

Brief Contents

CHAPTER 1 Introduction	1	PART IV Populations	
PART I Life and the Physical Environment		CHAPTER 13 Population Structures	253
CHAPTER 2 The Physical Environment	24	CHAPTER 14 Population Growth and Regulation	269
CHAPTER 3 Adaptation to Aquatic and Terrestrial Environments	49	CHAPTER 15 Temporal and Spatial Dynamics of Populations	293
CHAPTER 4 Variations in the Physical Environment	73	CHAPTER 16 Population Genetics and Evolution	311
CHAPTER 5 Biological Communities: The Biome Concept	98	PART V Species Interactions	
PART II Ecosystems		CHAPTER 17 Predation and Herbivory	329
CHAPTER 6 Energy in the Ecosystem	125	CHAPTER 18 Dynamics of Predation	346
CHAPTER 7 Pathways of Elements in the Ecosystem	142	CHAPTER 19 Competition	364
CHAPTER 8 Nutrient Regeneration in Terrestrial and Aquatic Ecosystems	161	CHAPTER 20 Coevolution and Mutualism	381
PART III Organisms		PART VI Communities	
CHAPTER 9 Adaptation to Life in Varying Environments	180	CHAPTER 21 Community Structure	399
CHAPTER 10 Life Histories and Evolutionary Fitness	199	CHAPTER 22 Community Development	421
CHAPTER 11 Sex and Evolution	218	CHAPTER 23 Biodiversity	440
CHAPTER 12 Family, Society, and Evolution	237	CHAPTER 24 History and Biogeography	459
		PART VII Ecological Applications	
		CHAPTER 25 Extinction and Conservation	479
		CHAPTER 26 Economic Development and Global Ecology	500
