

Table of Contents

1	Introduction	1
2	Fundamentals	2
	Cash Flows	2
	Inflation Rates	2
	Time Points and Periods	4
	Discount Rates	5
	Cost of Capital	9
	Present Value	12
	Taxes	14
	Fixed Charge Rate	22
	Financing	24
	Investor Perspective	26
	Uncertainty and Risk	27
3	Selection Criteria Guide	35
	Explanations for the Economic Evaluation Measures Matrix	35
4	Economic Measures	39
	Net Present Value	39
	Total Life-Cycle Cost	42
	Revenue Requirements	46
	Levelized Cost of Energy	47
	Annualized Value	51
	Internal Rate of Return	52
	Modified Internal Rate of Return	54
	Simple Payback Period	56
	Discounted Payback Period	57
	Benefit-to-Cost Ratios	58
	Savings-to-Investment Ratios	61
	Integrated Resource Planning/Demand-Side-Management Ratio Tests	62
	Consumer/Producer Surplus	69
5	Special Considerations for Energy Efficiency and Renewable Energy Systems	73
	System Boundaries	73
	Sizing a System	73
	Externalities	73
	Government Investments	74
	Backup and Hybrid Systems	74
	Storage	75
	Operation and Maintenance	76
	Capacity and Energy Value	77

Table of Contents (Concluded)

Major Repairs and Replacements	79
Salvage Value	79
Unequal Lifetimes	79
Retrofits	80
Incorporating Electric Utility Rates in an Analysis	81
6 References	83
7 Bibliography	86
Glossary	87
Appendices	
Appendix A: Selected Inflation Indices	A-1
Appendix B: Escalation (De-escalation) Factors	B-1
Appendix C: Real Weighted Average Cost of New Capital 1976-1989	C-1
Appendix D: Amortization Formulas	D-1
Appendix E: Monthly and Continuous Discount Rates	E-1
Appendix F: Capital Requirements	F-1
Appendix G: Retrofits	G-1
Appendix H: Documentation of Evaluation Software	H-1
