

Contents

1. General and theoretical aspects of the COOH and COOR groups Massimo Simonetta and Sergio Carrà	1
2. Electrochemical reactions of carboxylic acids and related processes Lennart Eberson	53
3. Alcoholysis, acidolysis and redistribution of esters Jouko Koskikallio	103
4. The formation of carboxylic acids and their derivatives from organometallic compounds R. P. A. Sneed	137
5. Synthesis of di- and polycarboxylic acids and esters V. F. Kuchero and L. A. Yanovskaya	175
6. Acidity and hydrogen bonding of carboxyl groups Lennart Eberson	211
7. Introduction of COOH groups by carbonyl olefination L. D. Bergelson and M. M. Shemyakin	295
8. Rearrangement and cyclization reactions of carboxylic acids and esters Harold Kwart and Kenneth King	341
9. Substitution in the groups COOH and COOR D. P. N. Satchell and R. S. Satchell	375
10. Syntheses and uses of isotopically labelled carboxylic acids Mieczyslaw Zielinski	453
11. Esterification and ester hydrolysis Erkki K. Euranto	505
12. The decarboxylation reaction Louis W. Clark	589
13. Ortho esters E. H. Cordes	623
14. Peracids and peresters Sven-Olov Lawesson and Gustav Schroll	669
15. Thiolo, thiono and dithio acids and esters Matthys J. Janssen	705

16. Directive and activating effects of CO_2H and CO_2R groups in aromatic and aliphatic reactions G. Kohnstam and D. L. H. Williams	765
17. Analysis of carboxylic acids and esters T. S. Ma	871
18. Biological formation and reactions of the $-\text{COOH}$ and $-\text{COOR}$ groups Shawn Doonan	923
