

## TABLE OF CONTENTS

- Chapter 1: A Review of General Chemistry: Electrons, Bonds, and Molecular Properties
- Chapter 2: Molecular Representations
- Chapter 3: Acids and Bases
- Chapter 4: Alkanes and Cycloalkanes
- Chapter 5: Stereoisomerism
- Chapter 6: Chemical Reactivity and Mechanisms
- Chapter 7: Substitution and Elimination Reactions of Alkyl Halides
- Chapter 8: Addition Reactions of Alkenes
- Chapter 9: Alkynes
- Chapter 10: Radical Reactions
- Chapter 11: Synthesis
- Chapter 12: Alcohols and Phenols
- Chapter 13: Ethers and Epoxides; Thiols and Sulfides
- Chapter 14: Infrared Spectroscopy and Mass Spectrometry
- Chapter 15: Nuclear Magnetic Resonance Spectroscopy
- Chapter 16: Conjugated Pi Systems and Pericyclic Reactions
- Chapter 17: Aromatic Compounds
- Chapter 18: Aromatic Substitution Reactions
- Chapter 19: Aldehydes and Ketones
- Chapter 20: Carboxylic Acids and Their Derivatives
- Chapter 21: Alpha Carbon Chemistry: Enols and Enolates
- Chapter 22: Amines
- Chapter 23: Organometallic Reactions
- Chapter 24: Carbohydrates
- Chapter 25: Amino Acids, Peptides, and Proteins
- Chapter 26: Lipids
- Chapter 27: Synthetic Polymers
