

Tabla de Contenidos del libro

Preface	vii
Chapter 1 Nanostructured Materials: Classification, Properties, Fabrication, Characterization and their Applications in Biomedical Sciences	1 (78)
Anees A. Ansari M. Naziruddin Khan M. Alhoshan A. S. Aldwayyan M. S. Alsalhi	
Chapter 2 Semiconductor Nanoparticles in Photocatalysis: The Present Status and Perspectives	79 (70)
Olexander L. Stroyuk Stepan Y. Kuchmiy Anatoliy I. Kryukov Vitaliy D. Pokhodenko	
Chapter 3 Nanoparticle Synthesis by Thermal Plasmas	149(64)
Takayuki Watanabe Masaya Shigeta	
Chapter 4 TiO ₂ Nanoparticles: Traditional and Novel Synthetic Methods for Photocatalytic Paint Formulations	213(42)
Giuseppe Cappelletti	
Chapter 5 Morphology Changes in Carbon Nanoparticles Due to Different Atom Arrangements	255(32)
N. Koprinarov M. Konstantinova	
Chapter 6 Gold Nanoparticle Labelled DNA Hairpin Grafting on Transparent and Conductive Oxide (TCO) Films: Characterization of Grafting and Hybridization	287(36)
V. Stambouli V. Lavalley A. Bionaz P. Chaudouet L. Rapenne H. Roussel A. Laurent R. Jones P. J. Pigram	
Chapter 7 Synthesis and Optical Properties of Polymer Functionalized Inorganic Nanoparticles	323(16)
Zhiguo Wang Xiaotao Zu Jingbo Li	
Index	339
