

CONTENTS

INTRODUCTION.....	1	Sulphur	350
SECTION 1. AIDS TO DATA ANALYSIS		Calcium	350
Table 16. The Species for which Media have been used	5	Sodium	350
Table 17. Families and Categories of Included Plant Genera	95	Chloride	351
Table 18. Orders of Included Plant Families	105	Micronutrients.....	351
Table 19. Media used for Different Plant Families within Types of Cultures.....	109	Biochemical Role of Micronutrients	351
Table 20. Media used for Different Types of Cultures within Plant Genera.....	149	Micronutrient Formulations	353
Table 21. Media used for Different Kinds of Culture within Families	207	Vitamins	356
Table 22. Plant Growth Regulators used for Different Kinds of Culture within Families.....	246	Formulations of Vitamins	356
Table 23. The Species and Types of Culture described in Research Papers	285	Amines and Amides.....	360
SECTION 2. THE CONSTITUENTS OF CULTURE MEDIA		Organic Nitrogen Sources.....	360
The Main Components	339	Compositions listed in Tables 10 and 11	361
Macronutrients.....	339	SECTION 3. GENERALISED NUTRIENT FORMULATIONS	
Ionic Balance and Concentration.....	340	Methods of Sampling	365
The Range of Macronutrient Ions used in Media	342	Average Compositions	365
Forms of Nitrogen.....	344	SECTION 4. HISTORICAL ANALYSES	
Phosphate.....	348	The Development of Plant Culture Media	371
Potassium	349	Early Root Culture Media	372
Magnesium.....	349	SECTION 5. MEDIA FOR PARTICULAR PURPOSES	
		Methods of Sampling	377
		Media for Five Types of Culture	377
		Macronutrients.....	378
		Micronutrients	379

Vitamins	380
Amino Acids	381
Standardised Compositions	386

SECTION 6. THE EFFECT OF GENOTYPE

Variations due to Genotype	391
A Study within Three Types of Culture	391
Conclusion	397

SECTION 7. MEDIA PREPARATION

Prepared Mixtures	399
Formulation	399
Sterilisation of Media	400
Addition of Agar	401

SUPPLEMENTARY BIBLIOGRAPHY
