

A DISCUSSION ON WATER STRUCTURE AND TRANSPORT IN BIOLOGY

ORGANIZED BY R. E. RICHARDS, F.R.S. AND F. FRANKS

(Discussion held 13 and 14 November 1975 – typescripts received 8 May 1976)

[5 plates]

CONTENTS

	PAGE
J. L. FINNEY	
The organization and function of water in protein crystals	3
Discussion: D. D. ELEY, F.R.S.	31
F. FRANKS	
Solvation and conformational effects in aqueous solutions of biopolymer analogues	33
Discussion: M. C. R. SYMONS, F. FRANKS	57
K. J. PACKER	
The dynamics of water in heterogeneous systems	59
Discussion: D. A. T. DICK, D. R. WILKIE	87
F. FRANKS	
Solvation interactions of proteins in solution	89
Discussion: M. C. R. SYMONS, R. J. P. WILLIAMS, F.R.S.	95
F. H. STILLINGER	
Theoretical approaches to the intermolecular nature of water	97
Discussion: J. B. HASTED, A. WARSHEL	110
P. MEARES	
The mechanism of water transport in membranes	113
Discussion: F. H. STILLINGER, F. FRANKS, D. A. T. DICK	148
G. W. GOULD AND J. C. MEARES	
Water relations in single cells	151
Discussion: D. R. WILKIE, P. MEARES	165
A. P. MACKENZIE	
Non-equilibrium freezing behaviour of aqueous systems	167
Discussion: W. DERBYSHIRE, D. S. REID	189
J. FARRANT	
Water transport and cell survival in cryobiological procedures	191
Discussion: P. MOLYNEUX, J. B. HASTED, P. MEARES, P. ECHLIN	203
