FOREWORD	vii

Chapter 11. Vegetable and Animal Materials

R. GANE

I. Plants	1
A. Constituents	2
II. Animals	20
A. Constituents	20
B. Storage of Meat	25
III. Storage	26
References and Bibliography	27

Chapter 12. Preservation of Biological Materials Especially by Heat Treatment

N. BLAKEBROUGH

I. Introduction	29
A. Materials	29
B. Methods	29
II. Preservation by Heating	32
A. Introduction	32
B. Effects of Temperature on Microbial Growth	32
C. Effects of Temperature on Medium Constituents	48
D. Batch and Continuous Sterilization	50
E. Product Applications	54
F. Conclusions	61
References	62
Bibliography	63

Chapter 13. Evaporation in the Biological Industries

H. D. MACMURRAY and S. B. WATKINS

I. Introduction	66
A. Evaporation	66

B. Amount of Evaporation	66
C. Effect of Solubility	66
D. Vapour Pressure	70
E. Elevation of the Boiling Point by Non-Volatile Solutes	70
F. Specific Heats	76
G. Latent Heat	76
H. Heating Surfaces	76
I. Overall Coefficient of Heat Transmission (<i>U</i>)	78
II. Evaporator Design	80
A. Operating Pressure	80
B. Multiple Effect Evaporation	81
C. Recompression Evaporators	81
D. Heating Systems	84
III. Trouble-shooting in an Evaporator	88
A. Vacuum and Pressure Testing	88
B. Loss of Operating Vacuum	89
C. Increase of Steam Pressure	89
D. Superheated Steam	89
IV. Current Trends in Evaporation	89
A. Heat Transfer	89
V. Evaporation of Typical Liquors	90
A. Salting Liquors	90
B. Fruit Juices	91
C. Milk Evaporation	92
D. Sugar Evaporation	93
E. Steep Water Evaporators	93
F. Glue and Gelatine Evaporators	93
VI. Glass Evaporators	93
References and Bibliography	95

Chapter 14. Drying Processes

J. C. FORREST

I. Principles of Drying	97
A. Methods of Heating	98
B. Methods of Vapour Removal	99
C. Fundamentals of Drying	99
II. Fixed-Tray Driers	112
A. Cabinet Drier	112
B. Tunnel Drier	114
C. Bin Drier	115
III. Through Draught Moving Bed Air Driers	115
A. Conveyor Drier	115
B. Belt Trough Drier	116

IV. Drying with Product Suspended in Hot Air	117
A. Pneumatic Drier	118
B. Ring Drier	119
C. Fluidized Bed Drier	119
D. Falling Particle Drier	121
V. Roller Drying	121
VI. Rotary Driers	122
VII. Vacuum Driers	124
A. Shelf Drier	124
B. Agitated Pan Drier	124
C. Continuous Drier	125
VIII. Freeze Driers	126
A. Batch Drier	126
B. Continuous Drier	129
IX. Selection of a Suitable Drier Installation	130
References and Bibliography	131

Chapter 15. The Chilling and Freezing of Foodstuffs

E. J. ROLFE

I. Introduction	137
A. Spoilage of Fresh Foods	138
B. Effect of Temperature on Spoilage	140
C. Definitions	141
II. Preservation of Foodstuffs by Chilling	142
A. Fruits and Vegetables	142
B. Animal Products	149
C. Physical and Engineering Aspects of Chilling	155
III. Water and its Conversion to Ice	170
A. Introduction	170
B. Properties of Water	170
C. Crystallization of Water and Aqueous Solutions	176
IV. Freezing of Foodstuffs	178
A. Biophysical Aspects	178
B. Physics of Freezing of Foodstuffs	183
Nomenclature	203
References	204

Chapter 16. Spray Drying

N. DOMBROWSKI and G. MUNDAY

I. Introduction	209
II. Methods of Atomizing Liquids	212
A. Mechanics of Flow Through Atomizers	215

B. Energy Requirements for Atomizers	239
C. Processes of Drop Formation in Sprays	239
D. Methods of Measuring Drops	263
E. Drop Sizes from Atomizers	265
III. Drying	289
A. General Principles	289
B. Drying of Drops	293
C. Drying of Sprays	302
D. Principles of Spray Drier Design	305
IV. Practical Design Considerations	308
A. Selection of Atomizers	308
B. Drying Chambers	310
C. Product Removal	311
Nomenclature	312
References	315
Bibliography	320

Chapter 17. Processing with Ionizing Radiations

F. J. LEY and F. ROGERS

I. Introduction	321
II. Electromagnetic Radiation	322
A. Units	325
B. Dose Measurement	325
III. Applications	326
A. Introduction	326
B. General Microbiological Considerations	327
C. Medical Sterilization	329
D. Food Irradiation	332
V. Processing with Gamma Radiation	345
A. Choice of Source	345
B. Design of Plant	345
C. Experimental Cobalt-60 Sources	355
D. Irradiation with Electrons	356
E. Irradiation with X-rays	359
F. Choice of Irradiation Method	360
G. The Question of Induced Radioactivity	363
References	364
