Contents

Preface.....	xi
Editors.....	xiii
Contributors.....	xv

PART I Biotechnology for the Enhancement of Functional Foods and Nutraceuticals

Chapter 1 Advances in Biotechnology for the Production of Functional Foods	3
<i>Yun-Hwa Peggy Hsieh and Jack Appiah Ofori</i>	
Chapter 2 Functional Foods and Biotechnology in Japan	29
<i>Harukazu Fukami</i>	
Chapter 3 Basic and Clinical Studies on Active Hexose Correlated Compound.....	51
<i>Takehito Miura, Kentaro Kitadate, Hiroshi Nishioka, and Koji Wakame</i>	
Chapter 4 Biotechnology and Breeding for Enhancing the Nutritional Value of Berry Fruit	61
<i>Jessica Scalzo and Bruno Mezzetti</i>	
Chapter 5 Improving the Bioavailability of Polyphenols.....	81
<i>Tetsuya Konishi and M. Mamonur Rahman</i>	
Chapter 6 The Function of the Next Generation Polyphenol, "Oligonol"	91
<i>Takehito Miura, Kentaro Kitadate, and Hajime Fujii</i>	
Chapter 7 Application of Biotechnology in the Development of a Healthy Oil Capable of Suppressing Fat Accumulation in the Body	103
<i>Hiroyuki Takeuchi</i>	
Chapter 8 Effects of Nutraceutical Antioxidants on Age-Related Hearing Loss	113
<i>Shinichi Someya, Tomas A. Prolla, and Masaru Tanokura</i>	

PART II The Impact of Genetic Modification on Functional Foods

Chapter 9 Increased Production of Nutriment by Genetically Engineered Bacteria	127
<i>Kazuhiko Tabata and Satoshi Koizumi</i>	
Chapter 10 Recent Advances in the Development of Transgenic Pulse Crops	139
<i>Susan Eapen</i>	
Chapter 11 The Improvement and Enhancement of Phyto-Ingredients Using New Technology of Genetic Recombination	157
<i>Hisabumi Takase</i>	
Chapter 12 Metabolic Engineering of Bioactive Phenylpropanoids in Crops	181
<i>Kevin M. Davies</i>	
Chapter 13 The Use of Biotechnology to Reduce the Dependency of Crop Plants on Fertilizers, Pesticides, and Other Agrochemicals	197
<i>Zeba F. Alam</i>	
Chapter 14 Animal Biotechnology: Applications and Potential Risks	219
<i>Rama Shanker Verma, Abhilash, Sugapriya M.D., and Chithra R.</i>	
Chapter 15 Application of Micro-RNA in Regenerative Nutraceuticals and Functional Foods	251
<i>Ji Wu, Huacheng Luo, Li Zhou, and Jie Xiang</i>	
Chapter 16 Microbial Production of Organic Acids and Its Improvement by Genome Shuffling	265
<i>Takashi Yamada</i>	

PART III New Frontier in Food Manufacturing Process

Chapter 17 Microalgal Biotechnology in the Production of Nutraceuticals	279
<i>Niels-Henrik Nørskov, Maria Barbosa, and René Wijffels</i>	
Chapter 18 The Innovation of Technology for Microalgae Cultivation and Its Application for Functional Foods and the Nutraceutical Industry	313
<i>Akira Satoh, Masaharu Ishikura, Nagisa Murakami, Kai Zhang, and Daisuke Sasaki</i>	

Chapter 19 Production of Nattokinase as a Fibrinolytic Enzyme by an Ingenious Fermentation Technology: Safety and Efficacy Studies	331
<i>Shinsaku Takaoka, Kazuya Ogasawara, and Hiroyoshi Moriyama</i>	
Chapter 20 Synthesis of Antihypertensive GABA-Enriched Dairy Products Using Lactic Acid Bacteria	349
<i>Kazuhito Hayakawa</i>	
Chapter 21 Production of High-Quality Probiotics Using Novel Fermentation and Stabilization Technologies	361
<i>Franck Grattepanche and Christophe Lacroix</i>	
Chapter 22 Tracking the Careers of Grape and Wine Polymers Using Biotechnology and Systems Biology	389
<i>John P. Moore and Benoit Divol</i>	
Chapter 23 The Impact of Supercritical Extraction and Fractionation Technology on the Functional Food and Nutraceutical Industry	407
<i>Andrés Moure, Beatriz Díaz-Reinoso, Herminia Domínguez, and Juan Carlos Parajó</i>	
Chapter 24 The Application of Nanotechnology to Functional Foods and Nutraceuticals to Enhance Their Bioactivities	447
<i>Ping-Chung Kuo</i>	

PART IV Quality Assurance and Safety: Design and Implementation

Chapter 25 Enhancing the Nutritional Quality of Fruit Juices: Advanced Technologies for Juice Extraction and Pasteurization	465
<i>Robert D. Hancock and Derek Stewart</i>	
Chapter 26 Probiotics: Health Benefits, Efficacy, and Safety	485
<i>Nagendra P. Shah</i>	
Chapter 27 Use of High Pressure Technology to Inactivate Bacterial Spores in Foods	497
<i>Noriyuki Igura, Seiji Noma, and Mitsuya Shimoda</i>	

PART V Legal, Social, and Regulatory Aspects of Food Biotechnology

Chapter 28 Regulations of Biotechnology: Generally Recognized as Safe (GRAS) and Health Claims	507
---	-----

Ryan R. Simon, Earle R. Nestmann, Kathy Musa-Veloso, and Ian C. Munro

Chapter 29 Global Food Biotechnology Regulations and Urgency for Harmonization	531
---	-----

Dilip K. Ghosh and Peter Williams

PART VI Future of Biotechnology

Chapter 30 Future Strategies for the Development of Biotechnology-Enhanced Functional Foods and Their Contribution to Human Nutrition	545
--	-----

Dilip K. Ghosh, Francis C. Lau, and Debasis Bagchi

Index	549
--------------------	-----
