

TABLE OF CONTENTS

<i>Preface</i>	<i>vii</i>
----------------	------------

CHAPTER ONE

SYSTEMATIC AND RANDOM ERRORS	1
------------------------------	---

1-1 <i>Errors</i>	1
-------------------	---

1-2 <i>Uncertainties</i>	6
--------------------------	---

CHAPTER TWO

MEAN AND STANDARD DEVIATION	10
-----------------------------	----

2-1 <i>Parent population</i>	10
------------------------------	----

2-2 <i>Sample parameters</i>	17
------------------------------	----

CHAPTER THREE

DISTRIBUTIONS	27
3-1 <i>Binomial distribution</i>	27
3-2 <i>Poisson distribution</i>	36
3-3 <i>Gaussian or normal error distribution</i>	43
3-4 <i>Lorentzian distribution</i>	49

CHAPTER FOUR

PROPAGATION OF ERRORS	56
4-1 <i>General methods</i>	56
4-2 <i>Specific formulas</i>	60

CHAPTER FIVE

ESTIMATES OF MEAN AND ERRORS	66
5-1 <i>Method of least squares</i>	66
5-2 <i>Instrumental uncertainties</i>	71
5-3 <i>Statistical fluctuations</i>	77
5-4 χ^2 <i>test of distribution</i>	81

CHAPTER SIX

LEAST-SQUARES FIT TO A STRAIGHT LINE	92
6-1 <i>Dependent and independent variables</i>	92
6-2 <i>Method of least squares</i>	99
6-3 <i>Instrumental uncertainties</i>	102
6-4 <i>Statistical fluctuations</i>	108
6-5 <i>Estimation of errors</i>	113

CHAPTER SEVEN

CORRELATION PROBABILITY	119
7-1 <i>Linear-correlation coefficient</i>	119
7-2 <i>Correlation between many variables</i>	127

CHAPTER EIGHT

LEAST-SQUARES FIT TO A POLYNOMIAL	134
8-1 <i>Analytical method</i>	134
8-2 <i>Independent parameters</i>	143
8-3 <i>Matrix inversion</i>	148

CHAPTER NINE

MULTIPLE REGRESSION	164
9-1 <i>Multiple linear regression</i>	164
9-2 <i>Polynomials</i>	176
9-3 <i>Non-linear functions</i>	180

CHAPTER TEN

GOODNESS OF FIT	187
10-1 χ^2 test	187
10-2 <i>F test</i>	195

CHAPTER ELEVEN

LEAST-SQUARES FIT TO AN ARBITRARY FUNCTION	204
11-1 <i>General method</i>	204
11-2 <i>Searching parameter space</i>	208

11-3	<i>Parabolic extrapolation of χ^2</i>	222
11-4	<i>Linearization of function</i>	232
11-5	<i>Error determination</i>	242

CHAPTER TWELVE

FITTING COMPOSITE CURVES		247
12-1	<i>Area determination</i>	247
12-2	<i>Background subtraction</i>	251

CHAPTER THIRTEEN

DATA MANIPULATION		255
13-1	<i>Smoothing</i>	255
13-2	<i>Interpolation and extrapolation</i>	259
13-3	<i>Area integration</i>	265

APPENDIX A

CALCULUS		277
A-1	<i>Partial differentials</i>	277
A-2	<i>Minimizing functions</i>	281

APPENDIX B

MATRICES		286
B-1	<i>Determinants</i>	286
B-2	<i>Simultaneous equations</i>	293
B-3	<i>Matrix inversion</i>	297

APPENDIX C

GRAPHS AND TABLES	304
C-1 <i>Gaussian probability distribution</i>	304
C-2 <i>Integral of Gaussian distribution</i>	307
C-3 <i>Linear-correlation coefficient</i>	310
C-4 χ^2 <i>distribution</i>	313
C-5 <i>F distribution</i>	317
<i>References</i>	325
<i>Solutions to odd-numbered exercises</i>	327
<i>Index</i>	331
