Contents

	Preface	XI
	Resume	XIII
Chapter 1	Introduction to Composite Materials and Processes	
1.1	Laminates	3
1.2	Fibers	5
1.3	Matrices	9
1.4	Product Forms	12
1.5	Overview of Fabrication Processes	17
1.6	Advantages and Disadvantages of Composites	25
1.7	Applications	32
1.8	Summary	35
1.9	Acknowledgement	35
1.10	References	37
Chapter 2	Fibers and Reinforcements	
2.1	Fiber Terminology	40
2.2	Glass Fibers	41
2.3	Aramid Fibers	44
2.4	Ultra-High Molecular Weight Polyethylene (UHMWPE) Fibers	45
2.5	Carbon and Graphite Fibers	46
2.6	Woven Fabrics	49
2.7	Reinforced Mats	54
2.8	Chopped Fibers	55
2.9	Prepreg Manufacturing	56
2.10	Summary	61
2.11	References	62

Chapter 3	Thermoset Resins				
3.1	Thermosets	65		6.5	Net and Low Flow
3.2	Polyester Resins	66		6.6	Resin and Prepreg
3.3	Epoxy Resins	67		6.7	Lay-Up Variables
3.4	Bismaleimide Resins	76		6.8	Debulking Operat
3.5	Cyanate Ester Resins	78		6.9	Caul Plates and Pr
3.6	Polyimide Resins	79		6.10	Condensation Cur
3.7	Phenolic Resins	82		6.11	Residual Curing S
3.8	Toughening Approaches	83		6.12	Exotherm
3.9	Physiochemical Characterization and Quality Control	91		6.13	In-Process Cure M
3.10	Chemical Testing	91		6.14	Cure Modeling
3.11	Rheological Testing	93		6.15	Summary
3.12	Thermal Analysis	95		6.16	References
3.13	Glass Transition Temperature	96		Chapter 7	The Interaction of Chemical C
3.14	Summary	99			on Laminate Quality
3.15	References	100		7.1	Prepreg Physical P
Chapter 4	Cure Tooling			7.2	Chemical Properti
4.1	General Considerations	104		7.3	Thermal Propertie
4.2	Thermal Management	110		7.4	Rheological Prope
4.3	Tool Fabrication	118		7.5	Laminate Evaluat
4.4	Summary	129		7.6	Summary
4.5	References	130		7.7	References
Chapter 5	Ply Collation			Chapter 8	Adhesive Bonding and Integral
5.1	Prepreg Control	132		8.1	Adhesive Bonding
5.2	Tool Preparation	133		8.2	Advantages of Ad
5.3	Manual Lay-Up	134		8.3	Disadvantages of
5.4	Ply Collation	138		8.4	Theory of Adhesio
5.5	Flat Ply Collation and Vacuum Forming	141		8.5	Joint Design
5.6	Automated Tape Laying	144		8.6	Adhesive Testing
5.7	Filament Winding	148		8.7	Surface Preparatio
5.8	Fiber Placement	158		8.8	Epoxy Adhesives
5.9	Vacuum Bagging	163		8.9	Bonding Procedur
5.10	Summary	171		8.10	Sandwich Structur
5.11	References	173		8.11	Honeycomb Core
Chapter 6	Curing			8.12	Honeycomb Proce
6.1	Cure of Epoxy Composites	180		8.13	Balsa Wood
6.2	Theory of Void Formation	184		8.14	Foam Cores
6.3	Hydrostatic Resin Pressure Studies	190		8.15	Syntactic Core
6.4	Chemical Composition Variables	198		8.16	Inspection
				8.17	Integrally Cocured
				8.18	Summary
				8.19	References

ns	65	6.5	Net and Low Flow Resin Systems	199
ins	66	6.6	Resin and Prepreg Variables	200
	67	6.7	Lay-Up Variables	201
	76	6.8	Debulking Operations	203
	78	6.9	Caul Plates and Pressure Intensifiers	206
	79	6.10	Condensation Curing Systems	207
	82	6.11	Residual Curing Stresses	210
atches	83	6.12	Exotherm	217
aracterization and Quality		6.13	In-Process Cure Monitoring	218
	91	6.14	Cure Modeling	219
	91	6.15	Summary	219
g	93	6.16	References	220
emperature	95	Chapter 7	The Interaction of Chemical Composition and Processing on Laminate Quality	
	96	7.1	Prepreg Physical Properties	226
	99	7.2	Chemical Properties	227
	100	7.3	Thermal Properties	229
		7.4	Rheological Properties	230
tions	104	7.5	Laminate Evaluations	231
ent	110	7.6	Summary	238
	118	7.7	References	239
	129	Chapter 8	Adhesive Bonding and Integrally Cocured Structures	
	130	8.1	Adhesive Bonding	242
		8.2	Advantages of Adhesive Bonding	242
	132	8.3	Disadvantages of Adhesive Bonding	244
	133	8.4	Theory of Adhesion	244
	134	8.5	Joint Design	245
nd Vacuum Forming	138	8.6	Adhesive Testing	250
aying	141	8.7	Surface Preparation	251
	144	8.8	Epoxy Adhesives	258
	148	8.9	Bonding Procedures	262
	158	8.10	Sandwich Structures	267
	163	8.11	Honeycomb Core	269
	171	8.12	Honeycomb Processing	277
	173	8.13	Balsa Wood	285
		8.14	Foam Cores	285
posites	180	8.15	Syntactic Core	288
mation	184	8.16	Inspection	289
Pressure Studies	190	8.17	Integrally Cocured Structure	290
ion Variables	198	8.18	Summary	298
		8.19	References	299

Chapter 9 Liquid Molding

9.1	Preform Technology	306
9.2	Fibers	307
9.3	Woven Fabrics	308
9.4	Three-Dimensional Woven Fabrics	309
9.5	Knitted Fabrics	311
9.6	Stitching	312
9.7	Braiding	314
9.8	P4A Process	320
9.9	Random Mat	322
9.10	Preform Advantages	323
9.11	Preform Disadvantages	325
9.12	Integral Structures Made by Textile Processes	325
9.13	Preform Lay-Up	327
9.14	Resin Injection	331
9.15	Curing	335
9.16	RTM Tooling	336
9.17	Resin Transfer Molding Defects	338
9.18	Resin Film Infusion	341
9.19	Vacuum Assisted Resin Transfer Molding	349
9.20	Summary	354
9.21	References	355

Chapter 10 Thermoplastic Composites

10.1	The Case for Thermoplastic Composites	358
10.2	Thermoplastic Composite Matrices	360
10.3	Product Forms	368
10.4	Consolidation	369
10.5	Thermoforming	379
10.6	Joining	390
10.7	Summary	395
10.8	References	396

Chapter 11 Commercial Processes

11.1	Lay-Up Processes	400
11.2	Compression Molding	412
11.3	Injection Molding	420
11.4	Structural Reaction Injection Molding	430
11.5	Pultrusion	432
11.6	Summary	437
11.7	References	437

Chapter 12 Assembly

12.1	Trimming and Ma
12.2	General Assembl
12.3	Hole Drilling
12.4	Fastener Installat
12.5	Sealing
12.6	Painting
12.7	Summary
12.8	References

Chapter 13 Nondestructive Inspection and

13.1	Nondestructive In
13.2	Visual Inspection
13.3	Ultrasonic Inspect
13.4	Portable Equipme
13.5	Radiographic Insp
13.6	Thermographic In
13.7	Repair
13.8	Fill Repairs
13.9	Injection Repairs
13.10	Bolted Repairs
13.11	Bonded Repairs
13.12	Summary
13.13	References

Appendix A- Metric Conversions

	306	Chapter 12 Assembly	
	307	12.1 Trimming and Machining Operations	440
	308	12.2 General Assembly Considerations	445
Woven Fabrics	309	12.3 Hole Drilling	448
	311	12.4 Fastener Installation	457
	312	12.5 Sealing	467
	314	12.6 Painting	468
	320	12.7 Summary	469
	322	12.8 References	469
	323	Chapter 13 Nondestructive Inspection and Repair	
es	325	13.1 Nondestructive Inspection	473
ade by Textile Processes	325	13.2 Visual Inspection	473
	327	13.3 Ultrasonic Inspection	474
	331	13.4 Portable Equipment	483
	335	13.5 Radiographic Inspection	483
ng Defects	336	13.6 Thermographic Inspection	490
	338	13.7 Repair	492
	341	13.8 Fill Repairs	492
in Transfer Molding	349	13.9 Injection Repairs	493
	354	13.10 Bolted Repairs	497
	355	13.11 Bonded Repairs	501
		13.12 Summary	511
