LIST OF CONTRIBUTORS.	v
PREFACE	vii
SYSTEMATICS ASSOCIATION PUBLICATIONS	xi
1 Chemistry in plant taxonomy: an assessment of where we stand	
A. CRONQUIST	1
2 Chemosystematics: perspective, problems and prospects for the zoologist	
C. A. WRIGHT	29
3 New experimental approaches to plant chemosystematics	
J. B. HARBORNE	39
4 Chemical systematics of social insects with particular reference to ants and termites	
P. E. HOWSE and J. W. S. BRADSHAW	71
5 Automatic amino acid analysis data handling	
B. V. CHARLWOOD and E. A. BELL	91
6 Enzymes as a taxonomic tool: a botanist's view	
H. HURKA	103
7 Enzymes as a taxonomic tool: a zoologist's view	
D. ROLLINSON	123
8 A geneticist faced with enzyme variation	
R. J. BERRY	147
9 Fraction I protein and plant phylogeny	
J. C. GRAY	167
10 Haemoglobins and the systematic problems set by Gobioid fishes	
P. J. MILLER, M. Y. EL-TAWIL, R. S. THORPE and C. J. WEBB	195
11 The evaluation of present results and future possibilities of the use of amino acid sequence data in phylogenetic studies with specific reference to plant proteins	
D. BOULTER	235

12 Problems in the use of DNA for the study of species relationships and the evolutionary significance of genomic differences	
G. A. DOVER	241
13 Interpretation and analysis of serological data	
G. CRISTOFOLINI	269
14 The status of immunological distance data in the construction of phylogenetic classifications: a critique	
A. E. FRIDAY	289
15 Classification from chemical data	
J. A. HARRIS and F. A. BISBY	305
16 Micromolecular systematics: principles and practice	
O. R. GOTTLIEB	329
17 Hennig's methods and phytochemistry	
C. J. HUMPHRIES and P. M. RICHARDSON	353
18 The compatibility of occurrence patterns of chemicals in plants	
G. F. ESTABROOK	379
19 Problems in interpreting asymmetrical chemical relationships	
J. C. GOWER	399
20 Analysis of chemical data: a summing up	
P. H. A. SNEATH	411
21 Principles and practice in chemosystematics: a summing up	
K. A. JOYSEY	419
AUTHOR INDEX	427
SUBJECT INDEX	439
