

CONTENTS

<i>Contributors</i>	<i>ix</i>
<i>Preface</i>	<i>xj</i>
1. Thermodynamic Performance of Fuel Cells and Comparison with Heat Engines	1
Xianguo Li	
1.1. Introduction	2
1.2. Reversible Cell Potential	4
1.3. The Effect of Operating Conditions on Reversible Cell Potential	12
1.4. Energy Conversion Efficiency	21
1.5. Practical Fuel Cell Efficiency and Energy Loss Mechanisms	30
1.6. Concluding Remarks	44
1.7. Nomenclature	44
References	46
2. Macroscopic Modeling of Polymer-Electrolyte Membranes	47
Adam Z. Weber and John Newman	
2.1. Introduction	48
2.2. Background	49
2.3. Governing Equations and Treatments	57
2.4. Membrane-Property Models	77
2.5. Special Topics	93
2.6. Summary	106
2.7. Notation	107
Acknowledgments	111
References	111
3. On the Prospects for Phosphonated Polymers as Proton-Exchange Fuel Cell Membranes	119
Benoît Lafitte and Patric Jannasch	
3.1. Introduction	120
3.2. General Characteristics of Phosphonic Acids	122

3.3. Synthetic Approaches to Polymers Containing Phosphonic Acid Groups	129
3.4. Properties of Membranes Based on Phosphonated Polymers	156
3.5. Phosphonated Polymers for Proton Conduction Under Low-Humidity Conditions	171
3.6. Summary and Outlook	177
Acknowledgments	179
References	179
4. Polymer Electrolyte Membranes for Direct Methanol Fuel Cells	187
Yu Seung Kim <i>and</i> Bryan S. Pivovar	
4.1. Introduction	187
4.2. Background	189
4.3. Characterization of PEMs	191
4.4. Polymer Electrolytes for DMFC	204
4.5. Evaluation Criteria for DMFC Electrolytes	211
4.6. Future Research Direction	225
References	226
5. Materials for State-of-the-Art PEM Fuel Cells, and Their Suitability for Operation Above 100°C	235
Frank A. de Bruijn, Robert C. Makkus, Ronald K. A. M. Mallant <i>and</i> Gaby J. M. Janssen	
5.1. General Introduction	236
5.2. The Impact of Materials Properties On Fuel Cell System Design	238
5.3. Membranes	248
5.4. Electrodes	275
5.5. Bipolar Plates	311
5.6. General Conclusions	325
References	326
6. Analytical Models of a Direct Methanol Fuel Cell	337
A. A. Kulikovskiy	
6.1. Introduction	339
6.2. 1D Model of a DMFC	344

6.3. 1D + 1D Model: The Nature of Mixed Potential	353
6.4. DMFC with Gaseous Bubbles in the Anode Channel	377
6.5. DMFC with Bubbles: Asymptotic Solutions	385
6.6. Kinetics of Methanol Oxidation and Cell Performance	399
6.7. List of Symbols	412
Appendix A: Equation for Local Current Density	414
Appendix B	415
Acknowledgments	415
References	416
7. Methanol Reforming Processes	419
Arunabha Kundu, Yong Gun Shul and Dong Hyun Kim	
7.1. Introduction	420
7.2. Steam Reforming of Methanol	436
7.3. Fuel Cell Operation with Methanol Reforming Process	465
7.4. Concluding Remarks	468
Acknowledgment	469
References	469
<i>Index</i>	473
