

Contents

Preface	v
Contributors	xi
1 Analyses of Ribosome Distribution During In Vitro Translation Sandra L. Wolin	1
2 Allele-Specific Priming in the Mapping of rRNA Stephen Douthwaite	11
3 Permeabilized Mammalian Cells as a System for Protein Synthesis Romualdas Stapulionis and Murray P. Deutscher	23
4 The Measurement of Processivity Errors in Protein Synthesis Hengjiang Dong	33
5 A Biosynthetic Approach for the Incorporation of Unnatural Amino Acids into Proteins Jon S. Thorson, Virginia W. Cornish, Jeannie E. Barrett, Sharon T. Cload, Takato Yano, and Peter G. Schultz	43
6 The Analysis of Translational Activity Using a Reporter Gene Constructed from Repeats of an Antibody-Binding Domain from Protein A Asgeir Björnsson, Salim Mottagui-Tabar, and Leif A. Isaksson ...	75
7 In Vitro Engineering Using Acyl-Derivatized tRNAs Obed W. Odom, Wieslaw Kudlicki, and Boyd Hardesty	93
8 In Vitro Engineering Using Synthetic tRNAs with Altered Anticodons Including Four-Nucleotide Anticodons Gisela Kramer, Wieslaw Kudlicki, and Boyd Hardesty	105
9 Analysis of rRNA Function Using Specialized Ribosomes Marcel F. Brink and Herman A. de Boer	117
10 Determination of the Peptide Elongation Rate In Vivo Michael A. Sørensen and Steen Pedersen	129
11 The Measurement of Missense Errors During In Vivo Protein Synthesis Bernard N. Violand and Gregg Bogosian	143
12 Heelprinting Analysis of In Vivo Ribosome Pause Sites Margaret J. Hollingsworth, Jeong-Kook Kim, and Neil E. Stollar	153

13	Analysis of eIF-2 α Kinases in Yeast Thomas E. Dever	167
14	Continuous-Flow Cell-Free Translation, Transcription-Translation, and Replication-Translation Systems Lyubov A. Ryabova, Igor Yu. Morozov, and Alexander S. Spirin	179
15	Analysis of Translational Activity of Extracts Derived from Oocytes and Eggs of <i>Xenopus laevis</i> Virginia M. Pain, Tina D. Patrick, Richard Cox, and Simon J. Morley	195
16	A Fractionated Reticulocyte Lysate System for Studies on Protein Synthesis Initiation Factors Michael Rau, Theophile Ohlmann, Virginia M. Pain, and Simon J. Morley	211
17	Measurement of Ribosomal Accuracy and Proofreading in <i>E. coli</i> Burst Systems Måns Ehrenberg and Neşe Bilgin	227
18	Measurement of Rate of Protein Synthesis In Vitro: Preparation of <i>Escherichia coli</i> Burst Systems Neşe Bilgin and Måns Ehrenberg	243
19	In Vivo Mutational Analysis of Ribosomal RNA in <i>Saccharomyces cerevisiae</i> Jaap Venema, Rudi J. Planta, and Hendrik A. Raué	257
20	Genetic Selection of rRNA Mutations Steven T. Gregory, Carleen A. Brunelli, J. Stephen Lodmell, Michael O'Connor, and Albert E. Dahlberg	271
21	Toeprinting Assays: Mapping by Blocks to Reverse Transcriptase Primer Extension Steven Ringquist and Larry Gold	283
22	Mapping of Pseudouridine Residues in RNA to Nucleotide Resolution Andrey V. Bakin and James Ofengand	297
23	Chemical and Enzymatic Probing of Antibiotic-Ribosome Complexes Cristina Rodríguez-Fonseca and Roger A. Garrett	311
24	Protein Engineering with Nonstandard Amino Acids Lance E. Steward and A. Richard Chamberlin	325
25	Internal Ribosome Entry Sites Tests with Circular mRNAs Chang-you Chen and Peter Sarnow	355

26	Gel Retardation and UV-Crosslinking Assays to Detect Specific RNA-Protein Interactions in the 5' or 3' UTRs of Translationally Regulated mRNAs James Walker, Osvaldo de Melo Neto, and Nancy Standart.....	365
27	Translational Control by Repressor Proteins Binding to the 5' UTR of mRNAs Nicola K. Gray	379
28	Identification and Analysis of Frameshift Sites Arunachalam Vimaladithan and Philip J. Farabaugh	399
29	Synthesis and Site-Specific Binding of Thioated tRNAs to Probe Ribosome-tRNA Interactions Marylena Dabrowski and Knud H. Nierhaus	413
	Index	427

University Medical Center, Stanford, CA

CARLEEN A. BRUNELLI • Section of Biochemistry, Brown University, Providence, RI

A. RICHARD CHAMBERLIN • Department of Chemistry, University of California, Irvine, CA

CAROL-LOUISE CHOI • Department of Biochemistry, University of Colorado Health Sciences Center

SHARON T. CLOUD • Department of Chemistry, Howard Hughes Medical Institute, University of California, Berkeley, CA

VICTORIA W. CORNILL • Department of Chemistry, University of California, Berkeley, CA

RICHARD COX • School of Biological Sciences, London, UK

MARYLENA DABROWSKI • Max-Planck Institute, Berlin, Germany

JOSEPH E. DAHLING • Section of Biochemistry, Brown University, Providence, RI

HERMAN A. DE ROOS • Center for Molecular and Cellular Biology, University Medical Center, Stanford, CA

MURRAY P. DEUTSCH • Department of Biochemistry, University of Illinois, Urbana, IL

OSVALDO DE MELO NETO • Department of Biochemistry, University of California, Berkeley, CA

THOMAS B. DEVER • Laboratory of Molecular Genetics, National Institute of Health and Human Development, National Institutes of Health, Bethesda, MD
