

TABLE OF CONTENTS

PREAMBLE	V
--------------------	---

Part 1

INTRODUCTION TO POLYMER ALLOYS AND BLENDS	1
---	---

1.1 Historical Outline of the Industrial Development of Polymer Alloys and Blends	1
1.1.1 Definitions	1
1.1.2 Development of Commercial Alloys and Blends	4
1.1.3 Patentability	9
1.2 The Reasons for and Methods of Blending	13
1.2.1 How to Select Blend Components	13
1.2.2 Economy of Blending	15
1.2.3 The Methods of Blending	16
1.3 Fundamental Principles for Development of Polymer Alloys and Blends	20
1.3.1 Miscibility and Phase Equilibria	21
1.3.2 Flow and Flow-Induced Morphology	23
1.3.3 Rheology of Polymer Alloys and Blends	25
1.4 How to Design a Polymer Blend	25
1.5 Final Comments	27

Part 2

POLYMER/POLYMER MISCIBILITY	29
---------------------------------------	----

2.1 Introduction	29
2.2 General Principles of Phase Equilibria Calculation	30
2.3 Theories of Liquid Mixtures Containing Polymer	34
2.3.1 Huggins-Flory Theory	34
2.3.2 Equation of State Theories	35
2.3.3 Gas-Lattice Model	37
2.3.4 Simha's Cell-Hole Theory	38
2.3.5 Strong Interactions Model	39
2.3.6 Heat of Mixing Approach	40
2.3.7 Theory of Block Copolymer-Homopolymer Blends	40
2.3.8 Summary	41
2.4 Mechanisms of Phase Separation	43
2.4.1 Nucleation and Growth (NG)	43
2.4.2 Spinodal Decomposition (SD)	45
2.5 Semi-Crystalline Polymer Blends	52
2.5.1 General Types of Polymer Blends	52
2.5.2 Polymer Crystallization	53
2.5.3 Crystallization in Miscible Polymer Blends	57
2.5.4 Influence of Liquid/Liquid Phase Separation on the Crystallization and Morphology	63
2.6 Determination of Polymer/Polymer Miscibility	64
2.6.1 Phase Equilibria Methods	64
2.6.2 Measurement of the Polymer/Polymer Interaction Parameter, χ_{ij}	84
2.6.3 Indirect Methods	93

2.7	Interphase, Diffusion and Compatibility . . .	117
2.7.1	Role of the Interfacial Phenomena in Polymer Blends . . .	118
2.7.2	Compatibilization Methods . . .	124

Part 3**RHEOLOGY OF POLYMER ALLOYS AND BLENDS . . . 131**

3.1	Introduction . . .	131
3.2	Basic Relations . . .	133
3.2.1	Melt Flow . . .	134
3.2.2	Viscoelasticity . . .	140
3.3	Model Systems . . .	147
3.3.1	Solution of Low Molecular Weight Liquids . . .	148
3.3.2	Homologous Macromolecular Blends . . .	150
3.3.3	Viscosity of Suspensions . . .	152
3.3.4	Rheology of Emulsions (Two Newtonian Liquids) . . .	160
3.3.5	Block Copolymers . . .	167
3.3.6	Lessons From the Models . . .	170
3.4	Newtonian Flow of Polymer Blends . . .	171
3.4.1	Miscible Blends . . .	171
3.4.2	Critical Region . . .	174
3.4.3	Flow-Induced Miscibility in Polymer Blends . . .	176
3.4.4	Immiscible Blends . . .	178
3.4.5	Phase Inversion . . .	180
3.5	Microrheology . . .	181
3.5.1	Instability of Thread of Viscous Liquid . . .	182
3.5.2	Shear Flow . . .	183
3.5.3	Irrotational Flows . . .	185
3.6	Small Strain, Dynamic Shear Flow . . .	189
3.6.1	Homologous Polymer Blends . . .	189
3.6.2	Miscible Blends . . .	191
3.6.3	Immiscible Blends . . .	194
3.7	Polyolefin Blends . . .	201
3.7.1	Polyethylene/Polyethylene Blends . . .	202
3.7.2	Polyethylene/Isotactic Polypropylene Blends . . .	205
3.7.3	Other Polyolefin Blends . . .	207
3.8	Steady State Shear Flow . . .	209
3.8.1	Shear Viscosity . . .	210
3.8.2	Melt Elasticity . . .	214
3.9	Elongational Flow . . .	217
3.9.1	Uniaxial Extensional Rheometry . . .	218
3.9.2	Elongational Flow of Polymers . . .	219
3.9.3	Uniaxial Elongation of PAB . . .	220
3.9.4	Yield Stress . . .	225
3.9.5	Flow Modeling . . .	227
3.10	Flow-Induced Morphology . . .	229
3.11	Viscoelasticity of PAB . . .	231
3.11.1	Time-Temperature Superposition . . .	234
3.11.2	Temperature Scans . . .	239
3.12	Summary . . .	244

APPENDIX I	Commercial Polymer Alloys and Blends	248
	A. Commercial Blends in Alphabetical Order by Name	248
	B. Commercial Blends in Alphabetical Order by Composition	256
	C. Commercially Interesting Polymer Pairs	265
	D. Binary Blends of Engineering and Specialty Resins	267
APPENDIX II	Survey of Patent Literature on Engineering Polymer Alloys and Blends	271
	A. Selected Recent Patents on Polyamide Blends	271
	B. Selected Recent Patents on Polycarbonate Blends	275
	C. Selected Recent Patents on POM Blends	281
	D. Selected Recent Patents on Polyphenylene Ether Blends	282
	E. Selected Recent Patents on Thermoplastic Polyester Blends	287
	F. Selected Recent Patents on Specialty Polymer Blends	292
APPENDIX III	Abbreviations for Thermoplastics	297
APPENDIX IV	Selected Monographies on Polymer Rheology	300
	A. Selected Monographies on Polymer Rheology	300
	B. Selected Rheological Terminology	301
	Abbreviations and Notation	305
	References/Author Index	311
	Blends Index	346
	Subject Index	350
