Contributors	xi
Preface	
Christopher J. Lamb and Roger N. Beachy	xix
 I. TRANSFORMATION	
The T-Complex of <i>Agrobacterium tumefaciens</i>	
Elizabeth Howard, Vitaly Citovsky, and Patricia Zambryski	1
Diversity of T-DNA Functions Encoding Plant Cell Proliferation in <i>Agrobacterium</i> Pathogenic Plasmids	
Annik Petit, Lori Anne Martin, Mireille Larribe, Jean Brevet, and Jacques Tempé	13
Transformation of Rice and Maize Using the Biolistic Process	
Jun Cao, Yi-Chang Wang, Ted M. Klein, John Sanford, and Ray Wu . . .	21
Discussion Summary: Novel Transformation Technologies	
Edward C. Cocking	35
 II. GENE ISOLATION	
Strategies for Physical Mapping of Complex Genomes Using Cosmid Clones	
Glen A. Evans and Kathryn C. Evans	39
A Novel Strategy Using <i>Ac</i> and <i>Ds</i> for Transposon Tagging in Heterologous Plant Species	
Barbara Baker and Reinhard Hehl	47
Genetic Properties of the Maize Transposon <i>Activator</i> (<i>Ac</i>) in Tobacco	
Jonathan D.G. Jones, F. Carland, L. Harper, E. Lim, and H. Dooner . . .	59
Retrotransposable Elements in <i>Arabidopsis thaliana</i>	
Andrzej Konieczny, Daniel F. Voytas, and Frederick M. Ausubel	65
 III. GENE REGULATION	
Characterization of <i>as-1</i>: A Factor Binding Site on the 35S Promoter of Cauliflower Mosaic Virus	
Eric Lam, Philip Benfey, and Nam-Hai Chua	71
Expression of a Chimeric Polygalacturonase Gene in Transgenic <i>rin</i> (Ripening Inhibitor) Tomato Fruit	
James J. Giovannoni, Dean DellaPenna, Coralie C. Lashbrook, Alan B. Bennett, and Robert L. Fischer	81

Cis-Elements and Trans-Acting Factors for Regulation of the Plant Defense Gene Chalcone Synthase	
R.A. Dixon, M.J. Harrison, S.M. Jenkins, C.J. Lamb, M.A. Lawton, and L. Yu.	101
Molecular Analysis of Gene Regulation in the Anthocyanin Pathway of <i>Zea mays</i>	
Udo Wienand, Javier Paz-Ares, Brian Scheffler, and Heinz Saedler.	111
Manipulation of Flower Pigmentation by the Antisense Strategy	
Joseph Mol, Alexander van der Krol, Anton Gerats, and Antoine Stuitje.	125
Inhibition of Nopaline Synthase and Peroxidase Expression in Tobacco Expressing Antisense RNA	
Steven J. Rothstein, Douglas A. Rice, and L. Mark Lagrimini.	135
Regulation of GUS Expression in Transgenic Plants Using Anti-GUS RNA	
Maura Cannon, Jerry Platz, Maureen O'Leary, Cathleen Cornell, and Frank Cannon.	143
 IV. RECEPTORS AND SIGNAL TRANSDUCTION	
The Fusicoccin Receptor of Higher Plants	
E.W. Weiler, C. Meyer, C. Oecking, M. Feyerabend, and A. Mithöfer. .	153
The Sensitivity of Plant Protoplasts to Auxins: Modulation of Receptors at the Plasmalemma	
H. Barbier-Brygoo, J. Guern, G. Ephritikhine, W.H. Shen, C. Maurel, and D. Klämbt.	165
Molecular Cloning of Plant Transcripts Homologous to Protein Kinases	
Michael A. Lawton, Robert T. Yamamoto, Steven K. Hanks, and Christopher J. Lamb.	175
Chloroplast Biogenesis in <i>Arabidopsis thaliana</i>: A Model Based on Mutant Analysis	
Joanne Chory.	183
Genes Involved in Plant Differentiation: Identification of Gene Families From <i>Zea mays</i> Encoding Auxin-Binding Proteins and the ras-Related YPT Proteins	
Klaus Palme, Thomas Diefenthal, Thomas Hesse, Joachim Feldwisch, and Jeff Schell.	193
 V. PROTEIN ENGINEERING AND TARGETING	
Factors Affecting Physical and Structural Properties of Maize Protein Bodies	
John C. Wallace, Takeshi Ohtani, Craig R. Lending, Mauricio Lopes, John D. Williamson, Katy L. Shaw, Stanton B. Gelvin, and Brian A. Larkins.	205
Mutations Directed at Tyrosine L162 of the Bacterial Photosynthetic Reaction Center	
Raffael V.M. Jovine, Edward J. Bylina, David M. Tiede, and Douglas C. Youvan.	217

Identification of a Vacuolar Targeting Domain Using Transgenic Yeast and Tobacco	
B.W. Tague, C. Dorel, T. Voelker, A. Strum, and M.J. Chrispeels.	225
Targeting of Proteins to Plant Mitochondria	
Udo K. Schmitz, Tony P. Hodge, Elizabeth Walker, and David M. Lonsdale.	237
VI. ENGINEERING STRESS RESISTANCE	
Reversible Inhibition of Hypocotyl Growth in Soybean Seedlings Exposed to Water Deficit	
John E. Mullet.	249
Heavy Metal Resistance in Transgenic Plants Expressing a Human Metallothionein Gene	
Santosh Misra and Lashitew Gedamu.	257
Engineering Enhanced Natural Resistance to Insect Pests - A Case Study	
Donald Boulter, Angharad M.R. Gatehouse, and Vaughan Hilder.	267
Toward a Better Understanding of Coat Protein Mediated Protection	
David M. Stark, James C. Register, III, Ali Nejdat, and Roger N. Beachy.	275
VII. METABOLIC ENGINEERING	
Cloning the mRNA of ACC Synthase	
Athanasios Theologis, Takahide Sato, and Pung-Ling Huang.	289
Strategies for Modifying Plant Lipid Composition	
John Browse, Bertrand Lemieux, Dan Guerra, and Chris Somerville.	301
Genes for Biosynthesis of Stilbene-Type Phytoalexins	
Joachim Schröder, Thomas Lanz, and Gudrun Schröder.	311
Engineering of a New Flower Colour Variety of Petunia	
Peter Meyer, Felicitas Linn, Iris Heidmann, and Heinz Saedler.	319
Recent Developments in Molecular Genetics of Self-Incompatibility	
A.E. Clarke, M.A. Anderson, A. Bacic, P. Ebert, W. Jahnen, M. Lush, S.-L. Mau, G. McFadden, and J.R. Woodward.	327
Index.	335
