Preface	vii
Contributors	xiii
1 Biotechnology: Promise or Pitfall JOHN PATRICK JORDAN	1
Part 1 Tissue, Micropropagule and Protoplast Culture	
2 <i>In Vitro</i> Propagation of Conifers ASHA MEHRA-PALTA and DAVID G. THOMPSON	12
3 Comparative Studies Involving <i>In Vitro</i> Propagation of <i>Musa</i> Species from Apical Meristem Slices SETH MANTE	35
4 Temporal, Spatial, and Morphological Aspects of Multiplication in Aseptically Cultured <i>Musa</i> Clones SANDRA S. CRONAUER and A.D. KRIKORIAN	45
Part 2 Genetic and Physiological Studies of Morphogenesis	
5 Isolation of Genes Expressed During Pollen Development JOSEPH P. MASCARENHAS and JEFFREY STINSON	59
6 Control of Soybean Storage Protein Gene Expression by Methionine JOHN F. THOMPSON, JAMES T. MADISON, LORRAINE P. HOLOWACH, and GARY L. CREASON	69
7 The Range of Morphogenetic Responsiveness in Aseptically Cultured Daylily Tissues and Cells A.D. KRIKORIAN, R.P. KANN, S.A. O'CONNOR, M.S. FITTER, S.S. CRONAUER, and D.L. SMITH	82

8	Comparative Growth of Micropropagated <i>Prunus serotina</i> Plantlets and Seedlings in Different Containers ALLAN P. DREW, KATHLEEN L. KAVANAGH, and CHARLES A. MAYNARD	99
9	Application of Immunochemistry to the Synthesis and Turnover of Plant Proteins WILBUR H. CAMPBELL and JILL L. REMMLER	112
Part 3 Genetic Engineering of Plants		
10	The Construction and Use of Cloning Vectors for Genetic Engineering of Plants DANIELA SCIAKY	132
11	Regarding Early Claims of Pollen-Mediated Transformation JOHN C. SANFORD	163
12	Cloning of Single-Copy Fungal Genes NIGEL S. DUNN-COLEMAN, R.H. GARRETT, and R.W.F. HARDY	174
13	Manipulation of Organelle Genomes Through Protoplast Fusion in the Genus <i>Brassica</i> DOMINIQUE ROBERTSON, E.D. EARLE, P.S. JOURDAN, and M.A. MUTSCHLER	197
Part 4 Germplasm Maintenance and Conservation		
14	Cryopreservation of Plant Cells and Organs TONY H.H. CHEN and KUTTY K. KARTHA	217
Part 5 Variability Among Plants Regenerated from Cells and Tissues		
15	Variation Among Plants Regenerated from Protoplasts of a Diploid Daylily MINDY S. FITTER and A.D. KRIKORIAN	242
16	Somaclonal Variation in Corn ELIZABETH D. EARLE, V.E. GRACEN, and M.E. SMITH	257
Part 6 Plant-Microbial Interactions		
17	Bacterial Control of Fungal Root Pathogens THOMAS C. CURRIER	271

18	Symbiotic Functions in <i>Bradyrhizobium japonicum</i> Inoculant Strains ROBERT G. UPCHURCH	283
19	Mycorrhiza Initiation: An Example of Plant-Microbial Interactions YVES PICHÉ and R.L. PETERSON	298
Part 7 Industrial and Commercial Applications		
20	Molecular Biology in Forestry Research: A Review WILLIAM L. OLSEN	315
21	Interactions Between Cloning Success and Forest Tree Improvement CHARLES A. MAYNARD	335
22	Applications of Enzyme-Linked Immunosorbent Assays in Plant Pathology JOHN D. CASTELLO, MARTHA A. FERRIS, and CHERYL M. CRAFT	348
23	Xylanase Enzymes: Potential Applications and Production by <i>Trichoderma longibrachiatum</i> JOHN C. ROYER and J.P. NAKAS	363
24	Bioconversion of Lignocellulose to Food, Fuel, and Chemicals V.R. SRINIVASAN and J.W. CARY	382
25	Artificial Seeds: Encapsulation of Somatic Embryos KEITH REDENBAUGH, DAVID SLADE, PETER VISS, and MARY KOSSLER	400
Appendix: Abstracts of Poster Presentations		420
Author Index		431
Subject Index		445
