

## CONTENTS

### FOREWORD

### PREFACE

### Chapter 1

#### THE CHEMICAL INDUSTRY: ITS PRESENT AND FUTURE PROSPECTS

1.00	Introduction	1
1.01	Some Characteristics of the Chemical Industry	3
1.02	Raw Materials, Energy, and Manpower	9
1.03	The Prices of Chemical Products	16
1.04	Research and Development in the Chemical Industry	21
1.05	The Financial Aspects of the Chemical Business	26
1.06	Future Prospects	31
	References	34

### Chapter 2

#### PRINCIPLES OF ECONOMIC EVALUATION

2.00	Basic Concepts	35
2.01	Gross Income	36
2.02	Capital Invested in Facilities and Working Capital	36
2.03	Income Taxes Levied by Governmental Agencies	37
2.04	Allowable Depreciation for Accounting and Income Tax	38
2.05	Minimum Acceptable Return Rate	43
2.06	Methods for Evaluating Investment Opportunities	44
2.07	The Capital Investment	46
2.08	The Manufactured Cost of the Product	46
2.09	The Net Profit	47
2.10	Cash Position; the Cash Position Diagram	47

2.11 Rate of Return on Investment	48
2.12 Payout Time	49
2.13 Incremental Rate of Return	50
2.14 The Venture Profit Concept	54
2.15 Components of a Process Unit	62
2.16 Applications to Plant Operation	72
Summary	81
References	81
Problems	82
Chapter 3	
<b>EXPANDED ECONOMIC EVALUATION EQUATIONS</b>	<b>89</b>
3.00 The Time Value of Money	89
3.01 The Venture Worth Method	91
3.02 Extended Venture Profit Equation	92
3.03 The Venture Worth Equation	94
3.04 Rate of Return	111
3.05 The Discounted Cash Flow Method	112
3.06 Income-Tax Credit Summations	116
3.07 Declining Gross Return	129
3.08 Termination of Operations	133
3.09 Maximum in Venture Worth as a Criterion of Project Attractiveness	136
3.10 Components of Process Units	138
3.11 Limited Availability of Capital	143
Summary	143
References	143
Problems	146
Chapter 4	
<b>SPECIAL MATHEMATICAL TECHNIQUES</b>	<b>149</b>
4.00 Introduction	149
4.01 General Formulation of Optimum	151
4.02 Complex Relationships:	
The Use of Special Methods	162
4.03 Region Elimination	163
4.04 One Variable at a Time—	
With Graphical Differentiation	167
4.05 The Method of Steepest Ascents or Descents	179
4.06 Optimization Problems Involving Restrictions	184
4.07 Linear Programming	195
4.08 Dynamic Programming	203
References	210

<b>Chapter 5</b>	
<b>NOTES ON COST ESTIMATION</b>	<b>213</b>
5.00 Introduction	213
5.01 Three Steps in Cost Estimation	215
5.02 Equipment Cost Estimation	216
5.03 Precision of Preliminary Cost Estimate	222
5.04 A Compilation of Equipment Cost	222
5.05 Estimating the Final Plant Cost	232
5.06 Sources of Cost Data	242
5.07 The Manufacturing Cost of the Product	244
Summary	254
References	255
Problems	256
<b>Chapter 6</b>	
<b>RISK, RETURN RATE, AND INVESTMENT RECOVERY</b>	<b>259</b>
6.00 Introduction	259
6.01 Risks	259
6.02 Gross Sales Return, $R_k = Q(s - c)$	261
6.03 Total New Capital Investment, $I$	262
6.04 Interest Rates	263
6.05 The Role of Government Policy	265
6.06 Estimated Project Life	266
6.07 Degrees of Risk	267
6.08 Rate of Return	269
6.09 Estimation of the Minimum Acceptable Return Rate, $i_m$	276
6.10 Development Projects	277
6.11 Investment Recovery	279
References	283
Problems	283
<b>Chapter 7</b>	
<b>OVERALL CONSIDERATIONS IN PROJECT ANALYSIS</b>	<b>289</b>
7.00 New Projects	289
7.01 Existing Plants	303
7.02 Replacement of Plant Components	309
7.03 Time Efficiency	317
7.04 Optimum Material Balance	324
7.05 The Use of Computers in Project Analysis	337
Summary	338

References	338
Problems	340
<b>Chapter 8</b>	
<b>PROCESS PLANT COMPONENTS</b>	<b>349</b>
8.00 Introduction	349
8.01 The Optimum Design of Process Piping	350
8.02 The Optimum Design of Heat-Transfer Apparatus	357
8.03 The Optimum Design of Insulation	380
8.04 The Optimum Design of Distillation Columns	385
8.05 The Optimum Design of Gas Absorption Columns	396
8.06 The Optimum Design of Liquid-Liquid and Solid-Liquid Extraction Systems	407
8.07 The Optimum Design of Continuous Direct Contact Rotary Dryers	408
8.08 The Optimum Design of Chemical Reactors	417
References	428
Problems	429
<b>Appendix A</b>	<b>435</b>
<b>SUMMATION OF TIME SERIES</b>	
<b>Appendix B</b>	<b>445</b>
<b>INFLATION</b>	
<b>Appendix C</b>	
<b>RAPID APPROXIMATION METHODS FOR THE</b>	
<b>DESIGN OF CHEMICAL-PROCESS EQUIPMENT</b>	<b>451</b>
<b>INDEX</b>	<b>489</b>
