

Table of Contents

[Title Page](#)

[Copyright](#)

[Preface](#)

[Contributors](#)

[Chapter 1: Promising Dendritic Materials: An Introduction to Hyperbranched Polymers](#)

[1.1 Importance of Branching](#)

[1.2 Polymer Architecture](#)

[1.3 Dendritic Polymers](#)

[1.4 Hyperbranched Polymers](#)

[1.5 Conclusions](#)

[References](#)

[Chapter 2: Polycondensation of AB_n Monomers](#)

[2.1 Introduction](#)

[2.2 Statistical Consideration](#)

[2.3 Polymerization of AB_n-Type Monomers](#)

[References](#)

[Chapter 3: Synthesis of Hyperbranched Polymers via Polymerization of Functionally Symmetric Monomer Pairs](#)

[3.1 Introduction](#)

[3.2 Theoretical Treatment of A₂ + B₂ Polymerization](#)

[3.3 Polymerization of Symmetrical Monomer Pairs](#)

[3.4 Conclusions](#)

[List of Abbreviations](#)

[References](#)

Chapter 4: Synthesis of Hyperbranched Polymers via Polymerization of Asymmetric Monomer Pairs

4.1 Introduction

4.2 General Description of Polymerization of Asymmetric Monomer Pairs

4.3 Hyperbranched Polymers Prepared by Polymerization of Asymmetric Monomer Pairs

4.4 Conclusions

List Of Abbreviations

References

Chapter 5: Self-Condensing Vinyl Polymerization

5.1 Introduction

5.2 Self-Condensing Vinyl Polymerization

5.3 Self-Condensing Vinyl Copolymerization (SCVCP)

5.4 Self-Condensing Processes in Presence of Initiators

5.5 SCVP of Macroinimers

5.6 Surface-Grafted Hyperbranched Polymers

References

Chapter 6: Ring-Opening Multibranching Polymerization

6.1 Introduction

6.2 Classification of Ring-Opening Multibranching Polymerizations

6.3 Core-Containing Hyperbranched Polymers By Ring-Opening Multibranching Polymerization

6.4 Conclusion and Perspectives

References

Chapter 7: Hyperbranched Copolymers Synthesized by Cocondensation and Radical Copolymerization

7.1 Introduction

7.2 Cocondensation of AB_n and a Comonomer

7.3 Cocondensation of A₂ + B₂ + BB' (or BB₂)

7.4 SCVCP Via Charge-Transfer Complex Inimer

7.5 Free Radical Copolymerization of Multifunctional Vinyl Monomers

7.6 Conclusion

List of Abbreviations

References

Chapter 8: Convergent Synthesis of Hyperbranched Polymers and Related Approaches

8.1 Introduction

8.2 Convergent Control in Hyperbranched Synthesis

8.3 Results

8.4 Conclusions

References

Chapter 9: Hyperbranched and Dendritic Polyolefins Prepared by Transition Metal Catalyzed Polymerization

9.1 Introduction

9.2 Results and Discussion

9.3 Summary and Perspective

List of Abbreviations

References

Chapter 10: Hyperbranched π -Conjugated Polymers

10.1 Introduction

10.2 Scope

10.3 Hyperbranched Poly(Arylene)s

10.4 Hyperbranched Poly(Arylenevinylene)s

10.5 Hyperbranched Poly(Aryleneethynylene)s

10.6 Conclusion

List of Abbreviations and Symbols

References

Chapter 11: Degree of Branching (DB)

11.1 Definition of the Degree of Branching (DB)

11.2 Determination of DB

11.3 The Value Range of DB

11.4 Appendix

List of Abbreviations

References

Chapter 12: Influence of Branching Architecture on Polymer Properties

12.1 Introduction

12.2 Influence of Branching Architecture on Polymer Properties

12.3 Conclusions

References

Chapter 13: Kinetic Theory of Hyperbranched Polymerization

13.1 Introduction

13.2 AB-Type Polycondensation

13.3 Copolycondensation of AB₂- and AB-Type Monomers

13.4 Self-Condensing Vinyl Polymerization

References

Chapter 14: Grafting and Surface Properties of Hyperbranched Polymers

14.1 Introduction

14.2 Surface Grafting

14.3 Surface Properties of Hyperbranched Polymers

14.4 Conclusions

List of Abbreviations

References

Chapter 15: Biological and Medical Applications of Hyperbranched Polymers

15.1 Introduction

15.2 Gene Delivery

15.3 Drug Delivery

15.4 Biomaterials

15.5 Biointeraction

15.6 Conclusions

References

Chapter 16: Applications of Hyperbranched Polymers in Coatings, as Additives, and in Nanotechnology

16.1 Introduction

16.2 Hyperbranched Polymers in Coating and Resin Applications

16.3 Hyperbranched Polymers as Additives

[*16.4 Applications of Hyperbranched Polymers in Nanotechnology*](#)

[*16.5 Applications in Thin Films and Sensorics*](#)

[*References*](#)

[*Chapter 17: Conclusions and Perspective: Toward Hyperbranched/ Dendritic States*](#)

[*17.1 Achievements and Problems*](#)

[*17.2 Role of Hyperbranched Polymers in the Twenty-First Century*](#)

[*17.3 Hyperbranched/Dendritic State*](#)

[*References*](#)

[*Index*](#)
