

# ***Brief Contents***

## ***UNIT I***

### ***Conceptual Foundations for Conservation Biology 1***

---

- 1 What Is Conservation Biology? 3
- 2 Global Biodiversity 27
- 3 Threats to Biodiversity 63
- 4 Conservation Values and Ethics 111
- 5 Ecological Economics and Nature Conservation 137

## ***UNIT II***

### ***Focus on Primary Threats to Biodiversity 171***

---

- 6 Habitat Degradation and Loss 173
- 7 Habitat Fragmentation 213
- 8 Overexploitation 253
- 9 Species Invasions 293
- 10 Biological Impacts of Climate Change 333
- 11 Conservation Genetics 375

## ***UNIT III***

### ***Approaches to Solving Conservation Problems 417***

---

- 12 Species and Landscape Approaches to Conservation 419
- 13 Ecosystem Approaches to Conservation 467
- 14 Protected Areas 509
- 15 Restoration of Damaged Ecosystems and Endangered Populations 553
- 16 Sustainable Development 591
- 17 The Integration of Conservation Science and Policy 625
- 18 Meeting Conservation Challenges in the Twenty-First Century 661
