General Preface	xxix
Preface to Volume 1	xxxi
1 Organization of a Plant Tissue Culture Laboratory DANIEL C. W. BROWN and TREVOR A. THORPE	
I. Introduction	1
II. Washing Facilities	2
III. Media Preparation Area	5
IV. Transfer Area	9
V. Culture Facilities	10
References	11
2 Educational Services for Plant Tissue Culture PAUL J. BOTTINO	
I. Introduction	13
II. Survey Method	13
III. Results	14
IV. Books	17
3 Plant Cell Cultures: Nutrition and Media OLUF L. GAMBORG	
I. Media Composition	19
II. Media Preparation	23
References	25
4 Callus Culture: Induction and Maintenance F. CONSTABEL	
I. Introduction	27
II. The Explant	28
III. Disinfection	28
IV. Excision and Isolation of Explants	29
V. Nutrient Media and Culture Conditions	30

	VI. Callus Formation	31
	VII. Callus Subculture	32
	VIII. Callus Maintenance	33
	IX. Procedures	34
	References	34
5	Induction and Maintenance of Embryogenic Callus Cultures of Gramineae	
	VIMLA VASIL and INDRA K. VASIL	
	I. Introduction	36
	II. Selection and Sterilization of Explants	37
	III. Nutrient Medium	38
	IV. Induction of Embryogenic Callus	39
	V. Maintenance of Embryogenic Callus	40
	VI. Conclusions	40
	References	41
6	Clonal Propagation: Shoot Cultures	
	HORST BINDING and GABRIELA KRUMBIEGEL-SCHROEREN	
	I. Introduction	43
	II. General Techniques	44
	III. Initiation of Shoot Cultures	45
	IV. Subculture	46
	V. Genetic Aspects of Shoot Culture	47
	VI. Plant Regeneration	47
	VII. Conclusions and Perspectives	47
	References	48
7	Clonal Propagation: Adventitious Buds	
	TREVOR A. THORPE and KAMLESH R. PATEL	
	I. Introduction	49
	II. Inoculum	50
	III. Medium	52
	IV. Culture Environment	54
	V. Plantlet Formation in a New Tissue	55
	VI. Conclusions	57
	References	58
8	Clonal Propagation: Orchids	
	YONEO SAGAWA and JOHN T. KUNISAKI	
	I. Introduction	61
	II. Procedure	62
	III. Results and Conclusions	65
	References	66
9	Clonal Propagation: Somatic Embryos of <i>Citrus</i>	
	T. S. RANGAN	
	I. Introduction	68
	II. Procedure	69

	III. Results and Conclusions	70
	References	72
10	Clonal Propagation: Palms	
	BRENT TISSERAT	
	I. Introduction	74
	II. Materials and Methods	75
	III. Results and Conclusions	80
	References	81
11	Clonal Propagation: Gymnosperms	
	JENNY AITKEN-CHRISTIE and TREVOR A. THORPE	
	I. Introduction	82
	II. Nutrient Media	84
	III. Procedure for the Micropropagation of Juvenile Radiata Pine	84
	IV. Micropropagation of Mature Gymnosperms	90
	V. Conclusions	92
	References	93
12	Culture Methods for Bryophytes	
	MARTIN BOPP and BERND KNOOP	
	I. Culture of Whole Plants	96
	II. Production and Culture of Protoplasts	103
	References	103
13	Culture of Shoot Meristems: Pea	
	K. K. KARTHA	
	I. Introduction	106
	II. Sterilization of Seeds	107
	III. Culture Media	107
	IV. Isolation of Meristems	108
	V. Results and Conclusions	109
	References	110
14	Culture of Shoot Meristems: Fruit Plants	
	OLIVIA C. BROOME and RICHARD H. ZIMMERMAN	
	I. Introduction	111
	II. Source and Condition of Explant Material	112
	III. Tissue Collection and Preparation for Culture	112
	IV. Medium Preparation and Culture Containers	116
	V. Culture Establishment, Proliferation, and Rooting	117
	VI. Acclimatization	121
	References	121
15	The Acclimatization of Micropropagated Plants	
	D. I. DUNSTAN and K. E. TURNER	
	I. Introduction	123
	II. Procedure	124

	III. Results	126
	IV. Conclusions	128
	References	129
16	Induction and Maintenance of Cell Suspension Cultures	
	PATRICK J. KING	
	I. Introduction	130
	II. Induction	130
	III. Maintenance	134
	References	137
17	Induction, Maintenance, and Manipulation of Development in Embryogenic Cell Suspension Cultures	
	PHILIP V. AMMIRATO	
	I. Introduction	139
	II. Procedures	141
	III. Results and Conclusions	148
	References	149
18	Isolation and Maintenance of Embryogenic Cell Suspension Cultures of Gramineae	
	VIMLA VASIL and INDRA K. VASIL	
	I. Introduction	152
	II. Establishment of Embryogenic Cell Suspensions	153
	III. Maintenance of Embryogenic Cell Suspensions	154
	IV. Important Parameters	155
	V. Conclusions	156
	References	157
19	Fractionation of Cultured Cells	
	TATSUHIITO FUJIMURA and ATSUSHI KOMAMINE	
	I. Introduction	159
	II. Fractionation of Cultured Cells by Sieving	160
	III. Fractionation of Cells by Discontinuous Density Gradient Centrifugation	162
	IV. Results and Conclusions	165
	References	165
20	Large-Scale Cultures of Cells in Suspension	
	M. W. FOWLER	
	I. Introduction	167
	II. The Nature of Plant Cells in Culture	167
	III. Large-Scale Culture Systems	170
	IV. General Points in Setting Up a Model System for Large-Scale Plant Cell Culture	171
	V. Final Comments	173
	References	174

21	Synchronization of Suspension Culture Cells	
	A. S. WANG and R. L. PHILLIPS	
	I. Introduction	175
	II. Physical Methods	176
	III. Chemical Methods	177
	IV. Mitotic Arrest	180
	V. Conclusions	180
	References	181
22	Photoautotrophic Cell Cultures	
	WOLFGANG HÜSEMANN	
	I. Introduction	182
	II. Culture Conditions and Selection Procedures	183
	III. A Two-Tier Culture Flask for Photoautotrophic Culture Growth	186
	IV. Batch Fermenter and Continuous Culture of Photoautotrophic Cell Suspensions	187
	V. Conclusions	190
	References	191
23	Quantitative Plating Technique	
	ROBERT B. HORSCH	
	I. Introduction	192
	II. Procedures	193
	III. Results and Discussion	196
	References	197
24	The Feeder Layer Technique	
	D. AVIV and E. GALUN	
	I. Introduction	199
	II. The Feeder Layer Technique	200
	III. Results and Conclusions	202
	References	203
25	Culture of Isolated Mesophyll Cells	
	HANS WILLY KOHLENBACH	
	I. Introduction	204
	II. Procedure	205
	III. Results and Conclusions	210
	References	210
26	The Multiple-Drop-Array (MDA) Screening Technique	
	CHRISTIAN T. HARMS	
	I. Introduction	213
	II. Procedure	214
	III. Results and Conclusions	217
	References	219

27	Culture of Ovaries	
	T. S. RANGAN	
	I. Introduction	221
	II. Procedure	222
	III. Results and Conclusions	222
	References	225
28	Culture of Ovules	
	T. S. RANGAN	
	I. Introduction	227
	II. Procedure	228
	III. Results and Conclusions	228
	References	230
29	Culture of Cotton Ovules	
	C. A. BEASLEY	
	I. Introduction	232
	II. Procedures	233
	III. Results and Conclusions	237
	References	239
30	Culture of Embryos	
	G. B. COLLINS and J. W. GROSSER	
	I. Introduction	241
	II. Applications	242
	III. General Protocol and Discussion	248
	IV. Media Requirements	251
	References	253
31	Culture of Endosperm	
	SANT S. BHOJWANI	
	I. Introduction	258
	II. Methodology	259
	III. Applications	266
	References	267
32	<i>In Vitro</i> Pollination and Fertilization	
	MACIEJ ZENKTELER	
	I. Introduction	269
	II. The Experimental Material	270
	III. Disinfection and Excision of the Ovules Along with Placenta	271
	IV. Analysis of Ovules Pollinated <i>in Vitro</i>	274
	References	274
33	<i>In Vitro</i> Pollination, Fertilization, and Development of Maize Kernels	
	BURLE G. GENGENBACH	
	I. Introduction	276

	II. Procedure	277
	III. Results and Discussion	280
	References	282
34	Anther Culture of <i>Nicotiana tabacum</i>	
	N. SUNDERLAND	
	I. Introduction	283
	II. Procedure I	284
	III. Procedure II	286
	IV. Which Genotype to Use?	288
	V. Cultivation of Tobacco Plants for Anther Culture	288
	VI. Applications of Tobacco Anther Culture	289
	References	290
35	Anther Culture of <i>Solanum tuberosum</i>	
	G. WENZEL and B. FOROUGH-WEHR	
	I. Introduction	293
	II. Parthenogenesis or Androgenesis	295
	III. Preculture of Anther Donor Plants	295
	IV. Developmental Stage of Microspores	296
	V. <i>In Vitro</i> Culture Procedure	297
	VI. Culture Media	297
	VII. The Ploidy Level	298
	VIII. Back to the Greenhouse	299
	IX. Chromosome Doubling	299
	X. Problems	299
	XI. Conclusions	300
	References	300
36	Anther Culture of <i>Brassica</i>	
	W. A. KELLER	
	I. Introduction	302
	II. Procedure	303
	III. Results and Conclusions	307
	References	308
37	Anther Culture of Cereals and Grasses	
	G. WENZEL and B. FOROUGH-WEHR	
	I. Introduction	311
	II. Genotype	312
	III. Physiological Status of the Donor Plants	313
	IV. Effect of Pollen Stage and Pollen Development	314
	V. Pretreatment of Anthers	317
	VI. Culture Procedure	318
	VII. Culture Media	319
	VIII. Ploidy Level and Genome Doubling	322
	IX. The Albino Problem	323
	X. Conclusion	323
	References	324

38	Isolation and Culture of Protoplasts: Tobacco ITARU TAKEBE and TOSHIYUKI NAGATA	
	I. Introduction	328
	II. Isolation and Culture of Tobacco Mesophyll Protoplasts	329
	III. Results and Implications	333
	IV. Modifications and Variations	334
	V. Other <i>Nicotiana</i> Species	336
	References	337
39	Isolation and Culture of Protoplasts: <i>Petunia</i> HORST BINDING and GABRIELA KRUMBIEGEL-SCHROEREN	
	I. Introduction	340
	II. Protoplast Isolation	341
	III. Culture of Protoplasts	344
	IV. Culture of Protoplast Regenerants	345
	V. Conclusions	347
	References	347
40	Isolation and Culture of Protoplasts: <i>Datura</i> O. SCHIEDER	
	I. Introduction	350
	II. Protoplast Isolation	351
	III. Protoplast Culture	354
	IV. Final Remarks	354
	References	355
41	Isolation and Culture of Protoplasts: <i>Brassica</i> HELLMUT R. SCHENCK and FRANZ HOFFMANN	
	I. Introduction	356
	II. Protoplast Isolation	357
	III. Protoplast Culture	366
	IV. Plant Regeneration	367
	References	368
42	Isolation and Culture of Protoplasts: Tomato ELIAS A. SHAHIN	
	I. Introduction	370
	II. Procedure	372
	III. Results and Discussion	378
	References	380
43	Isolation, Culture, and Regeneration of Potato Leaf Protoplasts from Plants Preconditioned <i>in Vitro</i> ELIAS A. SHAHIN	
	I. Introduction	381
	II. Procedure	382
	III. Results and Discussion	389
	References	390

44	Isolation and Culture of Protoplasts from Carrot Cell Suspension Cultures	
	DENES DUDITS	
	I. Introduction	391
	II. Isolation of Carrot Protoplasts from Cell Suspension Cultures	392
	III. Culture of Protoplasts	393
	IV. Induction of Somatic Embryo Differentiation and Plant Regeneration	394
	V. Results and Conclusion	395
	References	395
45	Isolation and Culture of Embryogenic Protoplasts of Cereals and Grasses	
	VIMLA VASIL and INDRA K. VASIL	
	I. Introduction	398
	II. Isolation of Protoplasts	399
	III. Culture of Protoplasts	401
	IV. Important Parameters	402
	V. Conclusions	402
	References	403
46	Mechanical Isolation and Single-Cell Culture of Isolated Protoplasts and Somatic Hybrid Cells	
	Y. Y. GLEBA, V. A. SIDOROV, and FRANZ HOFFMANN	
	I. Introduction	405
	II. Isolation and Culture of Hybrid Cells	407
	III. Isolation and Culture of Nonhybrid Cells	410
	IV. Discussion	411
	References	412
47	Fusion of Protoplasts by Polyethylene Glycol (PEG)	
	F. CONSTABEL	
	I. Introduction	414
	II. Protoplasts as Fusion Partners	415
	III. Adhesion and Fusion	416
	IV. Fusion Products	417
	V. Protocol for the Fusion of Jackbean and Periwinkle Protoplasts	418
	References	421
48	Fusion of Protoplasts by Dextran and Electrical Stimulus	
	TOSHIAKI KAMEYA	
	I. Introduction	423
	II. Procedure	424
	III. Results and Conclusions	426
	References	427

49	Inactivation of Protoplasts before Fusion to Facilitate Selective Recovery of Fusion-Derived Clones	
	LASZLO MENCZEL	
	I. Introduction	428
	II. Materials and Equipment	429
	III. Inactivation Procedures	429
	IV. Applications	430
	References	432
50	Selection of Somatic Hybrid Cells by Fluorescence-Activated Cell Sorting	
	DAVID W. GALBRAITH	
	I. Introduction	433
	II. Procedures	435
	III. Results and Conclusions	441
	Appendix	446
	References	447
51	Enucleation of Protoplasts: Preparation of Cytoplasts and Miniprotoplasts	
	HORST LÖRZ	
	I. Introduction	448
	II. Principle of the Procedure	449
	III. Technique	449
	IV. Results	451
	V. Conclusion	451
	References	452
52	Isolation of Organelles: Nuclei	
	L. WILLMITZER	
	I. Introduction	454
	II. Procedure	455
	III. Results and Conclusion	458
	References	459
53	Isolation of Organelles: Chromosomes	
	GYULA HADLACZKY	
	I. Introduction	461
	II. Procedure	462
	III. Results and Discussion	466
	References	469
54	Isolation of Organelles: Chloroplasts	
	J. KOBZA and G. E. EDWARDS	
	I. Introduction	471
	II. Procedures	474

	III. Conclusions	480
	References	480
55	Liposome Preparation and Incubation with Plant Protoplasts	
	ROBERT T. FRALEY	
	I. Introduction	483
	II. Liposome Preparation	484
	III. Conditions for Liposome-Protoplast Incubation	488
	IV. Concluding Remarks	489
	References	489
56	Inoculation of Protoplasts with Plant Viruses	
	ITARU TAKEBE	
	I. Introduction	492
	II. Procedure for Inoculating Tobacco Mesophyll Protoplasts with TMV	493
	III. Results and Conclusions	500
	References	500
57	Uptake of Organelles	
	ANITA WALLIN	
	I. Introduction	503
	II. Selection and Preparation of Protoplasts Suitable as Receptors for Organelle Transmission	504
	III. Selection of Chloroplasts	505
	IV. Procedure for Organelle Transplantation	506
	V. Microscopic and Biochemical Methods to Prove Uptake and Survival of Isolated Organelles	508
	VI. Conclusions	510
	References	511
58	Transformation of Tobacco Cells by Coculture with <i>Agrobacterium tumefaciens</i>	
	LÁSZLÓ MÁRTON	
	I. Introduction	514
	II. Procedures	515
	III. Results and Conclusions	520
	References	520
59	Ti-Plasmid DNA Uptake and Expression by Protoplasts of <i>Nicotiana tabacum</i>	
	F. A. KRENS and R. A. SCHILPEROORT	
	I. Introduction	522
	II. Isolation Procedures	525
	III. DNA Transformation Procedure	527
	IV. Growth and Selection	529

	V. Characterization of Putative Transformants	530
	VI. Results and Conclusions	530
	References	532
60	Immobilization of Cultured Plant Cells and Protoplasts	
	P. BRODELIUS	
	I. Introduction	535
	II. Immobilization of Plant Cells	536
	III. Immobilization of Protoplasts	544
	IV. Conclusions	545
	References	546
61	Mutagenesis of Cultured Cells	
	PATRICK J. KING	
	I. Introduction	547
	II. Application of <i>N</i> -Methyl- <i>N'</i> -Nitro- <i>N</i> -Nitrosoguanidine to Protoplasts	548
	References	550
62	Cell Culture Procedures for Mutant Selection and Characterization in <i>Nicotiana plumbaginifolia</i>	
	PAL MALIGA	
	I. Introduction	552
	II. Procedures	554
	III. Results and Conclusions	561
	References	561
63	Induction, Selection, and Characterization of Mutants in Carrot Cell Cultures	
	J. M. WIDHOLM	
	I. Introduction	563
	II. Procedure	563
	III. Mechanisms of Resistance	568
	References	569
64	Induction, Selection, and Characterization of Mutants in Maize Cell Cultures	
	KENNETH A. HIBBERD	
	I. Introduction	571
	II. Procedures	572
	III. Conclusions	575
	References	576
65	Elimination of Viruses	
	K. K. KARTHA	
	I. Introduction	577
	II. Methods of Virus Elimination	578

III. Conclusion	583
References	583
66 Cocultures of Plant and Bacterial Cells	
MINOCHER REPORTER	
I. Introduction	586
II. Apparatus for Transfilter Cultures	588
III. Cells Bagged in Dialysis Tubing	593
IV. Cocultures of Immobilized Plant and Microbial Cells	594
V. Conclusions	595
References	596
67 Isolation and Bioassay of Fungal Phytotoxins	
JONATHAN D. WALTON and ELIZABETH D. EARLE	
I. Introduction	598
II. Preparation of Fungal Phytotoxins	599
III. Bioassay of Fungal Phytotoxins	602
IV. Conclusions	604
References	605
68 Freeze Preservation of Cells	
LYNDSEY A. WITHERS	
I. Introduction	608
II. Procedure	609
III. Results and Conclusions	617
References	618
69 Freeze Preservation of Meristems	
K. K. KARTHA	
I. Introduction	621
II. Requirements	622
III. Procedure	623
IV. Storage, Thawing, and Reculture	625
