Section I Wide Hybridization, Transformation, Cryopreservation

I.1 Wide Hybridization in Legumes and Oilseed Crops Through Embryo, Ovule, and Ovary Culture Y.P.S. BAJAJ (With 9 Figures)

1 Introduction	3
2 Incompatibility Problems and in Vitro Culture	5
3 Wide Hybridization	6
4 Conclusions and Prospects	34
References	34

I.2 Transformation in Legumes G.S. NISBET and K.J. WEBB (With 1 Figure)

1 Introduction	38
2 Targets for Transformation	39
3 Approaches for Transformation	41
4 Concluding Comments	45
References	46

I.3 Cryopreservation of Germplasm of Legumes and Oilseed Crops Y.P.S. BAJAJ (With 6 Figures)

1 Introduction	49
2 Cryopreservation of Cultures	49
3 Germplasm Banks	60
4 Summary and Conclusions	61
References	61

Section II Food Legumes

II.1 Pea (*Pisum sativum* L.) M. GRIGA and F.J. NOVÁK (With 11 Figures)

1 Introduction	65
----------------------	----

2 In Vitro Approach.....	69
3 Conclusions and Prospects.....	91
4 Protocols.....	92
References.....	94

II.2 Chickpea (*Cicer arietinum* L.)

N. ALTAF and M.S. AHMAD (With 1 Figure)

1 Introduction.....	100
2 In Vitro Culture.....	103
3 Conclusions.....	111
References.....	111

II.3 Soybean: Plant Regeneration and Somaclonal Variation

U.B. BARWALE and J.M. WIDHOLM (With 9 Figures)

1 Introduction.....	114
2 History of Soybean Tissue Culture.....	114
3 Establishment of Cultures.....	116
4 Somaclonal Variation.....	121
5 Concluding Remarks.....	129
6 Protocol for Soybean Plant Regeneration Through Embryogenesis or Organogenesis.....	130
References.....	130

II.4 Soybean: Wide Hybridization Through Embryo Culture

J.E. GRANT (With 3 Figures)

1 Introduction.....	134
2 The Genus <i>Glycine</i>	134
3 Hybridization Between the Subgenera.....	136
4 Conclusions.....	145
5 Protocol.....	145
References.....	146

II.5 Soybean: Isolation, Culture, and Fusion of Protoplasts

N. HAMMATT and M.R. DAVEY (With 5 Figures)

1 Introduction.....	149
2 Isolation of Protoplasts.....	153
3 Methods of Culturing <i>Glycine</i> Protoplasts.....	158
4 Behaviour of Isolated Protoplasts in Culture.....	158
5 Regeneration of Plants from Protoplasts of Wild <i>Glycine</i> Species.....	161
6 Fusion of Protoplasts.....	162
7 Flow Cytometry.....	164
8 Conclusion and Prospects.....	165
9 Protocol for the Isolation, Culture, and Electrofusion of <i>Glycine</i> Protoplasts.....	166
References.....	167

II.6 Winged Bean [*Psophocarpus tetragonolobus* (L.) D.C.]

S. VENKETESWARAN (With 10 Figures)

1 Introduction	170
2 In Vitro Approaches	174
3 Conclusions and Prospects	191
References	192

Section III Forage Legumes

III.1 Alfalfa, Lucerne (*Medicago* spp.)

S. ARCIONI, F. DAMIANI, M. PEZZOTTI and E. LUPOTTO

(With 7 Figures)

1 Introduction	197
2 In Vitro Approaches	199
3 Isolation and Culture of Protoplasts	210
4 Somatic Embryogenesis and Plant Regeneration	221
5 Genetic Stability and Somaclonal Variation	226
6 Anther Culture	229
7 Ovule-Embryo and Pod Culture	230
8 Transformation	232
9 Cryopreservation	233
10 Summary and Prospects	234
References	235

III.2 Clovers (*Trifolium* spp.)

E. G. WILLIAMS, G. B. COLLINS, and J. R. MYERS

(With 9 Figures)

1 Introduction	242
2 Factors Important for Initiation of Cultures	246
3 Shoot Meristem Cultures	248
4 Embryo Culture and in Vitro Fertilization	252
5 Callus, Cell, and Protoplast Culture	263
6 Anther Culture and Haploid Production	274
7 Transformation	275
8 Conclusion	276
References	281

III.3 Lupins (*Lupinus* spp.)

C. SATOR (With 3 Figures)

1 Introduction	288
2 In Vitro Approaches	294
3 Conclusions and Prospects	306
References	308

III.4 Cell and Tissue Culture of *Stylosanthes* spp.

E. G. M. MEIJER and L. SZABADOS (With 3 Figures)

1 Introduction	312
2 Cell and Tissue Culture	313
3 Selected Methods for <i>S. guianensis</i>	319
4 Conclusions	321
References	321

III.5 Birdsfoot Trefoil (*Lotus corniculatus* L.)

E. B. SWANSON, D. A. SOMERS, and D. T. TOMES

(With 7 Figures)

1 Introduction	323
2 In Vitro Approaches	324
3 Conclusions and Prospects	338
References	338

III.6 Crownvetch (*Coronilla varia* L.)

D. L. GUSTINE and B. G. MOYER (With 2 Figures)

1 Introduction	341
2 In Vitro Approaches	344
3 Conclusions and Prospects	352
4 Protocol	353
References	353

III.7 Goat's Rue (*Galega officinalis* L.)

V. NAŠINEC and B. NĚMCOVÁ (With 5 Figures)

1 Introduction	355
2 In Vitro Studies	355
3 Conclusions and Prospects	361
References	363

Section IV Oilseed Crops

IV.1 Interspecific Hybridization in *Brassica* Through Ovary Culture

N. INOMATA (With 7 Figures)

1 Introduction	367
2 The Need for Ovary Culture	369
3 Method of Ovary Culture	370
4 Hybrid Plants and Their Progenies	377
5 Conclusion	381
References	382

IV.2 Regeneration of Plants from Protoplasts of Oilseed

Brassica Crops

K. VAMLING and K. GLIMELIUS (With 4 Figures)

1 Introduction	385
2 Protoplast Isolation	389
3 Culture of Protoplasts	399
4 Regeneration of Plants	399
5 Protoplast Fusion and Selection of Hybrids	403
6 Miscellaneous Studies	405
7 Protocol for Isolation, Culture, Regeneration, and Fusion ...	408
References	411

IV.3 Cybrids in Oilseed *Brassica* Crops Through Protoplast Fusion

G. PELLETIER (With 3 Figures)

1 Introduction	418
2 Genetic Constitution of Cybrids Obtained Through Protoplast Fusion	419
3 Importance of Cytoplasm in <i>Brassica</i> and the Production of Male-Sterile Lines	420
4 Protoplast Isolation, Fusion, and Culture Until Plant Regeneration and Cybrid Selection	421
5 Molecular Characterization of Organelle Genomes of Cybrids	425
6 Agronomical Value of Cybrids	426
7 Conclusion	430
References	430

IV.4 Sunflower (*Helianthus annuus* L.): Establishment of Cultures, Transformation, and the Regeneration of Plants

K.E.P. ROBINSON and N.P. EVERETT (With 1 Figure)

1 Introduction	434
2 In Vitro Approaches	436
3 Transformation and Genetic Engineering	448
4 Conclusions and Prospects	449
References	449

IV.5 Sunflower (*Helianthus annuus* L.): In Vitro Interspecific Hybridization

N.E. BOHOROVA and A.I. ATANASSOV (With 7 Figures)

1 Introduction	453
2 Interspecific Hybridization Between Cultivated Sunflower and Some Wild Species	460
3 Conclusions	469
4 Protocol for Embryo Culture	469
References	470

IV.6 In Vitro Production of Haploids in *Helianthus*

H. Y. YANG, H. YAN and C. ZHOU (With 6 Figures)

1 Introduction	472
2 Anther Culture	472
3 Ovary and Ovule Culture for the Induction of Haploids	473
4 Conclusions	483
References	483

IV.7 Sunflower (*Helianthus* spp.): Anther Culture and Field Studies on Haploids

R. JONARD and A. MEZZAROBBA (With 5 Figures)

1 Introduction	485
2 Androgenesis in Wild Species and Interspecific Hybrids of <i>Helianthus</i>	487
3 Androgenesis in the Cultivated Sunflower, <i>Helianthus annuus</i> L.	491
4 Conclusions	498
5 Protocol	500
6 Conditions for Culture	500
References	501

IV.8 Flax (*Linum usitatissimum* L.): In Vitro Studies

A. MCHUGHEN (With 2 Figures)

1 Introduction	502
2 In Vitro Approaches	505
3 Conclusions and Prospects	512
References	513

IV.9 Flax (*Linum usitatissimum* L.): Embryo Culture Studies

A. PREŤOVÁ (With 16 Figures)

1 Introduction	515
2 Growth of Flax Embryos Under in Vitro Conditions	518
3 Flax Embryo Cultures Serve to Proliferate Plant Material	533
4 Conclusions	535
References	535

IV.10 Coconut (*Cocos nucifera* L.): Micropropagation

J. BLAKE (With 3 Figures)

1 Coconut as an Oilseed Crop	538
2 Conventional Propagation	541
3. Micropropagation	542
4 Conclusions	552
References	552

IV.11 Coconut (*Cocos nucifera* L.): Anther Culture

N. T. THANH-TUYEN (With 4 Figures)

1 Introduction	555
2 Ontogeny of Coconut Pollen	555
3 Androgenesis in Coconut	559
4 Problems and Prospects	563
References	565

IV.12 Oil Palm (*Elaeis guineensis* Jacq.): Tissue Culture and Micropropagation

WOOI KHENG CHOO (With 3 Figures)

1 Introduction	569
2 In Vitro Approaches	575
3 Conclusions and Prospects	587
References	589

IV.13 Olive (*Olea europaea* L.) as an Oilseed Crop

E. RUGINI and E. FEDELI (With 14 Figures)

1 Introduction	593
2 Chemical Composition of Olive Oil	608
3 In Vitro Approaches	616
4 Conclusions and Perspectives	634
References	634

Section V Miscellaneous

V.1 *Indigofera* spp.

P. K. EVANS (With 4 Figures)

1 Introduction	645
2 In Vitro Studies	648
3 Summary and Conclusions	654
4 Protocol	656
References	656

V.2 Carob (*Ceratonia siliqua* L.)

M. A. MARTINS-LOUÇÃO (With 5 Figures)

1 Introduction	658
2 In Vitro Culture Studies	664
3 Protocols	671
4 Summary and Prospects	672
References	673

Subject Index	677
---------------------	-----
