. Land Preparation and Container Bed Construction . .	41
Grading and Stabilizing the Land	41
Road and Container Bed Shaping	43
Road Construction and Surfacing	47
Container Bed Construction	48
Literature Cited	52
 V. Water and Irrigation	54
Water Sources	54
Irrigation Systems	56
Discarding Excess Water	66
Literature Cited	67
 VI. Structures for Propagation, Shade and Overwintering	70
Propagation Structures	70
Shade Structures	74
Overwintering Structures	78
Literature Cited	81
 VII. Work and Storage Areas	84
The Nursery Entry	84
The Main Office	85
Employee Facilities	87
Equipment Storage and Maintenance	87
Chemical and Supply Storage and Preparation	88
Media Storage and Mixing	89
Potting Facilities	91
Holding and Shipping Facilities	92
Miscellaneous Areas	93
Literature Cited	94

VIII. Some Thoughts for the Future	95
Increasing Mechanization	95
Alternative Energy Sources and Heating Techniques	97
Improving Propagation	99
Water Conservation and Irrigation	101
A New Pallet System	102
Using Computers	104
Converting Field Acreage to Container Production	105
Literature Cited	106
 Appendix A - Container Nursery Survey Summary	110
Appendix B - Determining Propagation Space Needs	117
