PREFACE	ix
ACKNOWLEDGEMENTS	xi
1. ENERGY ECONOMICS: AN INTRODUCTORY SURVEY	1
1.1 SOME BASIC IDEAS	2
1.2 UNITS AND HEAT EQUIVALENTS	10
1.2.1 Exercises.....	15
1.3 MORE BASIC IDEAS	16
1.4 CONCLUSIONS	19
1.4.1 Exercises.....	20
1.4.2 Answer Quickly and Briefly.....	21
2. DISCOUNTING AND CAPITAL VALUES	23
2.1 FIRST PRINCIPLES	23
2.1.1 Exercises.....	26
2.2 A VERY SMALL OIL WELL	26
2.2.1 Exercises.....	30
2.3 ANNUITIES	31
2.3.1 Exercises.....	35
2.4 SOME COMMENTS ON CAPITAL VALUES	35
2.4.1 Exercises.....	38
2.5 DEPLETION	38
2.5.1 Exercises.....	41
2.6 CONCLUSIONS	41
3. THE WORLD OIL MARKET	43
3.1 SOME BACKGROUND FOR STUDYING THE RUN-UP TO THE OIL MARKET ENDGAME	45
3.2 THE RESERVE-PRODUCTION RATIO	50
3.2.1 Exercises.....	55
3.3 OIL SUPPLY AND DEMAND, AND THE RESERVE-PRODUCTION RATIO	56

3.4	A NON-TECHNICAL PREVIEW OF THE OIL FUTURES MARKET	59
3.4.1	Exercises.....	63
3.5	OIL STOCKS AND OIL PRICES	63
3.5.1	Exercises.....	70
3.6	CONCLUSIONS	71
3.6.1	Exercises.....	72
3.7	APPENDIX: THE DOMESTIC INDUSTRIALIZATION OF HYDROCARBONS	72
4.	A FUEL OF THE FUTURE: NATURAL GAS	75
4.1	GEOLOGY, UNITS, AND SOME ECONOMICS	75
4.2	ECONOMIC THEORY AND NATURAL GAS: AN INTRODUCTION	81
4.2.1	Exercises.....	94
4.3	REGULATION AND DEREGULATION	95
4.3.1	Exercise.....	98
4.4	MARGINAL COSTS AND PEAK LOAD PRICING	98
4.4.1	Exercises.....	110
4.5	CONCLUSIONS	110
4.5.1	Exercise.....	111
5.	SOME ASPECTS OF THE WORLD COAL MARKET	113
5.1	INTRODUCING COAL SUPPLY AND DEMAND	115
5.2	SUPPLY AND COST	118
5.3	SOME THEORETICAL ASPECTS OF COAL AND THE ENVIRONMENT	121
5.3.1	Exercises.....	128
5.4	COAL AND CO ₂	129
5.5	CONCLUSIONS	132
5.6	APPENDIX: SOME TRANSPORTATION ECONOMICS	133
6.	ENERGY DERIVATIVES: FUTURES, OPTIONS, AND SWAPS	137
6.1	FUTURES MARKETS: TERMINOLOGY AND NOMENCLATURE	137
6.2	FURTHER MECHANICS OF HEDGING AND SPECULATION	143
6.3	BASIS RISK	146
6.3.1	Exercises.....	147
6.4	AN OPTIONS FABLE	148
6.4.1	Exercises.....	153
6.5	THE SIMPLE ALGEBRA OF OPTIONS	153
6.5.1	Exercises.....	158
6.6	A COMMENT ON THE OPTION PRICE	158
6.7	OIL SWAPS	161
6.8	CONCLUSIONS	170
6.9	APPENDIX	170

6.9.1 A-1. A Simple Futures Market	170
6.9.2 A-2. Rolling a Hedge Forward	172
6.9.3 Exercise	174
7. ELECTRICITY AND ECONOMICS	175
7.1 SOME INTRODUCTORY REMARKS	176
7.1.1 Exercises.....	180
7.2 DAILY LOAD CURVES AND LOAD DURATION CURVES	180
7.2.1 Exercises.....	186
7.3 THE ECONOMICS OF LOAD DIVISION	186
7.3.1 Exercises.....	193
7.4 SOME FINAL OBSERVATIONS ON ELECTRICITY TARIFFS	193
7.5 CONCLUSIONS	197
8. URANIUM, NUCLEAR ENERGY, AND AN INTRODUCTION TO INTERTEMPORAL PRODUCTION THEORY	199
8.1 SOME NUCLEAR BACKGROUND	201
8.2 SOME INTERTEMPORAL COST AND PRODUCTION THEORY	207
8.2.1 Exercises.....	218
8.3 A FEW BAD NUCLEAR VIBRATIONS AND A COMMENT ON OPTION THEORY	218
8.4 CONCLUSION	227
9. ADDITIONS, EXTENSIONS AND FINAL REMARKS	229
9.1 THE HOTELLING HYPOTHESIS EXAMINED GRAPHICALLY	230
9.1.1 Exercises.....	236
9.2 CONVENIENCE YIELD	236
9.2.1 Exercises.....	240
9.3 ANALYTICAL ODDS AND ENDS: A STATISTICAL OBSERVATION; THE WINNER'S CURSE; AND REAL OPTIONS	240
9.3.1 Exercises.....	242
9.4 CONCLUSION: FROM THE 20 TH TO THE 21 ST CENTURY	246
10. APPENDIX	251
A.1 EXTRA QUESTIONS	251
A.2 ANSWERS AND PARTIAL ANSWERS TO SELECTED EXERCISES.	254
A.3 GLOSSARY	259
A.4 REFERENCES	268
11. INDEX	273
