

TABLE OF CONTENTS

FOREWORD (by the Secretariat)	9
I. Scope and Aims	9
II. The Questionnaire Approach	12
Notes and References	13

Part One

PATENTS IN A TIME OF RAPID SCIENTIFIC AND TECHNOLOGICAL CHANGE: INVENTIONS IN BIOTECHNOLOGY (by F.K. Beier and J. Straus)	15
I. Introduction	15
II. The Objectives of the Patent System	17
III. Basic Principles of Patent Law	18
IV. Biotechnological Inventions and Patent Law – A Retrospect	21
1. General Considerations	21
2. Scientific Development	21
3. Legal Development	22
a) Germany	22
b) United States	25
V. Reflections on International Legal Development	26
Notes and References	30

Part Two

PATENT PROTECTION IN BIOTECHNOLOGY: QUESTIONS, ANSWERS AND OBSERVATIONS (by R.S. Crespi)	36
Methodology	36
I. The Adequacy of the Patent System and its Alternatives	37
1. Questions	37
2. Background	38
3. Official Responses	38
4. Responses from Interested Circles	39
5. Observations	40
II. General Requirements of Patent Law	41
1. Questions	41
2. Background	42
a) Novelty	42
b) Inventive Step	43
c) Utility (or Industrial Applicability)	44
d) Sufficiency of the Description	44
3. Official Responses	44
4. Responses from Interested Circles	46
5. Observations	46

III. The Patentability of Micro-organisms	48
1. Questions	48
2. Background	48
3. Official Responses	50
a) Micro-organism Claims	50
b) Characterisation and Repeatability	52
c) Scope of Claim	53
4. Responses from Interested Circles	54
5. Observations	54
IV. The Deposition of Micro-organisms in Culture Collections for Patent Purposes	56
1. Questions	56
2. Background	56
a) United States Developments	57
b) The First Statutory Rule: European Patent Convention	58
c) Japanese and Netherlands Practice	59
d) The Budapest Treaty	59
e) The Amendment of EPC Rule 28	60
f) Summary	61
3. Official Responses	62
a) Non-European Countries	62
b) EPC Countries	63
c) European Countries outside EPC	64
4. Responses from Interested Circles	64
5. Observations	65
V. Legal Protection for Plants and other Higher Organisms	66
1. Questions	66
2. Background	67
a) The Legal Protection of New Plants	67
b) Plant Variety Rights	68
3. Official Responses	68
4. Responses from Interested Circles	69
5. Observations	70
VI. Inanimate Products of Nature	71
1. Question	71
2. Official Responses	71
3. Observations	72
VII. Patent Office Practice	72
1. Questions	72
2. Background	72
3. Official Responses	73
4. Responses from Interested Circles	74
5. Observations	74
VIII. Infringement Problems	75
1. Questions	75
2. Background	75
3. Official Responses	75
4. Responses from Interested Circles	76
5. Observations	77

IX. User Attitudes towards the Patent System	77
1. Questions	77
2. Background	78
3. Official Responses	79
4. Responses from Interested Circles	80
5. Observations	81
X. Harmonization of Patent Laws	84
1. Questions	84
2. Background	85
3. The Responses	85
Notes and References	86

Part Three

CONCLUSIONS AND RECOMMENDATIONS (by the Group of Experts)	87
I. Summary and General Postulates	87
II. Specific Recommendations	90

ANNEXES

A. LISTS OF EXPERTS AND OBSERVERS	90
I. Experts and Observers on Patent Protection in Biotechnology	94
II. Experts on Patents in Biotechnology and the Scientific Community	95
B. THE OECD QUESTIONNAIRE	97
C. SELECTED COURT DECISIONS	100
D. INTERNATIONAL CONVENTIONS	106
E. AN INTERNATIONAL BIBLIOGRAPHY	110
