

CONTENTS

Foreword.....	v
Chapter 1. Formation of Carbon-carbon bonds via π -allyl complexes of transition metals, by L.S. Hegedus.....	1
Chapter 2. The syn effect and the use of enolate equivalents in synthesis, by R.R. Fraser.....	65
Chapter 3. The formation and transformation of allenic- α - acetylenic carbanions, by R. Epsztein.....	107
Chapter 4. Stereoselective Aldol condensations, by C.H. Heathcock.....	177
Chapter 5. Techniques in carbanion chemistry by T. Durst.....	239
Index.....	293
