Preface

v

1. The principles governing the evolution of autotrophic plants	1
Significance of autotrophic nutrition	1
The structure of the photoautotrophic cell	3
The evolutionary consequences of photosynthesis	4
The mobility of plants	8
Life cycles	8
The life cycles of the transmigrant forms	10
Sexual reproduction in later terrestrial vegetation	11
The classification of autotrophic plants	12
2. The Algae, I	14
The prokaryotic algae	16
Cyanophyta	16
Chroococcales 19. Hormogonales 20.	
Prochlorophyta	22
The eukaryotic algae	23
Chlorophyta	24
Volvocales 24. Chlorococcales 30. Ulotrichales 33.	
Cladophorales 38. Chaetophorales 39. Oedogoniales	
45. Mesotaeniales 48. Desmidiiales 49.	
Zygnematales 50. Siphonales 53. Charales 58.	
3. The Algae, II	63
Chrysophyta	63
Xanthophyta	66
Haptophyta	70
Dinophyta (Pyrrophyta)	71
Bacillariophyta	74
Cryptophyta	78
Euglenophyta	79
Phaeophyta	82
Ectocarpales 83. Cutleriales 85. Laminariales 86.	
Fuciales 88. Dictyotales 91.	

Rhodophyta	93
Bangioideae 94. Florideae 95.	
The evolutionary trends within the algae	99
4. The Bryophyta (Mosses and Liverworts)	104
Bryophyta	104
Hepaticeae	106
Marchantiales 106. Jungermanniales and Metzgeriales	
114. Sphaerocarpaceae 119. Calobryales 119.	
Anthocerotae	119
Musci	122
Sphagnales 123. Andreaeales 126. Bryales 126.	
The relationships of the Bryophyta	134
5. The Tracheophyta, I (Psilopsida, Lycopsidea, Sphenopsida)	138
Tracheophyta	138
Psilopsida	139
Psilotales 140. Psilophytales 146.	
Lycopsidea	149
Lycopodiales 149. Selaginellales 155. Isoetales 162.	
Sphenopsida	170
Equisetales 171.	
6. The Tracheophyta, II (Pteropsida: Filicinae)	183
Pteropsida	183
Filicinae	184
Cladoxylales 184. Coenopteridales 185.	
Ophioglossales 189. Marattiales 193. Filicales 199.	
The origin of the Filicinae and the morphological nature of the megaphyll	222
7. The Tracheophyta, III (Pteropsida: Gymnospermae)	224
Gymnospermae	224
Pteridospermales (Cycadofilicales) 224. Cycadales 231.	
Bennettitales (Cycadeoidales) 239. Caytoniales 242.	
Cordaitales 242. Coniferales 245. Ginkgoales 261.	
Gnetales 264.	
The morphological significance of gymnospermy	273
8. The Tracheophyta, IV (Pteropsida: Angiospermae)	275
Angiospermae	275
Evolution within the angiosperms	318
The origin of the angiosperms	326
The main trends of angiosperm evolution	330
Glossary	331
References	344
Index	346
