PREFACE

xiii

1 WATER: AN IMPORTANT AND UNIQUE SUBSTANCE

1

Introduction 1

Water Structure 3

Structure of the Water Molecule, 3 / Hydrogen Bonding, 4

Physical and Chemical Properties of Liquid Water 5

Density, 5 / Melting and Boiling Points, 8 / Heat

Capacity, 9 / Heat of Vaporization, 9 / Surface

*Tension, 9 / Absorption of Radiation, 9 / Water as a
Solvent, 10*

2 THE WATER AND ENERGY CYCLES: OCEANIC AND ATMOSPHERIC CIRCULATION AND THE GREENHOUSE EFFECT

12

Introduction: Major Water Masses 12

The Water Cycle 13

Fluxes between Reservoirs, 13 / Geographic Variations in

*Precipitation and Evaporation, 15 / Origin of Water on the
Earth, 18*

vii

Energy for the Water Cycle: The Energy Cycle	20
<i>Introduction, 20 / Radiation and Energy Balance, 20 /</i>	
<i>Variations in Solar Radiation: The Atmospheric and Oceanic Heat Engine, 24</i>	
Circulation of the Atmosphere	28
Oceanic Circulation	30
<i>Introduction, 30 / Wind-Driven (Shallow) Circulation, 31 /</i>	
<i>Coastal Upwelling, 32 / Thermohaline (Deep) Circulation, 33</i>	
Carbon Dioxide and the Atmospheric Greenhouse	35
<i>Anthropogenic Carbon Dioxide—Present, Past, and Future, 36 /</i>	
<i>Climatic and Hydrologic Effects of CO₂ (and Trace Gas) Increase, 40</i>	

3 RAINWATER AND ATMOSPHERIC CHEMISTRY

47

Introduction	47
Formation of Rain (and Snow)	48
<i>Water Vapor in the Atmosphere, 48 / Condensation, 51 /</i>	
<i>Sublimation, 52 / Rain (and Snow) Formation, 52 / Air Motion in Cloud Formation, 53</i>	
Aerosols	54
<i>Types of Aerosols, 54 / Sea-Salt Particles, 56 / Soil and Mineral Dust—Continental Aerosols, 58 / Volcanic Particles, 59 / Biogenic Aerosols and Aerosols from Forest Burning, 60 / Gaseous Emissions, 60 / Other Anthropogenic Aerosols, 61</i>	
Dry Deposition of Aerosols	61
Chemical Composition of Rainwater: General Characteristics	62
Na ⁺ , Mg ⁺⁺ , K ⁺ , Ca ⁺⁺ , and Cl ⁻ in Rain	70
Gases and Rain	83
<i>Gas-Rainwater Reactions, 83 / Gases and Cl⁻ in Rain, 85</i>	
Sulfate in Rain: The Atmospheric Sulfur Cycle	85
<i>Sea-Salt Sulfate, 86 / Anthropogenic SO₂, 86 / Conversion of Sulfur Dioxide to Sulfate in Rain, 89 / Sulfate from the Natural Biogenic Production of Reduced Sulfur Gases, 92 / Volcanic Sulfur, 94 / Forest Burning, 95 / Soil Dust Sulfate, 95 / Plant Aerosols, 95 / Sulfate Deposition in Rain, 96 / Dry Deposition of Sulfur, 97 / Atmospheric Sulfur Cycle, 98</i>	

Nitrogen in Rain: The Atmospheric Nitrogen Cycle	102
<i>N₂, Nitrogen Fixation, and Total Nitrogen Fluxes, 102 / Organic Nitrogen in Rain, 104 / Nitrate in Rain: Natural Sources, 104 / Nitrate in Rain: Anthropogenic Sources 109 / Nitrate Deposition in Rain and the Nitrate-Nitrogen Cycle, 111 / Ammonium in Rain: Atmospheric Ammonium-Nitrogen Cycle, 113 / (NH₄)₂ SO₄ Aerosol Formation: Interaction of N and S Cycles, 119</i>	

Acid Rain	120
-----------	-----

The pH of Natural Rainwater, 120 / Acid Rain from Pollution, 122 / Problems in Distinguishing Naturally Acid Rain from that Due to Pollution, 129 / Effects of Acid Rain, 131

4 SOIL WATER AND GROUNDWATER: WEATHERING 142

Introduction and Hydrologic Terminology	142
Biogeochemical Cycling in Forests	144
Soil Water and Microorganisms: Acid Production	148
Chemical Weathering	149

Minerals Involved in Weathering, 149 / Mechanism of Silicate Dissolution, 152 / Silicate Weathering Reactions: Secondary Mineral Formation, 155 / Silicate Weathering: Soil Formation, 161 / Carbonate Weathering, 163 / Sulfide Weathering, 164

Groundwaters and Weathering	165
-----------------------------	-----

Garrels' Model for the Composition of Groundwaters from Igneous Rocks, 167 / Origin of Major Constituents of Groundwater: A Summary, 171

5 RIVERS 174

Introduction	174
--------------	-----

River-Water Components, 174 / River Runoff, 175 / Major World Rivers, 176

Suspended Matter in Rivers	178
----------------------------	-----

Total Amount of Suspended Matter, 178 / Human Influence, 183 / Chemical Composition of Suspended Matter, 187

Chemical Composition of Rivers 189

World Average River Water, 189 / Chemical Classification of Rivers, 193

Major Dissolved Components of River Water 205

Chloride and Cyclic Salt, 205 / Sodium, 208 / Potassium, 209 / Calcium and Magnesium, 211 / Bicarbonate (HCO_3^-), 212 / Silica, 214 / Sulfate, 216 / Sulfate Pollution and Acidic Rivers, 218 / Organic Matter, 221

Chemical and Total Denudation of the Continents as Deduced from River-Water Composition 224

Nutrients in River Water 227

Nitrogen in Rivers: The Terrestrial Nitrogen Cycle, 227 / Phosphorus in Rivers: The Terrestrial Phosphorus Cycle, 231

6 LAKES

241

Introduction 241

Physical Processes in Lakes 242

Water Balance, 242 / Thermal Regimes and Lake Classification, 244 / Lake Models, 247

Biological Processes in Lakes as They Affect Water Composition 252

Photosynthesis, Respiration, and Biological Cycling, 252 / Eutrophication, 254 / Limiting Nutrients, 259 / Phosphorus Cycle in Lakes, 262 / Sources of Phosphorus in Lakes, 264

Pollutive Changes in Major Lakes: Potential Loading 268

Acid Lakes 271

Saline and Alkaline Lakes 279

7 MARGINAL MARINE ENVIRONMENTS: ESTUARIES

287

Introduction 287

Estuaries 288

Circulation and Classification, 288 / Estuarine Chemistry: Conservative versus Nonconservative Mixing, 292 / Estuarine Chemical Processes, 295 / Inorganic Removal in Estuaries, 296 / Biogenic Nutrient Removal in Estuaries: Nitrogen and Phosphorus, 301 / Nitrogen, Phosphorus, and Limiting Nutrients, 303 / Biogenic Silica Removal in Estuaries, 306 / Eutrophication and Organic Matter Pollution of Estuaries, 307

Suspended Sediment Deposition in Marginal Marine
Environments 309

Antiestuaries and Evaporite Formation 315

8 THE OCEANS

324

Introduction 324

Chemical Composition of Seawater 325

Modelling Seawater Composition 329

*Sillén's Equilibrium Model, 329 / Oceanic Box Models, 331 /
Continuum Models, 332*

Energy Sources for Chemical Reactions 333

Major Processes of Seawater Modification 334

*Biological Processes, 334 / Volcanic-Seawater Reaction, 346 /
Interaction with Detrital Solids, 351*

Chemical Budgets for Individual Elements 356

*Summary of Processes, 356 / Chloride, 356 / Sodium, 359 /
Sulfate, 361 / Magnesium, 362 / Potassium, 363 /
Calcium, 365 / Bicarbonate, 369 / Silica, 371 /
Phosphorus, 373 / Nitrogen, 376*

INDEX
