CONTENTS

Foreword *page* xi

Preface xv

1 INTRODUCTION 1

A Controversial Idea 3
The AAAS Vision of Science 5
Primary and Secondary Benefits 7
Beyond the Basics 10
A Timely Opportunity 13
Personal Experience 15
Summary 19

2 SCIENCE IN PERSPECTIVE 21

Science as a Liberal Art 21
Four Bold Claims 27
A Brief History of Truth 40
Summary 72

3 SCIENCE WARS 74

Auditors and Attitudes 74
Four Deadly Woes 78
Reactions from Scientists 89
Two Rules of Engagement 105
Summary 110

4 SCIENCE'S PRESUPPOSITIONS 112

Historical Perspective on Presuppositions 113
The PEL Model of Full Disclosure 124
What Are Presuppositions? 131

Disclosure of Presuppositions 134
Sensible Questions 143
Science's Credibility and Audience 147
Science's Realism and Faith 150
A Reflective Overview 153
Summary 154

5 DEDUCTIVE LOGIC 156

Deduction and Induction 157
Historical Perspective on Deduction 160
Elementary Propositional Logic 165
Formal Propositional Logic 171
Predicate Logic 173
Arithmetic 175
Common Fallacies 178
Material Logic 187
Summary 189

6 PROBABILITY 191

Probability Concepts 192
Two Fundamental Requirements 197
Eight General Rules 198
Probability Axioms and Rules 199
Probability Theorems 204
Bayes's Theorem 207
Permutations and Combinations 210
Common Blunders 211
Summary 215

7 INDUCTIVE LOGIC AND STATISTICS 217

Awesome Responsibilities 217
Induction and Deduction 218
Historical Perspective on Induction 219
Presuppositions of Induction 225
Bayesian Example 226
Bayesian Inference 232
Bayesian Decision 240
The Frequentist Paradigm 245
Paradigms and Questions 257
Induction Lost 264
Induction Regained 266
Summary 268

8 PARSIMONY AND EFFICIENCY

Historical Perspective on Par
Preview of Basic Principles
Example 1: Mendel's Peas
Example 2: Cubic Equation
Example 3: Equivalent Cond
Example 4: Crop Yields
Explanation of Accuracy Ga
Efficiency and Economics
Philosophical Perspective on
Summary

9 CASE STUDIES

Intuitive Physics
Parsimony and Physics
by Millard Baublitz
Molecule Shape and Drug D
with P. Andrew Karplus
Electronics Testing
Statistics in Medicine
Discussion

10 SCIENCE'S POWERS AND LIM

Obvious Limitations
Science and Its Precondition
Science and Worldviews
Personal Rewards from Scie
Summary

11 SCIENCE EDUCATION

Six Benefits
The Good, the Bad, and the
Constructivism in the Third
A Modest Experiment
Future Prospects
Summary

12 CONCLUSIONS
