

Detailed Contents

Preface

1 Introduction 1

Introduction to Plant Anatomy 1

Introduction to Higher Plants 3

The Major Groups of Plants 3

The Structure of Higher Plants 6

PART I

Subcellular Anatomy 11

2 The Cell 13

Concepts 13

The Cell 14

Membranes 17

The Nucleus 18

The Vacuole 21

The Plastids 22

Proplastids 24

Chloroplasts 24

Amyloplasts 24

Elaioplasts 26

Chromoplasts 26

Etioplasts 26

Mitochondria 26

Endoplasmic Reticulum 27

Dictyosomes 28

Microbodies 29

Ribosomes 29

Microtubules 30

Microfilaments 30

Hyaloplasm 30

Ergastic Substances 31

Starch 31

Lipid 31

Tannins 31

Crystals 32

DRUSES 32

RAPHIDES 32

STYLOIDS 33

Silica Bodies and Stegmata 34

Protein Bodies 34

Mucilages 34

The Cell Wall 35

Chemical Structure of the Wall 35

Gross Structure of the Wall 38

Plasmodesmata 39

PART II

Simple Tissues 41

3 Parenchyma 43

Concepts 43

Examples 44

- Synthetic Parenchyma 44
 - PHOTOSYNTHETIC PARENCHYMA 44
 - MERISTEMATIC PARENCHYMA 44
 - SECRETORY PARENCHYMA 45
- Structural Parenchyma 45
 - AERENCHYMA 45
- Boundary Parenchyma 46
 - EPIDERMIS 46
 - ENDODERMIS 47
- Transport Parenchyma 47
 - TRANSFER CELLS 47
 - SIEVE ELEMENTS 48
 - LIGHT TRANSMISSION 48
- Storage Parenchyma 48

Cell Shape 49

Development 50

- Phylogenetic Development 50
- Ontogenetic Development 50

4 Collenchyma 53

Concepts 53

Types of Collenchyma 53

- Angular Collenchyma 53
- Lamellar Collenchyma 53
- Lacunar Collenchyma 54
- Annular Collenchyma 54

Nature of the Wall 55

Position in the Plant 58

5 Sclerenchyma 61

Concepts 61

Nature of the Wall 61

Nature of the Protoplast 65

Types of Sclerenchyma 66

- Sclereids 67
- Development of Sclereids 70
- Fibers 71
- Development of Fibers 72

- PHYLOGENETIC DEVELOPMENT 72
- ONTOGENETIC DEVELOPMENT 73

Unusual Types of Fibers 74

- GELATINOUS FIBERS 74
- SEPTATE FIBERS 74
- SUBSTITUTE FIBERS 75

Fiber Identification 75

Terminology 75

PART III

Complex Tissues 77

6 Apical Meristems 79

Concepts 79

Types of Meristems 84

- Position of the Meristem 84
- Types of Derivatives Produced by the Meristem 85
- Sequence of Formation of the Meristems 85

The Vegetative Shoot Apical Meristem 86

- In Vascular Cryptogams 86
- In Seed Plants 87

General Features of Vegetative Shoot Apical Meristems 90

Activity of the Shoot Apical Meristem 94

Branching 95

- Dichotomous Branching 95
- Axillary Buds 96
- Adventitious Buds 96

Development of the Shoot Apical Meristem 97

- Phylogenetic Development 97
- Ontogenetic Development 98

The Reproductive Shoot Apical Meristem 98

Death of the Shoot Apical Meristem 101**The Root Apical Meristem 101**

In Vascular Cryptogams 101

In Seed Plants 103

Ultrastructure of Meristematic Cells 105

7 Xylem 109**Concepts 109****Walls of Tracheary Elements 114**

Patterns of Secondary Wall

Deposition 114

ANNULAR 114

HELICAL 114

SCALARIFORM 115

RETICULATE 115

CIRCULAR BORDERED PITS 115

Perforations 119

**Size and Shape of Tracheary
Elements 122**

Tracheids 122

Vessel Elements and Vessels 122

Development 123

Phylogenetic Development 123

EVOLUTION OF THE PERFORATION

PLATE 123

Ontogenetic Development 125

**Structure in Relation to Function in
Water Condition 126****8 Phloem 129****Concepts 129****Structure of Phloem 130**

Conducting Cells 130

Companion Cells and Albuminous
Cells 134**Development 136**

Phylogenetic Development 136

Ontogenetic Development 137

Protophloem 140**9 Secretory Cells and Tissues 141****Concepts 141****Methods of Classifying Secretory
Systems 142**

Nature of the Secretory Product 142

Mechanism of Secretion 146

Purpose of the Secretion 148

Accumulation Space 149**Examples 152**

Secretion by a Single Internal Cell 152

MYOSIN CELLS 152

MUCILAGE CELLS 153

NONARTICULATED LATICIFERS 154

Secretion by a Single External Cell 155

STINGING HAIRS 155

NECTARY OF *LONICERA* 155

SEPTAL NECTARIES 156

Secretion by Internal Complexes
of Cells 157

HYDATHODES 157

ARTICULATED LATICIFERS 158

LATEX DUCTS IN *MAMMILLARIA* 160

MUCILAGE CANALS 162

Secretion by External Complexes
of Cells 163

EXTRAFLOREAL NECTARIES OF

ANCISTROCACTUS 163

SALT GLANDS 164

DIGESTIVE GLANDS 165

10 Epidermis 167**Concepts 167****Functions of the Epidermis 167**

Water Regulation 167

Protection Against Sunlight 169

Protection Against Other Organisms 169

Protection Against Nonbiological
Agents 170

Epidermal Function in Reproduction 170

Epidermal Function in Secretion 171

Types of Epidermal Cells 171

Ordinary Epidermal Cells	171
CUTIN AND THE CUTICLE	175
WAX	177
Guard Cells and Stomata	180
Trichomes	189
NONGLANDULAR TRICHOMES	190
GLANDULAR TRICHOMES	193
Root Hairs	193
Unusual Epidermal Cells	194
LITHOCYSTS	194
SILICA CELLS AND CORK CELLS	194
BULLIFORM CELLS	194
Multiple Epidermis and Hypodermis	195
Root Epidermis	196
Development of the Epidermis	196
Ontogenetic Development	196
Phylogenetic Development	197

PART IV

The Primary Vegetative Body of the Plant 199

11 Stem 201

Concepts	201
Arrangement of Tissues	204
Epidermis	204
Cortex	205
CORTICAL BUNDLES	208
ENDODERMIS	209
Pith	210
MEDULLARY BUNDLES	211
Primary Vascular Tissues	211
ARRANGEMENT OF THE BUNDLES	211
PRIMARY VASCULAR TISSUES WITHIN THE BUNDLES	214
NODES	222
Development of the Stele	225
Phylogenetic Development	225
PROTOSTELES	226

SIPHONOSTELES	226
SIPHONOSTELES IN FERNS	227
SIPHONOSTELES IN SEED PLANTS	229
UNUSUAL STELES	229

12 Leaf 231

Concepts	231
Structure of Foliage Leaves	231
Epidermis	233
Palisade Parenchyma	234
Spongy Mesophyll	236
Vascular System of the Dicot Foliage Leaf	239
Petiole and Node of Dicot Leaves	244
Vascular System of Monocot Leaves	247
Stem-Leaf Junction of Monocots	250
Structure of Fern Leaves	252
Structure of Gymnosperm Leaves	252
Structure of Modified Leaves	255
Kranz Anatomy and C ₄ Photosynthesis	255
Xeromorphic Foliage Leaves	257
Submerged Foliage Leaves	258
Cataphylls	259
Hypsophylls	260
Development	261
Ontogenetic Development	261
ONTOGENY OF BIFACIAL LEAVES	261
ONTOGENY OF UNIFACIAL LEAVES	265
Phylogenetic Development	265
MICROPHYLLS	265
MEGAPHYLLS	266

13 Root 269

Concepts	269
Structure of the Root Primary Body	271
Mucigel	271
Epidermis	273
Cortex	275
ENDODERMIS	275

EXODERMIS	278
BODY OF THE CORTEX	279
Stele	279

Branching 284

Dimorphic Roots 286

The Root-Shoot Interface 289

Mycorrhizae 289

Ectomycorrhizae 290

Endomycorrhizae 290

Root Nodules and Nitrogen

Fixation 291

PART V

The Secondary Body of the Plant 295

14 Vascular Cambium 297

Concepts 297

Structure of the Vascular Cambium 298

Cell Types in the Vascular
Cambium 300

Fusiform Initials 301

CELL DIVISION IN THE FUSIFORM
INITIALS 304

Ray Initials 308

Interconversions of Fusiform Initials and
Ray Initials 309

Infected Vascular Cambia 310

Development of the Vascular
Cambium 311

Ontogenetic Development 311

Development in the Roots 313

Phylogenetic Development 315

15 Secondary Xylem 317

Concepts 317

Basic Structure of Wood 318

Secondary Xylem of Gymnosperms 320

Rays of Gymnosperm Wood 321

Axial System of Gymnosperm Wood 324

Secondary Xylem of Dicots 325

Rays of Dicot Wood 325

Axial System of Dicot Wood 330

Axial Wood Parenchyma in Dicots 334

Axial Fibers in Dicot Wood 337

Reaction Wood 339

Compression Wood 339

Tension Wood 339

Taxonomic Value of Wood Anatomy 340

16 Secondary Phloem 341

Concepts 341

Secondary Phloem of Conifers 343

Secondary Phloem of Dicots 344

Dilatation of the Secondary Phloem 349

17 Periderm and Bark 351

Concepts 351

Formation of the Phellogen 354

Site of Initiation of the First Phellogen 354

Formation of Subsequent Phellogens 355

Activity of the Phellogen 356

Phellem 357

Phelloderm 360

Texture of Bark 361

Lenticels 362

The Periderm of Monocots 364

Wound Periderm 367

18 Anomalous Secondary Growth 369

Concepts 369

Modifications of the Common Type of Vascular Cambium 369

Death of the Cambium 369

Unequal Activity of the Vascular Cambium 370

Anomalous Placement of the Vascular Cambium 372

Successive Cambia 373

Discontinuous, Unidirectional Cambia 376

New Cambia 377

Secondary Growth in Monocots 377

PART VI

Tissues and Organs of Sexual Reproduction 381

19 Flower and Strobilus 383

Concepts 383

Secondary Sex Characteristics of the Vegetative Body 384

Gymnosperms: Strobili 385

Sporangia 385

MICROSPORANGIA 385

MEGASPORANGIA 386

Gametophytes 388

THE MEGAGAMETOPHYTE 388

THE MICROGAMETOPHYTE 388

Angiosperms: The Flower 390

Calyx 391

Corolla 391

Androecium 394

Gynoecium 401

Gametophytes 406

THE MEGAGAMETOPHYTE 406

THE MICROGAMETOPHYTE 409

Phylogenetic Origin of the Flower 411

20 Seed 415

Concepts 415

Nutrient Reserves External to the Embryo 417

Gymnosperms 417

Angiosperms 417

The Embryo 423

Gymnosperms 423

Angiosperms 425

EMBRYO DEVELOPMENT IN DICOTS 425

EMBRYO DEVELOPMENT IN MONOCOTS 430

The Seed Coat 431

21 Fruit 439

Concepts 439

General Considerations 440

Protection of Ovules and Seeds 445

Mechanisms of Dehiscence 445

Attraction of Animals 447

Dispersal by Agents Other Than Animals 448

Heterocarpy 450

Abscission 451

APPENDIX A: Glossary 453

APPENDIX B: References 483

Index 533
