Contents

Preface	ix
Editors	xiii
Contributors	xv
I Polypropylene: Catalysts and Mechanism	1
Chapter 1 Isotactic Polypropylene from C ₂ - and Pseudo-C ₂ -Symmetric Catalysts	3
<i>Reko Leino and Shirley Lin</i>	
Chapter 2 Fluorenyl-Containing Catalysts for Stereoselective Propylene Polymerization	37
<i>Craig J. Price, Levi J. Irwin, David A. Aubry, and Stephen A. Miller</i>	
Chapter 3 Substituted Indenyl and Cyclopentadienyl Catalysts for Stereoselective Propylene Polymerization	83
<i>John J. Esteb</i>	
Chapter 4 Doubly Bridged Metallocenes for Stereoselective Propylene Polymerization	101
<i>Deanna L. Zubris</i>	
Chapter 5 Metallocenes with Donor/Acceptor and Other Heteroatom Bridges for Stereoselective Propylene Polymerization	135
<i>Pamela J. Shapiro</i>	
Chapter 6 Stereoselective Propylene Polymerization with Early and Late Transition Metal Catalysts	157
<i>Haruyuki Makio and Terunori Fujita</i>	
Chapter 7 Catalyst Structure and Polymer Tacticity: The Theory Behind Site Control in Propylene Polymerization	169
<i>Anthony K. Rappé, Oleg G. Polyakov, and Lynn M. Bormann-Rochotte</i>	
II Polypropylene: Applications of Tacticity	201
Chapter 8 Stereoblock Polypropylene	203
<i>Vincenzo Busico</i>	
Chapter 9 Elastomeric Homo-Polypropylene: Solid State Properties and Synthesis via Control of Reaction Parameters	231
<i>Sabine Hild, Cecilia Cobzaru, Carsten Troll, and Bernhard Rieger</i>	

Chapter 10	Control of Molecular Weight and Chain-End Group in Tactic Polypropylenes Using Chain Transfer Agents	273
	<i>T. C. Chung</i>	
Chapter 11	Functionalization of Tactic Polypropylenes	297
	<i>Manfred Bochmann</i>	
Chapter 12	Influence of Tacticity of Propylene Placement on Structure and Properties of Ethylene/Propylene Copolymers	313
	<i>Maurizio Galimberti and Gaetano Guerra</i>	
III	Other Monoolefin Monomers	343
Chapter 13	Stereocontrol in the Polymerization of Higher α -Olefin Monomers	345
	<i>Moshe Kol, Sharon Segal, and Stanislav Groysman</i>	
Chapter 14	Tactic Polystyrene and Styrene Copolymers.....	363
	<i>Haiyan Ma and Jiling Huang</i>	
Chapter 15	Cyclopentene Homo- and Copolymers Made with Early and Late Transition Metal Catalysts.....	399
	<i>Naofumi Naga</i>	
Chapter 16	Tactic Norbornene Homo- and Copolymers Made with Early and Late Transition Metal Catalysts	413
	<i>Walter Kaminsky and Michael Arndt-Rosenau</i>	
IV	Diene Monomers and Olefin-Containing Polymers	445
Chapter 17	The Stereoselective Polymerization of Linear Conjugated Dienes	447
	<i>Antonio Proto and Carmine Capacchione</i>	
Chapter 18	The Stereoselective Polymerization of Cyclic Conjugated Dienes	475
	<i>Mitsuru Nakano</i>	
Chapter 19	Tactic Nonconjugated Diene Cyclopolymerization and Cyclocopolymerization	489
	<i>Il Kim</i>	
Chapter 20	Stereochemistry of Polymers Formed by Metathesis Polymerization of Bicyclic and Polycyclic Olefins	509
	<i>Darragh Breen, Katherine Curran, and Wilhelm Risse</i>	
Chapter 21	Stereoregularity of Polyacetylene and Its Derivatives	553
	<i>Toshio Masuda, Masashi Shiotsuki, and Junichi Tabei</i>	
V	Functional and Non-Olefinic Monomers	575
Chapter 22	Tacticity in Ethylene/Carbon Monoxide/Vinyl Co- and Terpolymerizations.....	577
	<i>Kyoko Nozaki</i>	

Chapter 23	Stereoselective Polymerization
	<i>Edward L. Meehan</i>
Chapter 24	Discrete Catalysts
	<i>Hiroharu Akiyama</i>
Chapter 25	Stereoselective Polymerization
	<i>Malcolm H. Plesch</i>
