

CONTENTS

Preface	xi
1. The Composite Structure of Fibrous Material	1
A. Peterlin	
2. Refinement of the Methods for the Determination of Molecular Weight Distributions in Homopolymers	14
G. V. Schulz	
3. Phase Separation in Solutions of Maleic Acid-Alkyl Vinyl Ether Copolymers	31
Philip Lane and Ulrich P. Strauss	
4. Microstructure of Two-Phase Poly(Methyl Methacrylate)s	36
R. P. Kusy and D. T. Turner	
5. Aspects of Liquid-Liquid Phase Transition Phenomena in Multicomponent Polymeric Systems	43
Lee P. McMaster	
6. Quantitative Evaluation of the Dynamic Mechanical Properties of Multiphase Polymer Systems	66
Lothar Bohn	
7. Compatibilization Concepts in Polymer Applications	76
Norman G. Gaylord	
8. Structure and Properties of Random, Alternating, and Block Copolymers: The UV Spectra of Styrene-Methyl Methacrylate Copolymers	85
Bianca M. Gallo and Saverio Russo	
9. Vinylene Carbonate—A Study of Its Polymerization and Copolymerization Behavior	92
M. Krebs and C. Schneider	
10. Process for the Agglomeration of Latex Particles Based on Electrolyte Sensitization	99
Herbert Schlueter	
11. Preparation of Acrylonitrile-Styrene Copolymers by Calorimetrically Controlled Monomer Feeding	115
B. N. Hendy	
12. Aminimides XVI. Copolymerization Studies of Aminimides with 4-Vinylpyridine and N-Vinylpyrrolidone and Use of Copolymers in Adhesive Systems	129
H. J. Langer and B. M. Culbertson	
13. Styrene-Polymer Interaction Parameters in High Impact Polystyrene	141
R. L. Kruse	
14. Crosslinking Reactions in High Impact Polystyrene Rubber Particles	148
Dieter Josef Stein, Gerhard Fahrbach, and Hansjörg Adler	
15. Analytical Study of ABS Copolymers Using a Preparative Ultracentrifuge	159
B. Chauvel and J. C. Daniel	

16. ABS Resins: The Relation between Composition and Rheological Behavior	172
Antonio Casale, Antonino Moroni, and Cesare Spreafico	
17. Grafting Kinetics in the Case of ABS	186
G. Riess and J. L. Locatelli	
18. Properties-to-Composition Relation of ABS Resins by Statistical Analysis	192
Mario Catoni, Giuseppe Pizzigoni, and Isidoro Ronzoni	
19. Graft Copolymers of EPDM Elastomers as Reinforcing Agents for Brittle Thermoplastic Materials	201
F. Severini, A. Pagliari, C. Tavazzani, and G. Vittadini	
20. Grafting of Styrene and Acrylonitrile onto Ethylene Polymers	214
Heinrich Alberts, Herbert Bartl, and Rainer Kuhn	
21. Transparent Acrylic/PVC-Graft/Blend Polymers	231
R. G. Bauer and M. S. Guillo	
22. Rubber-Modified Polymers. Location of Block Copolymers in Two-Phase Materials	243
G. Riess and Y. Jolivet	
23. Creep as Related to the Structure of Block Polymers	257
Lawrence E. Nielsen	
24. Morphology, Crystallization, and Surface Properties of Styrene-Tetrahydrofuran Block Polymers	267
Akira Takahashi and Yuya Yamashita	
25. Domain Structure and Domain Formation Mechanism of ABA and AB Block Copolymers of Ethylene Oxide and Isoprene	288
E. Hirata, T. Ijitsu, T. Soen, T. Hashimoto, and H. Kawai	
26. Poly(α-methylstyrene-dimethylsiloxane) Block Copolymers. The Effects of Microstructure on Properties	300
Andrew H. Ward, Thomas C. Kendrick, and John C. Saam	
27. Block Copolymers of Methyl Methacrylate	309
Raymond B. Seymour, Glenn A. Stahl, Don R. Owen, and Hubert Wood	
28. Polymerization of Cyclic Imino Ethers IX: Surface Properties of Block Copolymers	320
Morton H. Litt and Takehisa Matsuda	
29. Block and Random Copolymerization of Episulfides	330
A. Roggero, A. Mazzei, M. Bruzzone, and E. Cernia	
30. Synthesis and Structure—Property Relations in High Temperature Polymer Systems Based on Aromatic Diamines	343
George L. Brode, James H. Kawakami, George T. Kwiatkowski, and Albert W. Bedwin	
31. The Synthesis and Properties of Multicomponent Crosslinked Polymers	354
C. H. Bamford and G. C. Eastmond	
32. Properties of Compatible Blends of Poly(vinylidene fluoride) and Poly(methyl methacrylate)	371
D. R. Paul and J. O. Altamirano	
33. Fundamental Considerations for the Covulcanization of Elastomer Blends	386
Martin E. Woods and Thomas R. Mass	

34. Dynamic Mechanical and Dielectric Relaxations in Blends of Homopolymers and Block Copolymers	399
U. Mehra, L. Toy, K. Biliyar, and M. Shen	
35. The Role of Filler Modulus and Filler-Rubber Adhesion in Rubber Reinforcement	409
Maurice Morton, R. J. Murphy, and T. C. Cheng	
36. Injection Molding of Glass-Filled Polypropylene: Mold Filling Studies	415
Lawrence R. Schmidt	
37. Concrete-Polymer Composite Materials and Their Potential for Construction, Urban Waste Utilization, and Nuclear Waste Storage	431
Meyer Steinberg	
38. High Temperature Laminating Resins Based on Melt Fusible Polyimides	442
Hugh H. Gibbs and C. V. Breder	
39. Phthalonitrile Resins	458
James R. Griffith, Jacques G. O'Rear, and Theodore R. Walton	
Index	465
