

CONTENTS

Preface	vii
Introduction- Shri Mohan Jain	xv
A. CELL AND TISSUE CULTURE, AND MUTATION INDUCTION	
1. Banana cell and tissue culture – review H. Strosse, I. Van den Houwe, B. Panis	1
2. Cryopreservation of banana tissues: support for germplasm conservation and banana improvement B. Panis, H. Strosse, S. Remy, L. Sagi, R. Swennen	13
3. Mutation induction in <i>Musa</i> – review N.S. Roux	23
4. Usefulness of embryogenic cell suspension cultures for the induction and selection of mutants in <i>Musa</i> spp. N.S. Roux, A. Toloza, J. Dolezel, B. Panis	33
5. Analysis of induced mutants of Philippine bananas with molecular markers D.M. Hautea, G.C. Molina, C.H. Balatero, N.B. Coronado, E.B. Perez, M.T.H. Alvarez, A.O. Canama, R.H. Akuba, R.B. Quilloy, R.B. Frankie, C.S. Caspillo	45
6. Biotechnology and <i>in vitro</i> mutagenesis for banana improvement M. Chai, Y.W. Ho, K.W. Liew, J.M. Asif	59
7. Banana improvement through gamma irradiation and testing for banana bract mosaic virus in Sri Lanka W.K. Hirimburegama, W. K. G. Dias, K. Hirimburegama	79
8. Field evaluation of potential mutants obtained after gamma irradiation of banana and plantain (<i>Musa</i> spp.) shoot-tip and embryogenic cell cultures J. López, J.H. Strosse, J. de la C. Ventura, R. Sánchez, S. Rodríguez, R. Swennen, B. Panis, R. Afza	87
9. Somaclonal variation in banana (<i>Musa acuminata</i> cv. Grande Naine). Genetic mechanism, frequency, and application as a tool for clonal selection E. Khayat, A. Duvdevani, E. Lahav, B.A. Ballesteros	97

97
-petrohaus

10. Banana protoplasts	111
R. Haïcour, A. Assani, K. Matsumoto, A. Guedira	

B. PESTS AND DISEASES

11. Genomics of two banana pathogens: Genetic diversity, diagnostics, and phylogeny of <i>Mycosphaerella fijiensis</i> and <i>M. musicola</i>	127
C.M. Molina, G. Kahl	
12. Towards a molecular understanding of <i>Mycosphaerella</i> /banana interactions	147
P. Balint-Kurti, A.C.L. Churchill	
13. Experimental evidence for the action of <i>M. fijiensis</i> toxins on the banana photosynthesis apparatus	161
J.P. Busogoro, J.J. Etame, G. Harelimana, G. Lognay, J. Messiaen, P. Lepoivre, P. Van Cutsem	
14. Analysis of the mechanisms of action of <i>Mycosphaerella fijiensis</i> toxins during the development of Black leaf streak disease	171
J.P. Busogoro, J.J. Etame, G. Lognay, J. Messiaen, P. Van Cutsem, P. Lepoivre	
15. Development of <i>in vitro</i> techniques for the elimination of cucumber mosaic virus from banana (<i>Musa</i> spp.)	183
B. Helliot, B. Panis, R. Hernandez, R. Swennen, P. Lepoivre, E. Frison	
16. Recent developments in early <i>in vitro</i> screening for resistance against migratory endoparasitic nematodes in <i>Musa</i>	193
A. Elsen, D. De Waele	
17. Lectin binding to the banana-parasitic nematode <i>Radopholus similis</i>	209
N. Wuyts, A. Elsen, E. van Damme, D. De Waele, R. Swennen, L. Sági	
18. Early screening techniques for Fusarium wilt resistance in banana micropropagated plants	219
Mak C., A.A. Mohamed, K.W. Liew, Y.W. Ho	

C. MOLECULAR CYTOGENETICS

19. Molecular cytogenetics and cytometry of banana (<i>Musa</i> spp.)	229
J. Dolezel, M. Valárik, J. Vrána, M.A. Lysák, E. Hribová, J. Bartos, N. Gasmanová, M. Dolezelová, J. Safár, H. Simková	
20. Cytogenetic and cytometric analysis of nuclear genome in <i>Musa</i>	245
J. Dolezel	

- ✓ 21. Detecting ploidy level instability of banana embryogenic cell suspension cultures by flow cytometry 251
N.S. Roux, H. Strosse, A. Toloza, B. Panis, J. Dolezel

D. GENOMICS

22. The banana genome in focus: A technical perspective 263
G. Kahl
23. Molecular characterization of genomes in *Musa* and its applications 271
M. Pillay, A. Tenkouano, G. Ude, R. Ortiz
24. Application of the amplified fragment length polymorphism (AFLP) and the methylation-sensitive amplification polymorphism (MSAP) techniques for the detection of DNA polymorphism and changes in DNA methylation in micropropagated bananas 287
A.C. James, S. Peraza-Echeverria, V. Herrera-Valencia, O. Martinez
25. An ultrasensitive luminescent detection system in banana biotechnology: From promoter tagging to Southern hybridization 307
S. Remy, G. De Weerd, I. Deconinck, R. Swennen, L. Sági
26. Discovery of functional genes in the *Musa* genome 321
E. Khayat
27. Early detection of dwarf off-types in banana (*Musa* spp.) using AFLP, TE-AFLP, and MSAP analysis 331
I. Engelborghs, L. Sági, R. Swennen
28. The global *Musa* genomic consortium: A boost for banana improvement 341
E.A. Frison, J.V. Escalant, S. Sharrock

E. GENETIC TRANSFORMATION AND OTHERS

29. *Agrobacterium*-and particle bombardment-mediated transformation of a wide range of banana cultivars 351
G. Arinaitwe, S. Remy, H. Strosse, R. Swennen, L. Sági
30. Banana improvement with cellular and molecular biology, and induced mutations: Future and perspectives 359
J.V. Escalant, S.M. Jain
- Summary 369
- Abbreviations 377
- Appendix 1 379
