

CONTENTS

The Use of Transmission Electron Microscopy of Ultrathin Sections for the Charac- terization of the Ultrastructure of Normal and Damaged Bacterial Membranes. . . .	1
M.T. Silva	
Techniques for the Localization of Phospho- lipids in Biological Membranes.	37
B. Roelofsen and J.A.F. Op den Kamp	
Phospholipid Organization in the Membranes of Normal and Abnormal Erythrocytes.	51
B. Roelofsen and J.A.F. Op den Kamp	
Studies on the Distribution of Glycosphingolipids in Biomembranes.	65
H. Wiegandt and K. Radsak	
"Fluidity" of Membranes - An MNR Approach	81
I.C.P. Smith	
Membrane Fluidity	111
G. Lenaz	
Hydrophobic Labelling and Cross-Linking of Membrane Proteins.	159
P. Zahler and H. Sigrist	
Membrane-Bound Phospholipases: Properties and Functions	179
P. Zahler, D. Kassermann and M. Reist	
Hydrophobic Ions, Carriers and Pore Formers in Lipid Bilayers as Studied by Fast Kinetic Methods.	193
G. Stark	

Photoreceptor Membrane: Models for Excitable Membranes?	225
F.J.M. Daemen and W.J. de Grip	
Mitochondrial ATPase.	249
L. Ernster	
The Cytochrome Chain of Mitochondria: Electron Transfer Reactions and Transmembrane Translocation	257
S. Papa and M. Lorusso	
Calcium Transport in Synaptosomes and Synaptic Plasma Membrane Vesicles	291
A.P. Carvalho, O.P. Coutinho, V.M.C. Madeira and C.A.M. Carvalho	
Identification of Calcium Channels with Radiolabelled Calcium Blockers.	317
C.A.M. Carvalho and A.P. Carvalho	
Reconstitution of Nerve Membrane Sodium Channels.	343
R. Villegas and G.M. Villegas	
Evolution of Proteins: From Gene Determinism to Cellular Integration	357
R. Acher	
CONTRIBUTORS.	405
