

Contents

Section I Induction of Haploids, Pollen Embryogenesis, Ultrastructure, and Genetic Stability

✓ I.1 In Vitro Production of Haploids and Their Use in Cell Genetics and Plant Breeding Y.P.S. BAJAJ (With 1 Figure)

1 Introduction	3
2 Anther Culture	3
3 Culture of Excised Ovaries and Ovules	18
4 Elimination of Chromosomes by the Bulbosum Technique ...	18
5 Uses of Haploids in Cell Genetics and Plant Breeding	20
6 Summary and Conclusions	30
References	30

✓ I.2 Environmental and Genetical Aspects of Pollen Embryogenesis W. POWELL (With 5 Figures)

1 Introduction	45
2 Culture Techniques	45
3 Genetical Factors	46
4 Environmental Factors	52
5 Conclusions	61
References	61

✓ I.3 Ultrastructure of Pollen Embryogenesis T.L. REYNOLDS (With 9 Figures)

1 Introduction	66
2 Anther Culture of <i>Hyoscyamus niger</i>	66
3 Ultrastructural Studies	67
4 Discussion	74
5 General Conclusions	80
References	81

I.4 Genetic Stability in Haploid Cell Cultures

A. ZIAUDDIN and K. J. KASHA

1 Introduction	83
2 Types of Genetic Variation	84
3 Sources of Variability	88
4 Control of Variability	91
5 Conclusions	94
References	95

Section II Cereals

II.1 Wheat (*Triticum aestivum*): In Vitro Production and Utilization of Doubled Haploids

E. PICARD, A. RODE, G. DOUSSINAULT, M. ROUSSET, and M. RIVES (With 6 Figures)

1 Introduction	101
2 The Physiological Route: Importance of Environmental Components in Wheat Androgenesis	102
3 The Genetic Route	106
4 Chemical Hybridization Agents (CHA) Method	111
5 Gametoclonal Variation: Biometrical and Molecular Aspects ..	113
6 Haplodiploidization and Wheat Breeding	117
7 Protocol	120
8 Concluding Remarks	120
References	121

II.2 Barley (*Hordeum vulgare* L.):

Anther Culture and the Production of Haploids

XU ZHI-HONG (With 20 Figures)

1 Introduction	125
2 Anther Culture	132
3 Whole Spike Culture	162
4 Culture of Isolated Pollen	163
5 Performance of Dihaploid Plants in the Field	167
6 Conclusions and Prospects	170
7 Protocol	170
References	171

II.3 Maize (*Zea mays* L.): In Vitro Production of Haploids

A. D. GENOVESI (With 14 Figures)

1 General Account	176
2 In Vitro Production of Haploids by Anther Culture	181
3 Anther Culture	181
4 Future Anther Culture Research	197

5 Unfertilized Ovule Culture	198
6 Incorporation of Haploids in Breeding for Superior Hybrids	198
7 Conclusions and Prospects	201
8 Protocol	201
References	202

II.4 Rice (*Oryza sativa* L.):

Guan 18 — an Improved Variety Through Anther Culture

ZHU DEYAO and PAN XIGAN (With 5 Figures)

1 Introduction	204
2 Raising the Induction Frequency of Pollen Plantlets in Indica Rice	204
3 Breeding the High Quality Rice Variety Guan 18	206
4 Summary and Discussion	210
References	211

Section III Trees

III.1 Rubber (*Hevea brasiliensis* Muell. Arg.):

In Vitro Production of Haploids

CHEN ZHENGHUA (With 6 Figures)

1 Introduction	215
2 In Vitro Induction of Haploids	218
3 Anther Culture	218
4 Unpollinated Ovule Culture	232
5 Prospects	234
References	235

III.2 Poplars (*Populus* spp.): In Vitro Production of Haploids

WU KEXIAN and P. NAGARAJAN (With 3 Figures)

1 Introduction	237
2 Techniques for the Production of Haploids	239
3 Genetic Analysis of Haploids	247
4 Conclusions and Future Prospects	247
5 Protocol	248
References	248

III.3 Apple (*Malus domestica* Borkh.):

In Vitro Induction of Androgenesis

E. MILEWSKA-PAWLICZUK (With 3 Figures)

1 Introduction	250
2 Induction of Haploids in Vitro	250
3 Culture of Anthers	251
4 Culture of Androgenic Embryos	260

5 Practical Importance of Haploids in Breeding of New Varieties	261
6 Summary	261
References	262

III.4 Litchi (*Litchi chinensis* Sonn.):

In Vitro Production of Haploid Plants

FU LIANFANG (With 3 Figures)

1 Introduction	264
2 Anther Culture	266
3 Observations and Results	268
4 Morphological Characters	272
5 Cytological Observation	273
6 Summary and Prospects	274
7 Protocol	274
References	274

Section IV Medicinal Plants

IV.1 *Digitalis* spp.: In Vitro Production of Haploids

P. PÉREZ-BERMÚDEZ, M.-J. CORNEJO, and J. SEGURA

(With 1 Figure)

1 Introduction	277
2 In Vitro Induction of Haploids	279
3 Anther Culture	279
4 Conclusions and Prospects	287
5 Protocol	287
References	288

IV.2 *Hyoscyamus* spp.: Anther Culture Studies

V. RAGHAVAN (With 3 Figures)

1 Introduction	290
2 Anther Culture: Methodology and Results	291
3 Conclusions	302
4 Protocol	303
References	303

Section V Vegetables, Fruits, Miscellaneous

V.1 *Arabidopsis thaliana* (L.): In Vitro Production of Haploids

R.L. SCHOLL and K.A. FELDMANN (With 1 Figure)

1 Introduction	309
2 In Vitro Induction of Haploids	310
3 Anther Culture	311

4 Conclusion and Prospects	318
5 Protocol	318
References	320

V.2 *Asparagus* Anther Culture and Field Trials of Dihaploids and F₁ Hybrids

C. DORÉ (With 9 Figures)

1 Introduction	322
2 Induction of Haploids Through Anther Culture	324
3 Production of Haploids from Polyembryonic Seeds	332
4 Chromosome Doubling of Haploid Plants	333
5 Incorporation of Haploids in Breeding – Release of New Varieties	334
6 Conclusions and Prospects	341
7 Protocol	342
References	343

V.3 Sugarbeet (*Beta vulgaris* L.): In Vitro Induction of Haploids

M. DOCTRINAL, R.S. SANGWAN, and B.S. SANGWAN-NORREEL

(With 3 Figures)

1 General Account	346
2 Anther Culture	348
3 Culture of Excised Ovules	350
4 Transfer of Haploids to Pot/Field	354
5 Protocol	354
6 Conclusions and Prospects	355
References	356

V.4 Cabbage (*Brassica oleracea* var. *capitata*)

and Brussels Sprout (*Brassica oleracea* var. *gemmifera*):

In Vitro Production of Haploids

M.-A. LELU and H. BOLLON (With 5 Figures)

1 Introduction	358
2 Anther Culture	361
3 Culture of Isolated Pollen	367
4 Incorporation of Androgenetic Doubled Haploids in Breeding Programs and Release of New Varieties	367
5 Conclusion and Prospects	368
6 Protocol	370
References	371

V.5 Pepper (*Capsicum* spp.): In Vitro Induction of Haploids

J. VAGER (With 6 Figures)

1 Introduction	374
2 In Vitro Induction of Haploids	376

3 Culture of Excised Anthers	380
4 Induced Continual Embryogenesis	388
5 Incorporation of Haploids in Breeding	389
6 Conclusion and Prospects	389
7 Protocol	390
References	391
V.6 Carrot (<i>Daucus carota</i> L.): In Vitro Production of Haploids and Field Trials	
S.B. ANDERSEN, I. CHRISTIANSEN, and B. FARESTVEIT (With 3 Figures)	
1 Introduction	393
2 Materials and Methods	393
3 Results	396
4 Discussion and Conclusions	401
5 Protocol	402
References	402
V.7 Strawberry (<i>Fragaria</i> × <i>ananassa</i> Duch.): In Vitro Production of Haploids	
K. NIEMIROWICZ-SZCZYTT (With 7 Figures)	
1 Introduction	403
2 In Vitro Induction of Haploids	406
3 Anther Culture	408
4 Incorporation of Haploids in Breeding: Release of New Varieties	413
5 Conclusions and Prospects	414
6 Protocol	414
References	415
V.8 <i>Gerbera jamesonii</i> H. Bolus ex Hook: In Vitro Production of Haploids	
M. CAPPADOCIA and J. VIETH (With 1 Figure)	
1 Introduction	417
2 In Vitro Induction of Haploids	418
3 Ovule Culture	421
4 Conclusions and Prospects	426
5 Protocol	426
References	427
V.9 Sunflower (<i>Helianthus annuus</i> L.): In Vitro Production of Haploids	
N.E. BOHOROVA and A.I. ATANASSOV (With 6 Figures)	
1 General Account	428
2 Anther Culture	430

3 Ovule Culture	438
4 Protocol	439
5 Conclusion	440
References	441

V.10 Tomato (*Lycopersicon esculentum* L.):

Anther Culture and Induction of Androgenesis

A. CHLYAH, H. TAARJI, and H. CHLYAH (With 3 Figures)

1 Introduction	442
2 Brief Review of In Vitro Anther Culture and Induction of Haploids in Tomato	443
3 Culture of Isolated Pollen	446
4 Analysis of Factors Affecting Anther Culture in Tomato	446
5 Regeneration of Entire Plants and Transfer to Soil	453
6 Variants, Genetic Analysis, and Stability	453
7 Conclusions and Prospects	453
8 Protocol	455
References	456

V.11 Alfalfa (*Medicago* spp.): In Vitro Production of Haploids

N. ZAGORSKA, R. STEREVA, and P. ROBEVA (With 6 Figures)

1 Introduction	458
2 Haploid Production Through Anther Culture	459
3 Incorporation in Breeding Programs	468
4 Conclusion	470
5 Protocol	470
References	471

V.12 Winged Bean (*Psophocarpus tetragonolobus* L. TPt6):

Culture of Excised Anthers and Unfertilized Ovules

K. TRAN THANH VAN, H. LIE-SCHRICKE, and T.H. TRINH

(With 3 Figures)

1 Introduction	472
2 Material and Methods	473
3 Results	473
4 Discussion	474
5 Protocol	477
References	478

V.13 Sugarcane (*Saccharum* spp.): Anther Culture Studies

P.H. MOORE and M.M.M. FITCH (With 5 Figures)

1 General Account	480
2 In Vitro Production of Haploids	483
3 Use of Haploids in Breeding and the Release of New Varieties	494

4 Conclusion and Prospects	495
5 Protocol	495
References	496
 V.14 Wild Tomato (<i>Solanum carolinense</i> L.): Anther Culture and the Induction of Haploids T. L. REYNOLDS (With 7 Figures)	
1 Introduction	498
2 Anther Culture	498
3 Origin of Embryoids and Callus	499
4 Hormonal Control of Androgenesis	504
5 Androgenic Induction	509
6 Summary and Conclusions	511
7 Protocol	511
References	512
 V.15 Wild Potato (<i>Solanum chacoense</i> Bitt.): In Vitro Production of Haploids M. CAPPADOCIA (With 6 Figures)	
1 Introduction	514
2 In Vitro Induction of Haploids	516
3 Anther Culture	517
4 Conclusion and Prospects	526
5 Protocol	526
References	527
 V.16 <i>Solanum phureja</i> : Anther Culture and the Induction of Haploids in a Cultivated Diploid Potato Species R. E. VEILLEUX (With 4 Figures)	
1 Introduction	530
2 In Vitro Induction of Haploids	532
3 Anther Culture	533
4 Cluster Analysis of Anther-Derived Plants	537
5 Incorporation of Monoploids in Breeding; Release of New Varieties	539
6 Conclusion and Prospects	540
7 Protocol	541
References	541
 Subject Index	 545
