Acknowledgements	vii
About the Editors.....	xiii
1 Strategies for Crop Improvement Against Salinity and Drought Stress: An Overview	1
H.R. Athar and M. Ashraf	
Part I Salt and Water Stress	
2 Prediction of Salinity Tolerance Based on Biological and Chemical Properties of <i>Acacia</i> Seeds	19
S. Rehman, A. Khatoon, Z. Iqbal, M. Jamil, M. Ashraf, and P.J.C. Harris	
3 Antioxidant-Enzyme System as Selection Criteria for Salt Tolerance in Forage Sorghum Genotypes (<i>Sorghum bicolor</i> L. Moench)	25
M. Hefny and D.Z. Abdel-Kader	
4 Genetic Variation in Wheat (<i>Triticum aestivum</i> L.) Seedlings for Nutrient Uptake at Different Salinity and Temperature Regimes	37
E.V. Divakara Sastry and M. Gupta	
5 The Role of Plant Hormones in Plants Under Salinity Stress	45
C. Kaya, A.L. Tuna, and I. Yokaş	
6 Effects of Temperature and Salinity on Germination and Seedling Growth of <i>Daucus carota</i> cv. <i>nantes</i> and <i>Capsicum</i> <i>annuum</i> cv. <i>sivri</i> and Flooding on <i>Capsicum annum</i> cv. <i>sivri</i>	51
M. Ozturk, S. Gucel, S. Sakcali, Y. Dogan, and S. Baslar	
7 <i>Triticeae</i> : The Ultimate Source of Abiotic Stress Tolerance Improvement in Wheat	65
S. Farooq	

8	Water Loss and Gene Expression of Rice (<i>Oryza sativa</i> L.) Plants Under Dehydration	73
	T.-R. Kwon, J.-O. Lee, S.-K. Lee, and S.-C. Park	
9	Effect of Different Water Table Treatments on Cabbage in Saline Saemangeum Soil	85
	M. Jamil and E.S. Rha	
10	How Does Ammonium Nutrition Influence Salt Tolerance in <i>Spartina alterniflora</i> Loisel?	91
	K. Hessini, M. Gandour, W. Megdich, A. Soltani, and C. Abdely	
 Part II Improving Crop Efficiency		
11	Strategies for Crop Improvement in Saline Soils	99
	R. Munns	
12	Role of Vetiver Grass and Arbuscular Mycorrhizal Fungi in Improving Crops Against Abiotic Stresses	111
	A.G. Khan	
13	Cell Membrane Stability (CMS): A Simple Technique to Check Salt Stress Alleviation Through Seed Priming with GA₃ in Canola	117
	M. Jamil, M. Ashraf, S. Rehman, and E.S. Rha	
14	Using Resources from the Model Plant <i>Arabidopsis thaliana</i> to Understand Effects of Abiotic Stress	129
	M.G. Jones	
15	Improvement of Salt Tolerance Mechanisms of Barley Cultivated Under Salt Stress Using <i>Azospirillum brasilense</i>	133
	M.N.A Omar, M.E.H. Osman, W.A. Kasim, and I.A. Abd El-Daim	
16	Genetic Resources for Some Wheat Abiotic Stress Tolerances	149
	A. Mujeeb-Kazi, A. Gul, I. Ahmad, M. Farooq, Y. Rauf, A.-ur Rahman, and H. Riaz	
 General Topics		
17	Survival at Extreme Locations: Life Strategies of Halophytes	167
	H.-W. Koyro, N. Geissler, and S. Hussin	
18	Adaptive Mechanisms of Halophytes in Desert Regions	179
	D.J. Weber	
19	Is Sustainable Agriculture with Seawater Irrigation Realistic?	187
	S.-W. Breckle	
20	Enhanced Tolerance of Transgenic Crops Expressing Both Superoxide Dismutase and Ascorbate Peroxidase in Chloroplasts to Multiple Environmental Stress	197
	S.-S. Kwak, S. Lim, L. Tang, S.-Y. Kwon, and H.-S. Lee	

21	Adaptation to Iron-Deficiency Requires Remodelling of Plant Metabolism: An Insight in Chloroplast Biochemistry and Functionality	205
	A. Castagna, S. Donnini, and A. Ranieri	
22	Boron Deficiency in Rice in Pakistan: A Serious Constraint to Productivity and Grain Quality	213
	A. Rashid, M. Yasin, M.A. Ali, Z. Ahmad, and R. Ullah	
23	Potential Role of Sabkhas in Egypt: An Overview	221
	H.M. El Shaer	
	Author Index	229
	Subject Index	237
