

CONTENTS

Abstract	7
Zusammenfassung	9
Acknowledgements	13
1. Introduction	15
Reader's guide	15
The project and its history	15
Mt. Elgon	15
Rodents	17
Objectives of this study	17
Biogeography of montane rodents	17
Ecology of Afroalpine species	18
2. Basic data collection and analysis	20
Localities and climate	20
Elevation gradient	21
Description of trap-lines	21
Methods	22
Results	24
Mark-recapture study	24
Description of grids	24
Methods	25
Results	36
Diet analysis	43
Methods	43
Results	48
Radio-tracking study	50
Fire	50
Description of fire-plots	52
Methods	53
Rodent impact on vegetation	53
3. Ecology of <i>Otomys barbouri</i> and <i>O. typus</i>	55
General description of the genus <i>Otomys</i>	55
Taxonomy	55
Zoogeography	57
Ecology and behavior	58
<i>Otomys barbouri</i> Lawrence & Loveridge, 1953	59
Population structure	59
Reproduction and growth	61
Spatial patterns and movements	68
Diet and digestive system	71
<i>Otomys typus</i> Heuglin, 1877	73
Population structure	73
Reproduction and growth	76
Spatial patterns and movements	82
Diet and digestive system	85
	3

Habitat use and niche of <i>Otomys barbouri</i> and <i>O. typus</i>	87
Population densities	87
Habitat partitioning	89
Impact on the vegetation	101
Concluding remarks	102
Life histories	102
Interspecific strategies	104
Remaining questions	104
4. Ecology of <i>Lophuromys flavopunctatus</i> and <i>Rhabdomys pumilio</i> with notes on miscellaneous species	105
<i>Lophuromys flavopunctatus</i> Thomas, 1888	105
Population structure	105
Reproduction and growth	107
Spatial patterns and movements	112
Diet and digestive system	115
Conclusions	117
<i>Rhabdomys pumilio</i> (Sparrman, 1784)	118
Population structure	118
Reproduction and growth	120
Spatial patterns and movements	123
Diet and digestive system	124
Conclusions	125
Other rodents	126
<i>Colomys goslingi</i> Thomas & Wroughton, 1907	126
<i>Dasymys incomtus</i> (Sundevall, 1847)	127
<i>Dendromus mesomelas</i> (Brants, 1827)	128
<i>Grammomys dolichurus</i> (Smuts, 1832)	129
<i>Graphiurus murinus</i> (Desmarest, 1822)	129
<i>Hylomyscus denniae</i> (Thomas, 1906)	130
<i>Praomys jacksoni</i> (deWinton, 1897)	130
<i>Tachyoryctes ruddi</i> Thomas, 1909	131
5. Montane rodent communities on Mt. Elgon	132
Biogeographic affinities of montane rodents	132
History of montane habitats in East Africa	132
Colonization patterns of montane habitats in general	133
Origin of Mt. Elgon rodents	134
Comparison of montane and lowland communities	135
Geographical distribution of montane rodents	135
Distribution patterns of single species	136
Vertical distribution patterns	138
Species and habitat utilization	139
Characteristics of the different habitats	139
Comparison of species composition	143
Habitat use	144
Rodent densities	147
Diversity along the altitudinal gradient	147
Concluding discussion	149
Comparison with elevational zonations on other mountains	150
General conclusions for African mountains?	151

6. The impact of fire	153
Introduction	153
Direct impact of fire	154
Results from the experimentally burned plots (FBG and FGG)	154
Results from the burned trap-line (TLS)	158
Observations in burned vegetation in 1999	159
Concluding remarks	161
Fire and changes in community composition	163
Introduction	163
Long-term impact of fire	164
Patterns of the present rodent communities	164
Fire and rodent distribution on Mt. Elgon	165
Fire history of Mt. Elgon	165
Hypothetical vegetation without fire	166
Hypothetical habitats with increased fire frequency	166
Fire management?	167
7. References	168
Appendix	176
Plates	178
Index	183
