

## CONTENIDO

Construction and characterization of new cloning vehicles V. Mobilization and coding properties of pBR322 and several deletion derivatives including pBR327 and pBR328 .....	1
Recombinant plasmids carrying the glutamate dehydrogenase structural gene from <i>Escherichia coli</i> K-12 .....	13
Construction and characterization of new cloning vehicles VI. Plasmid pBR329, a new derivative of pBR328 lacking the 482-base-pair inverted duplication .....	21
Clonación molecular de DNA complementario a RNA mensajero que codifica para preproinsulina de rata .....	33
A new cloning vehicle in which the Cm <sup>r</sup> gene is transcribed from a promoter within the Tc <sup>r</sup> gene .....	52
Evidencias bioquímicas de la presencia del gene estructural de la deshidrogenasa glutámica de <i>E. coli</i> K-12 en plásmidos recombinantes .....	55
Nucleotide sequence of the promoter and amino-terminal coding region of the glutamate dehydrogenase structural gene of <i>Escherichia coli</i> .....	63
Structural organization of the genes that encode two glutamate synthase subunits of <i>Escherichia coli</i> .....	75
Glucosa isomerasa: sobreproducción de la enzima por técnicas de ingeniería genética molecular .....	82
Complete nucleotide sequence of the glutamate dehydrogenase gene from <i>Escherichia coli</i> K-12 .....	94
Construction and characterization of new cloning vehicles VII. Construction of plasmid pBR327 <i>par</i> , a completely sequenced stable derivative of pBR327 containing the <i>par</i> locus of pSC101 .....	101
Clonación de un cDNA de interferón leucocitario humano y su estrategia de producción en <i>E. coli</i> .....	105
Repetitive extragenic palindromic (REP) sequences in the <i>Escherichia coli</i> <i>gdhA</i> gene .....	115

Identification and isolation of human insulin A and B chains by high-performance liquid chromatography . . . . .	125
Influence of regions upstream the promoter for the primer RNA on the copy number and stability of pBR327 derived plasmids . . . . .	134
A common precursor for the two subunits of the penicillin acylase from <i>Escherichia coli</i> ATCC11105 . . . . .	135
Plasmid vector pBR322 and its special-purpose derivatives —a review . . . . .	141
Characterization of the regulatory region of the <i>Escherichia coli</i> penicillin acylase structural gene . . . . .	179
A new expression vector for the production of fused proteins in <i>Echerichia coli</i> . . . . .	183
An analytical HPLC method for the isolation and characterization of insulin . . . . .	189
Deletion of a repetitive extragenic palindromic (REP) sequence downstream from the structural gene of <i>Escherichia coli</i> glutamate dehydrogenase affects the stability of its mRNA . . . . .	199
Determination of the nucleotide sequence for the glutamate synthase structural genes of <i>Escherichia coli</i> K-12 . . . . .	205
The plasmid, pBR322 . . . . .	218
Overproduction of proteins by recombinant DNA: human insulin . . . . .	255
Cloning, sequencing, and expression in ficoll-generated minicells of an <i>Escherichia coli</i> heat-stable enterotoxin gene . . . . .	271
Plasmid pBR322: the multipurpose cloning vector . . . . .	283
Identification of a functional promoter for the <i>Escherichia coli</i> <i>gdhA</i> gene and its regulation . . . . .	287
Amino acid sequence analysis of the glutamate synthase enzyme from <i>Escherichia coli</i> K-12 . . . . .	301
The ribonucleoside diphosphate reductase gene ( <i>nrdA</i> ) of <i>Escherichia coli</i> carries a repetitive extragenic palindromic (REP) sequence in its 3' structural terminus . . . . .	309
Design and construction of expression plasmid vectors in <i>Escherichia coli</i> . . . . .	315
Maximizing the expression of recombinant proteins in <i>Escherichia coli</i> by manipulation of culture conditions . . . . .	339
Preparative isolation by high performance liquid chromatography of human insulin B chain produced in <i>Escherichia coli</i> . . . . .	347
Multipurpose tools in molecular biology . . . . .	360
The role of penicillin amidases in nature and in industry . . . . .	361
Experience in production of recombinant DNA products at the Research Center of Genetic Engineering and Biotechnology, National University of Mexico . . . . .	367

New insights on the comma-less theory .....	373
A general, PCR-based method for single or combinatorial oligonucleotide-directed mutagenesis on pUC/M13 vectors .....	377
Carbon regulation and the role in nature of the <i>Escherichia coli</i> penicillin acylase ( <i>pac</i> ) gene .....	379
Preparative isolation of recombinant human insulin-A chain by ion exchange chromatography .....	387
<i>gltF</i> , a member of the <i>gltBDF</i> operon of <i>Escherichia coli</i> , is involved in nitrogen-regulated gene expression .....	401
Recovery of DNA from agarose gels stained with methylene blue .....	411
Cloning and characterization of cDNAs that code for Na <sup>+</sup> -channel- blocking toxins of the scorpion <i>Centruroides noxius</i> Hoffmann .....	413
Recombinant protein production in cultures of an <i>Escherichia coli</i> <i>trp</i> <sup>-</sup> strain ..	421
Primary structure determination and cloning of the cDNA encoding toxin 4 of the scorpion <i>Centruroides noxius</i> Hoffmann .....	427
The genomic region encoding toxin gamma from the scorpion <i>Tityus serrulatus</i> contains an intron .....	431
Plasmid pBRINT: a vector for chromosomal insertion of cloned DNA .....	435
Kinetic study of penicillin acylase production by recombinant <i>E. coli</i> in batch cultures .....	439
Antisense overlapping open reading frames in genes from bacteria to humans	449
Strategies in the design of a penicillin acylase process .....	455
Production in <i>Escherichia coli</i> of a rat chimeric proinsulin polypeptide carrying human A and B chains and its preparative chromatography .....	467
Cloning of genes encoding scorpion toxins: an interpretative review .....	475
Cloning of the two pyruvate kinase isoenzyme structural genes from <i>Escherichia coli</i> : the relative roles of these enzymes in pyruvate biosynthesis .....	493
A functional Spo0A is required for maximal <i>aprE</i> expression in <i>Bacillus subtilis</i> .....	497
Pathway engineering for the production of aromatic compounds in <i>Escherichia coli</i> .....	501
A pBRINT family of plasmids for integration of cloned DNA into the <i>Escherichia coli</i> chromosome .....	505
Basic and applied aspects of metabolic diversity: the phosphoenolpyruvate node .....	511
Effects of the <i>sinR</i> and <i>degU32</i> (Hy) mutations on the regulation of the <i>aprE</i> gene in <i>Bacillus subtilis</i> .....	517
