

## CONTENIDO

Presentación . . . . .	<i>xi</i>
Soberón, investigador y promotor de la investigación científica . . . . .	1
Acción antitiroidea del 1-metil-2-mercaptoimidazol, <i>Rev. Invest. Clín.</i> , 3: 317-333, 1951. . . . .	11
Hipertiroidismo y embarazo, <i>Rev. Invest. Clín.</i> , 4: 19-29, 1952.. . . .	31
Hipertiroidismo y drogas de acción antitiroidea, <i>Rev. Invest. Clín.</i> , 4: 209-222, 1952. . . . .	43
Acido úrico y diabetes. Formación de aloxana por leucocitos, <i>Rev. Invest. Clín.</i> , 9: 287-297, 1957. . . . .	57
Hiperbilirrubinemia indirecta sin hiperhemolisis, <i>Rev. Invest. Clín.</i> , 11: 93-105, 1959. . . . .	69
The production of leucocytic exudates in rat granuloma pouch, <i>Proc. Soc. Exp. Biol. Med.</i> , 100: 531-534, 1959. . . . .	85
Changes in effective enzyme concentration in the growing rat liver I. Effects of fasting followed by repletion, <i>J. Biol. Chem.</i> , 235: 1602-1606, 1961. . . . .	93
Changes in effective enzyme concentration in the growing rat liver II. Liver regeneration after partial hepatectomy <i>J. Biol. Chem.</i> , 236: 1607-1610, 1961. . . . .	107
Distribution of an ammonia load in the normal rat, <i>Amer. J. Physiol.</i> , 203: 37-42, 1962. . . . .	117
Liver enzyme activities in ammonia fixation by the rat, <i>Amer. J. Physiol.</i> , 203: 43-48, 1962. . . . .	133

On the activity of deoxyriboaldolase during liver regeneration, <i>Biochim. Biophys. Acta</i> , 61: 451-454, 1962. . . . .	149
Aspectos bioquímicos del hígado regenerado, <i>Rev. Invest. Clín.</i> , 14: 283-296, 1962. . . . .	155
Oxidación del ácido úrico por la mieloperoxidasa de leucocitos, <i>Rev. Soc. Quím. Méx.</i> , 66: 45-51, 1962. . . . .	171
Peroxidatic formation of alloxan from uric acid by leucocytes, <i>Arch. Biochem. Biophys.</i> , 103: 331-337, 1963. . . . .	189
On the mechanism of the effect of ionic strength on crystalline aldolase activity, <i>J. Biol. Chem.</i> , 239: 4154-4158, 1965. . . . .	205
On the metabolic role of $\beta$ -glucuronidase, <i>Biochem. Biophys. Acta</i> , 101: 137-140, 1965. . . . .	219
The regulation of urea-biosynthesis enzymes in vertebrates, <i>Biochem. J.</i> , 96: 28-35, 1965. . . . .	225
Characteristics of arginases from ureotelic and non-ureotelic animals, <i>Biochem J.</i> , 96: 588-594, 1965. . . . .	245
The conversion of ouabain non-sensitive ATPase on the rat erythrocyte into a sensitive enzyme by means of starvation, <i>Fed. Proc.</i> , 24: 670, 1965. . . . .	261
Studies on the oxidation-reduction on systems of the erythrocyte, <i>Biochem. J.</i> , 97: 887-891, 1965. . . . .	263
Active transport and enzymes of the erythrocyte membrane under protein deprivation, <i>Biochem. J.</i> , 97: 892-896, 1965. . . . .	277
Factores químicos que modifican la información genética, <i>Excerpta Medica Internacional Congress</i> <i>Series No. 127: 65-75, 1966.</i> . . . . .	287

Characteristics of aspartate aminotransferase isozymes of a rat and chicken livers, <i>Arch. Biochem. Biophys.</i> , 120: 175-185, 1967.. . . . .	309
Characteristics of the ureotelic arginase and its role in the advent of ureotelism during the metamorphosis of the Mexican axolotl, <i>Nat. Cancer Ins. Monogr.</i> , 27: 283-295, 1967.. . . . .	327
Liver enzymatic activities in the ammonia fixations by the human being, <i>Bol. Estud. Méd. Biol. Méx.</i> , 25: 73-82, 1968. . . . .	343
¿Qué hay detrás de lo aparente? <i>Gac. Méd. Méx.</i> 98(7): 809-817, 1968.. . . . .	359
The role of liver arginase of the Mexican axolotl in the advent of ureotelism, <i>Fed. Proc.</i> , 27: 335, 1968. . . . .	371
Studies on the advent of ureotelism. Factors that render the hepatic arginase of the Mexican axolotl able to hydrolyse endogenous arginine, <i>Biochem. J.</i> , 110: 425-433, 1968. . . . .	373
Biología y patología de las enzimas II. Génesis y regulación de las enzimas, <i>Gac. Méd. Méx.</i> , 99(6): 559-562, 1969. . . . .	391
Urea biosynthesis. An experimental model for the study of the integration of a metabolic cycle during biological evolution. A review, <i>Bol. Estud. Méd. Méx.</i> , 26: 15-33, 1969.. . . . .	397
Studies on the advent of ureotelism. The effects of divalent cations on the capacity of the hepatic arginase of the Mexican axolotl to hydrolyse endogenous arginine <i>Biochem. J.</i> , 114: 449-454, 1969.. . . . .	429
The effect of divalent cations on the hydrolysis of endogenous arginine, <i>Fed. Proc.</i> , 28: 886, 1969. . . . .	443

Preferential hydrolysis of endogenous arginine by rat liver arginase, <i>Biochem. Biophys. Res. Commun.</i> , 38(3): 438-443, 1970. . . . .	445
Intervening factors in the preferential hydrolysis of endogenous arginine by rat liver arginase, <i>Fed. Proc.</i> , 29: 914, 1970. . . . .	451
The physiological significance of tissue enzyme activities as affected by diet, <i>Bol. Estud. Méd. Biol. Méx.</i> 27:19-49, 1971. . . . .	453
La regulación de las funciones celulares, <i>Gac. Méd. Méx.</i> , 102: 159-292, 1971. . . . .	505
Molecular form of rat-liver arginase. Isolation and characterization, <i>Europ. J. Biochem.</i> 49: 457-467, 1974. . . . .	549
Arginase, <i>The Urea Cycle</i> , 1976. . . . .	573
Studies on the advent of ureotelism. Hydrolysis of endogenous and exogenous arginine by rat liver arginase, <i>Bol. Estud. Méd. Biol. Méx.</i> , 28: 391-401, 1976 . . . . .	591
Índice de nombres. . . . .	609
