Foreword	xiii
<i>W. K. Gamble, Director General, IITA</i>	

SECTION I. GENERAL CONSIDERATIONS

1. Present and future opportunities to improve the nitrogen nutrition of crops through biological fixation	3
<i>J. Döbereiner, EMBRAPA, Brazil</i>	
2. Contribution of microorganisms to the nitrogen status of tropical soils	13
<i>D. J. Greenland, IITA; and University of Reading, U.K.</i>	
3. Soil nitrogen changes in farming systems in the humid tropics	27
<i>W. V. Bartholomew, University of Ibadan; and University of North Carolina, U.S.A.</i>	

SECTION II. LEGUMES IN FARMING SYSTEMS OF THE TROPICS

4. The nutritional role of grain legumes in the lowland humid tropics	45
<i>K. O. Rachie, IITA</i>	
5. Legumes in farming systems of the humid tropics	61
<i>B. N. Okigbo, IITA</i>	
6. Transfer of nitrogen between legumes and other crops	73
<i>E. F. Henzell and I. Vallis, Division of Tropical Agronomy, CSIRO, Queensland, Australia</i>	
7. Contribution of forage legumes to the nitrogen economy of mixed swards. A review of relevant Hawaiian research	89
<i>A. S. Whitney, Hawaii Agricultural Experiment Station, Kula, Hawaii, U.S.A.</i>	

SECTION III. ECOLOGY AND PHYSIOLOGY OF RHIZOBIA

8. Ecology of nitrogen-fixing organisms	99
<i>M. Alexander, Cornell University, U.S.A.</i>	

9. The ecology of *Rhizobium* and recent advances in the study of the ecology of *Rhizobium* 115
S. K. A. Danso, University of Ghana
10. Effectiveness, saprophytic and competitive ability: three properties of *Rhizobium* essential for increasing the yield of inoculated legumes . . . 127
M. Obaton, INRA, Dijon, France
11. Recent advances in tissue-culture studies of the legume-*Rhizobium* symbiosis 135
M. J. Dilworth and J. A. McComb, Murdoch University, Western Australia
12. Host-symbiont relationships in nodule development and nitrogen fixation 151
P. J. Dart, ICRISAT, India
13. Factors controlling nitrogen fixation by rhizobia 153
F. J. Bergersen, CSIRO, Canberra, Australia

SECTION IV. NITROGEN FIXATION IN LEGUMES

14. The development and use of legume inoculants 169
R. A. Date, CSIRO, St. Lucia, Queensland, Australia
15. Toward better use of inoculants in the humid tropics 181
A. Ayanaba, IITA
16. Nutritional factors limiting nitrogen fixed by rhizobia 189
D. G. Edwards, IITA; and University of Queensland, Australia
17. Effects of fertilizer use on cowpea and soybean nodulation and nitrogen fixation in the lowland tropics 205
B. T. Kang, D. Nangju and A. Ayanaba, IITA
18. Nodulation and nitrogen fixation in legumes in Ghana 217
E. A. Dennis, Soil Research Institute, Ghana
19. Nodulation and nitrogen fixation in legumes in east Africa 233
S. O. Keya, University of Nairobi, Kenya
20. Response of soybean to *Rhizobium* inoculation at Morogoro, Tanzania . 245
M. S. Chowdhury, University of Dar es Salaam, Tanzania

SECTION V. NON-LEGUME SOURCES OF BIOLOGICAL NITROGEN IN NATURE

21. Contribution of free-living bacteria to the nitrogen status of humid tropical soils 257
C. T. I. Odu, University of Ibadan, Nigeria

22. Non-symbiotic nitrogen fixation in tropical humid soils, with particular reference to Nigeria 267
N. Okafor, University of Nigeria, Nigeria
23. Nitrogen-fixing associations between bacteria and tropical grass roots . 273
J. M. Day, Rothamsted Experimental Station, Harpenden, Herts., U.K.
24. Non-symbiotic nitrogen fixation in rice and rice fields 289
I. Watanabe and K. K. Lee, The International Rice Research Institute, Laguna, Philippines.
25. Yield increases of tropical grain and forage grasses after inoculation with *Spirillum lipoferum* in Florida 307
R. L. Smith, J. H. Bouton, S. G. Schank and K. H. Quesenberry, University of Florida, U.S.A.
26. Nitrogen fixation in the rice rhizosphere: methods of measurement and practices suggested to enhance the process 313
G. Rinaudo, ORSTOM, Dakar, Senegal; I. Hamad-Fares, and Y. R. Dommergues, CNRS, Vandoeuvre-les-Nancy, France

SECTION VI. MEASURING NITROGEN GAINS AND LOSSES IN FARMING SYSTEMS

27. The acetylene-ethylene assay and other measures of nitrogen fixation in field experiments 325
G. E. Ham, University of Minnesota, U.S.A.
28. Use of nitrogen-tracer techniques for research on nitrogen fixation . . 335
J. M. Bremner, Iowa State University, U.S.A.
29. Determination of losses of nitrogen from soils in the humid tropics by lysimeter studies 353
J. R. Burford, ARC Letcombe Laboratory, Oxfordshire, U.K.
30. Nitrate leaching and chemical decomposition of nitrites in tropical soils . 365
H. Laudelout, Université Catholique de Louvain, Belgium
- Index 369
