

# Table of Contents

## General Introduction

The overall task	7
Tropical forest dynamics and CO <sub>2</sub> enrichment	8
Degradation processes that affect the adult life phase of trees	9
Processes that affect regeneration, establishment and the juvenile life phase of trees	11
The response of tropical adult trees and elevated CO <sub>2</sub>	12

## Chapter 1 In deep shade, elevated CO<sub>2</sub> increases the vigor of tropical climbing plants

Abstract	15
Introduction	15
Material and Methods	16
Results	21
Discussion	24
Acknowledgments	26

## Chapter 2 Growth under competition enhances the CO<sub>2</sub>-response of tropical climbers

Abstract	27
Introduction	27
Material and Methods	28
Results	31
Discussion	35
Acknowledgments	38

## Chapter 3 Biomechanical responses to elevated CO<sub>2</sub> in tropical lianas

Abstract	39
Introduction	39

	Material and Methods	40
	Results	43
	Discussion	49
	Acknowledgments	51
Chapter 4	Host-plant selection in three different moth larvae	
	Abstract	53
		55
	Summary	57
	Conclusion	61
	References	72
	Curriculum vitae
