

CONTENTS

Preface	v
Common abbreviations	viii
Chapter 1. Introductory history	1
Chapter 2. Laboratory requirements and general techniques	11
Chapter 3. Tissue culture media	25
Chapter 4. Cell culture	43
Chapter 5. Cellular totipotency	71
Chapter 6. Somatic embryogenesis	91
Chapter 7. Haploid production	113
Chapter 8. Triploid production	143
Chapter 9. Cytogenetic studies	159
Chapter 10. In vitro pollination	181
Chapter 11. Zygotic embryo culture	199
Chapter 12. Protoplast isolation and culture	237
Chapter 13. Somatic hybridization	261
Chapter 14. Production of pathogen-free plants	287
Chapter 15. Clonal propagation	313
Chapter 16. Germplasm storage	373
Glossary of terms commonly used in plant tissue culture	387
References	393
Author index	475
Subject and plant index	488
