
CONTENTS

Preface to the Fourth Edition	xv
Preface to the First Edition	xvii
Symbols and Definitions	xix

1 Introduction to Polymer Science	1
--	----------

- 1.1 From Little Molecules to Big Molecules / 2
- 1.2 Molecular Weight and Molecular Weight Distributions / 4
- 1.3 Major Polymer Transitions / 8
- 1.4 Polymer Synthesis and Structure / 10
- 1.5 Cross-Linking, Plasticizers, and Fillers / 18
- 1.6 The Macromolecular Hypothesis / 19
- 1.7 Historical Development of Industrial Polymers / 20
- 1.8 Molecular Engineering / 21
- References / 22
- General Reading / 22
- Handbooks, Encyclopedias, and Dictionaries / 24
- Web Sites / 24
- Study Problems / 25
- Appendix 1.1 Names for Polymers / 26

2 Chain Structure and Configuration	29
--	-----------

- 2.1 Examples of Configurations and Conformations / 30
- 2.2 Theory and Instruments / 31
- 2.3 Stereochemistry of Repeating Units / 36
- 2.4 Repeating Unit Isomerism / 42

2.5	Common Types of Copolymers /	45
2.6	NMR in Modern Research /	47
2.7	Multicomponent Polymers /	51
2.8	Conformational States in Polymers /	55
2.9	Analysis of Polymers during Mechanical Strain /	56
2.10	Photophysics of Polymers /	58
2.11	Configuration and Conformation /	63
	References /	63
	General Reading /	65
	Study Problems /	65
Appendix 2.1	Assorted Isomeric and Copolymer Macromolecules /	67

3 Dilute Solution Thermodynamics, Molecular Weights, and Sizes 71

3.1	Introduction /	71
3.2	The Solubility Parameter /	73
3.3	Thermodynamics of Mixing /	79
3.4	Molecular Weight Averages /	85
3.5	Determination of the Number-Average Molecular Weight /	87
3.6	Weight-Average Molecular Weights and Radii of Gyration /	91
3.7	Molecular Weights of Polymers /	103
3.8	Intrinsic Viscosity /	110
3.9	Gel Permeation Chromatography /	117
3.10	Mass Spectrometry /	130
3.11	Instrumentation for Molecular Weight Determination /	134
3.12	Solution Thermodynamics and Molecular Weights /	135
	References /	136
	General Reading /	139
	Study Problems /	140
Appendix 3.1	Calibration and Application of Light-Scattering Instrumentation for the Case Where $P(\theta) = 1$ /	142

4 Concentrated Solutions, Phase Separation Behavior, and Diffusion 145

4.1	Phase Separation and Fractionation /	145
4.2	Regions of the Polymer-Solvent Phase Diagram /	150

4.3	Polymer-Polymer Phase Separation /	153
4.4	Diffusion and Permeability in Polymers /	172
4.5	Latexes and Suspensions /	184
4.6	Multicomponent and Multiphase Materials /	186
	References /	186
	General Reading /	190
	Study Problems /	190
	Appendix 4.1 Scaling Law Theories and Applications /	192

5 The Amorphous State 197

5.1	The Amorphous Polymer State /	198
5.2	Experimental Evidence Regarding Amorphous Polymers /	199
5.3	Conformation of the Polymer Chain /	211
5.4	Macromolecular Dynamics /	217
5.5	Concluding Remarks /	227
	References /	227
	General Reading /	230
	Study Problems /	230
	Appendix 5.1 History of the Random Coil Model for Polymer Chains /	232
	Appendix 5.2 Calculations Using the Diffusion Coefficient /	236
	Appendix 5.3 Nobel Prize Winners in Polymer Science and Engineering /	237

6 The Crystalline State 239

6.1	General Considerations /	239
6.2	Methods of Determining Crystal Structure /	245
6.3	The Unit Cell of Crystalline Polymers /	248
6.4	Structure of Crystalline Polymers /	256
6.5	Crystallization from the Melt /	260
6.6	Kinetics of Crystallization /	271
6.7	The Reentry Problem in Lamellae /	290
6.8	Thermodynamics of Fusion /	299
6.9	Effect of Chemical Structure on the Melting Temperature /	305
6.10	Fiber Formation and Structure /	307
6.11	The Hierarchical Structure of Polymeric Materials /	311
6.12	How Do You Know It's a Polymer? /	312
	References /	314
	General Reading /	320
	Study Problems /	320

7 Polymers in the Liquid Crystalline State 325

- 7.1 Definition of a Liquid Crystal / 325
- 7.2 Rod-Shaped Chemical Structures / 326
- 7.3 Liquid Crystalline Mesophases / 326
- 7.4 Liquid Crystal Classification / 331
- 7.5 Thermodynamics and Phase Diagrams / 338
- 7.6 Mesophase Identification in Thermotropic Polymers / 341
- 7.7 Fiber Formation / 342
- 7.8 Comparison of Major Polymer Types / 344
- 7.9 Basic Requirements for Liquid Crystal Formation / 345
- References / 346
- General Reading / 347
- Study Problems / 348

8 Glass-Rubber Transition Behavior 349

- 8.1 Simple Mechanical Relationships / 350
- 8.2 Five Regions of Viscoelastic Behavior / 355
- 8.3 Methods of Measuring Transitions in Polymers / 366
- 8.4 Other Transitions and Relaxations / 375
- 8.5 Time and Frequency Effects on Relaxation Processes / 377
- 8.6 Theories of the Glass Transition / 381
- 8.7 Effect of Molecular Weight on T_g / 397
- 8.8 Effect of Copolymerization on T_g / 399
- 8.9 Effect of Crystallinity on T_g / 404
- 8.10 Dependence of T_g on Chemical Structure / 408
- 8.11 Effect of Pressure on T_g / 410
- 8.12 Damping and Dynamic Mechanical Behavior / 412
- 8.13 Definitions of Elastomers, Plastics, Adhesives, and Fibers / 415
- References / 415
- General Reading / 420
- Study Problems / 420
- Appendix 8.1 Molecular Motion near the Glass Transition / 423

9 Cross-linked Polymers and Rubber Elasticity 427

- 9.1 Cross-links and Networks / 427
- 9.2 Historical Development of Rubber / 430
- 9.3 Rubber Network Structure / 432
- 9.4 Rubber Elasticity Concepts / 434

9.5	Thermodynamic Equation of State /	437
9.6	Equation of State for Gases /	439
9.7	Statistical Thermodynamics of Rubber Elasticity /	442
9.8	The "Carnot Cycle" for Elastomers /	450
9.9	Continuum Theories of Rubber Elasticity /	453
9.10	Some Refinements to Rubber Elasticity /	459
9.11	Internal Energy Effects /	469
9.12	The Flory-Rehner Equation /	472
9.13	Gelation Phenomena in Polymers /	473
9.14	Gels and Gelation /	478
9.15	Effects of Strain on the Melting Temperature /	479
9.16	Elastomers in Current Use /	480
9.17	Summary of Rubber Elasticity Behavior /	488
	References /	489
	General Reading /	494
	Study Problems /	495
Appendix 9.1	Gelatin as a Physically Cross-linked Elastomer /	497
Appendix 9.2	Elastic Behavior of a Rubber Band /	501
Appendix 9.3	Determination of the Cross-link Density of Rubber by Swelling to Equilibrium /	503

10 Polymer Viscoelasticity and Rheology **507**

10.1	Stress Relaxation and Creep /	507
10.2	Relaxation and Retardation Times /	515
10.3	The Time-Temperature Superposition Principle /	529
10.4	Polymer Melt Viscosity /	533
10.5	Polymer Rheology /	538
10.6	Overview of Viscoelasticity and Rheology /	547
	References /	548
	General Reading /	550
	Study Problems /	550
Appendix 10.1	Energy of Activation from Chemical Stress Relaxation Times /	552
Appendix 10.2	Viscoelasticity of Cheese /	553

11 Mechanical Behavior of Polymers **557**

11.1	An Energy Balance for Deformation and Fracture /	557
11.2	Deformation and Fracture in Polymers /	560
11.3	Crack Growth /	585
11.4	Cyclic Deformations /	588

11.5	Molecular Aspects of Fracture and Healing in Polymers /	593
11.6	Friction and Wear in Polymers /	601
11.7	Mechanical Behavior of Biomedical Polymers /	603
11.8	Summary /	606
	References /	607
	General Reading /	610
	Study Problems /	611

12 Polymer Surfaces and Interfaces 613

12.1	Polymer Surfaces /	614
12.2	Thermodynamics of Surfaces and Interfaces /	615
12.3	Instrumental Methods of Characterization /	619
12.4	Conformation of Polymer Chains in a Polymer Blend Interphase /	644
12.5	The Dilute Solution-Solid Interface /	646
12.6	Instrumental Methods for Analyzing Polymer Solution Interfaces /	652
12.7	Theoretical Aspects of the Organization of Chains at Walls /	659
12.8	Adhesion at Interfaces /	667
12.9	Interfaces of Polymeric Biomaterials with Living Organisms /	675
12.10	Overview of Polymer Surface and Interface Science /	677
	References /	679
	General Reading /	683
	Study Problems /	684
	Appendix 12.1 Estimation of Fractal Dimensions /	686

13 Multicomponent Polymeric Materials 687

13.1	Classification Schemes for Multicomponent Polymeric Materials /	688
13.2	Miscible and Immiscible Polymer Pairs /	692
13.3	The Glass Transition Behavior of Multicomponent Polymer Materials /	693
13.4	The Modulus of Multicomponent Polymeric Materials /	698
13.5	The Morphology of Multiphase Polymeric Materials /	706
13.6	Phase Diagrams in Polymer Blends (Broad Definition) /	710
13.7	Morphology of Composite Materials /	721
13.8	Nanotechnology-Based Materials /	723
13.9	Montmorillonite Clays /	728

- 13.10 Fracture Behavior of Multiphase Polymeric Materials / 736
- 13.11 Processing and Applications of Polymer Blends and Composites / 741
- References / 748
- General Reading / 753
- Study Problems / 754

14 Modern Polymer Topics 757

- 14.1 Polyolefins / 757
- 14.2 Thermoset Polymer Materials / 762
- 14.3 Polymer and Polymer Blend Aspects of Bread Doughs / 765
- 14.4 Natural Product Polymers / 769
- 14.5 Dendritic Polymers and Other Novel Polymeric Structures / 773
- 14.6 Polymers in Supercritical Fluids / 779
- 14.7 Electrical Behavior of Polymers / 782
- 14.8 Polymers for Nonlinear Optics / 786
- 14.9 Light-Emitting Polymers and Electroactive Materials / 789
- 14.10 Optical Tweezers in Biopolymer Research / 794
- 14.11 The 3-D Structure and Function of Biopolymers / 795
- 14.12 Fire Retardancy in Polymers / 807
- 14.13 Polymer Solution-Induced Drag Reduction / 811
- 14.14 Modern Engineering Plastics / 814
- 14.15 Major Advances in Polymer Science and Engineering / 815
- References / 817
- General Reading / 822
- Study Problems / 823
