

Contents

Preface.....	xv
About the Author	xxi

SECTION I Introduction and Basic Principles

Chapter 1	Introduction	3
1.1	Management Requirements	3
1.2	Productivity Factors.....	3
1.3	Climatic Factors	3
1.4	Moving Up the Yield Scale	4
1.5	Product Quality	4
Chapter 2	Soil Fertility Principles	5
2.1	Fertile Soil Defined	5
2.2	Making and Keeping a Soil Fertile	6
2.3	Biological Factors	6
2.4	An Ideal Soil.....	7
2.5	Soil Fertility Management Concepts.....	7
2.6	Multiple Factor Yield Influence.....	8
2.7	Soil Condition Related to Deficiency in a Major Element and Micronutrient	9
2.7.1	Major Elements	9
2.7.2	Micronutrients	10
2.8	Elemental Content of the Soil and Soil Solution.....	11
Chapter 3	Plant Nutrition Principles.....	15
3.1	Photosynthesis	15
3.2	The Function of Plants.....	17
3.3	Determination of Essentiality.....	17
3.4	Essential Element Content in Plants.....	19
3.5	Classification of the Thirteen Essential Mineral Elements	21
3.6	Role of the Essential Plant Nutrient Elements.....	21
3.7	Plant Nutrient Element Sources.....	22
3.8	Element Absorption and Translocation	25
3.9	Elemental Accumulation	27
3.10	Element Absorption and Plant Genetics	27
3.11	Plant Nitrogen Fixation	27

3.12 Diagnostic Plant Symptoms of Essential Plant Nutrient
Element Insufficiencies..... 28

Chapter 4 The Plant Root..... 33

4.1 Introduction 33

4.2 Root Function 34

4.3 Root Hairs..... 34

4.4 Lateral Roots 34

4.5 The Rhizosphere..... 35

4.6 Root Ion Absorption 35

4.7 Root Crops 36

Chapter 5 How to Be a Diagnostician..... 37

5.1 The Diagnostic Approach..... 37

5.2 Being a Diagnostician..... 37

5.3 Diagnostic Factors 38

5.4 Evaluating Diagnostic Procedures 39

5.5 Scouting..... 40

5.6 Weather Conditions 40

5.7 Factors Affecting Essential Nutrient Element
Concentrations in Plants 40

5.8 Plant (Crop) Wilting 40

5.9 Summary 41

5.10 Certified Crop Advisor Programs..... 41

**SECTION II *Physical and Physiochemical
Characteristics of Soil***

Chapter 6 Soil Taxonomy, Horizontal Characteristics, and Clay Minerals..... 45

6.1 Soil Orders (U.S. System of Soil Taxonomy) 45

6.2 Designations for Soil Horizons and Layers 46

Chapter 7 Physical Properties of Soils 49

7.1 Textural Classification 49

7.2 Soil Separates or Primary Soil Separates..... 49

7.3 Soil Separate Properties 51

7.4 Soil Texture Characterization Definitions..... 51

7.5 Soil Structure..... 51

7.6 Tillage Practices 52

7.7 Water-Holding Capacity 52

Chapter 8	Physiochemical Properties of Soil.....	53
8.1	Soil Separate Properties	53
8.2	Major Phyllosilicate Minerals in Soils	53
8.3	Cation Exchange Capacity (CEC) of a Soil Based on Texture	54
8.4	Cation Exchange Capacity (CEC) Determination of a Soil.....	55
8.5	Anion Exchange Capacity	55
Chapter 9	Soil pH: Its Determination and Interpretation	57
9.1	Definitions	57
9.2	Causes of Soil Acidity	57
9.3	Water pH Determination of Mineral Soil, Organic Soil, and Organic Soilless Rooting Media.....	58
9.4	pH Determination Using a Calibrated pH Meter	59
9.5	Another Soil pH Determination Procedure.....	59
9.6	Salt pH Determination for a Mineral Soil	60
9.7	pH Interpretation: Mineral Soil	60
9.8	pH Interpretation: Organic Soils	60
9.9	pH Interpretation: Organic Soilless Medium	60
9.10	Soil pH Constancy	61
9.11	Plant Root Function	63
9.12	Soil Acidity and NPK Fertilizer Efficiency.....	63
9.13	Soil pH Effect on Elemental Availability and/or Soil Solution Composition	63
9.14	Soil Buffer pH	64
9.15	pH Determination of Water	64
Chapter 10	Soil Organic Matter.....	65
10.1	Definitions of Soil Organic Matter and Its Components.....	65
10.1.1	Definitions	65
10.2	Humus.....	66
10.3	Soil Organic Matter Characteristics	67
10.3.1	Physical Characteristics	67
10.3.2	Physicochemical Characteristics	67
10.3.3	Biological Characteristics	67
10.3.4	Sources of Soil Organic Matter	67
10.3.5	Content	67
10.4	Methods of Soil Organic Matter Determination	67
10.5	Management Requirements for High Organic Matter Content Soils.....	68
10.6	Adverse Effects of Organic Matter Additions	68

SECTION III Plant Elemental Requirements and Associated Elements

Chapter 11	Major Essential Plant Elements.....	71
11.1	Terminology	71
11.2	Methods of Expression	71
11.3	Established Date for Essentiality/Researchers	72
11.4	Carbon, Hydrogen, and Oxygen	72
11.5	Major Essential Element Properties	72
11.5.1	Nitrogen (N)	72
11.5.2	Phosphorus (P)	74
11.5.3	Potassium (K)	76
11.5.4	Calcium (Ca).....	78
11.5.5	Magnesium (Mg)	79
11.5.6	Sulfur (S)	81
Chapter 12	Micronutrients Considered Essential to Plants	83
12.1	Terminology	83
12.2	Established Date for Essentiality/Researchers	83
12.3	Content and Function	84
12.4	Soil and Plant Species Associations	84
12.5	Micronutrient Characteristics	85
12.6	Micronutrient Properties	85
12.6.1	Boron (B).....	85
12.6.2	Chlorine (Cl).....	88
12.6.3	Copper (Cu).....	89
12.6.4	Iron (Fe).....	91
12.6.5	Manganese (Mn)	93
12.6.6	Molybdenum (Mo).....	94
12.6.7	Zinc (Zn).....	96
12.7	Possible Additional Essential Micronutrients.....	97
12.7.1	Nickel (Ni).....	97
12.7.2	Silicon (Si)	98
Chapter 13	Elements Considered Beneficial to Plants.....	99
13.1	The A to Z Nutrient Solution.....	99
13.2	Elements Essential for Animals	99
13.3	Basis for Essentiality for Beneficial Elements.....	100
13.4	Potential Essential Elements.....	102
13.4.1	Cobalt (Co)	102
13.4.2	Silicon (Si)	103
13.4.3	Nickel (Ni)	103
13.5	New Beneficial Elements.....	104

13.6	Element Substitution.....	104
13.7	Form of Response.....	104
13.8	Summary	106
Chapter 14	Elements Considered Toxic to Plants	109
14.1	Introduction	109
14.2	The Nature of Elemental Toxicity	110
14.3	Aluminum and Copper Toxicity.....	110
14.4	Other Elements	111
14.5	Plant Species Factor.....	111
14.6	The Heavy Metals	112
Chapter 15	Trace Elements Found in Plants.....	113
15.1	Definition.....	113
15.2	Elements Categorized as Trace Elements.....	113
15.3	High Soil Content Elements	115
15.4	Availability Factors	115
15.5	Accumulator Plants and Elements.....	116
15.6	Symbiotic Element.....	116

SECTION IV Methods of Soil Fertility and Plant Nutrition Assessment

Chapter 16	Soil Testing.....	119
16.1	Purposes	119
16.2	Field Sampling.....	119
16.2.1	Best Time to Soil Sample.....	120
16.2.2	Subsoil Sampling.....	121
16.2.3	Soil Preparation for Laboratory Submission.....	121
16.3	Soil Laboratory Selection	121
16.4	Laboratory Soil Testing Procedures	122
16.5	Interpretation of a Soil Test Result	122
16.5.1	Word Designation.....	123
16.5.2	Critical Values	124
16.5.3	Ratio Concept of Soil Interpretation	125
16.6	Soil Test Result Tracking (Monitoring).....	125
16.7	Liming and Fertilizer Use Strategies	125
Chapter 17	Plant Analysis and Tissue Testing.....	127
17.1	Plant Analysis Objectives	127
17.2	Sequence of Procedures	127

17.3	Sampling Techniques.....	128
17.3.1	When to Sample	129
17.3.2	Number of Samples and Plants to Sample	129
17.3.3	Lack of Homogeneity	129
17.3.4	Petioles	130
17.3.5	Comparative Plant Tissue Samples	130
17.3.6	What Not to Sample	130
17.3.7	Collecting a Soil Sample	131
17.4	Plant Tissue Handling, Preparation, and Analysis	131
17.4.1	Dry Weight Preservation	131
17.4.2	Sources of Contamination	132
17.4.3	Decontamination	132
17.4.5	Elemental Analysis Procedures.....	133
17.4.6	Elemental Content	133
17.4.7	Expression of Analytical Results	133
17.5	Methods of Interpretation.....	134
17.5.1	Critical Values	135
17.5.2	Standard Values.....	136
17.5.3	Sufficiency Range.....	136
17.5.4	Expected Elemental Content Range in Plant Tissue... 138	
17.5.5	Excessive or Toxic Concentrations.....	138
17.5.6	Diagnosis and Recommendation Integrated System (DRIS)	138
17.6	Word Classification of Elemental Concentrations.....	139
17.7	Plant Analysis as a Diagnostic Technique.....	140
17.8	Experience Required	141
17.9	Data Logging/Tracking of Plant Analyses	141
17.10	Utilization of Plant Analyses for Nutrient Element Management	141
17.11	Tissue Testing.....	142
17.12	Indirect Evaluation Procedures	143

SECTION V *Amendments for Soil Fertility Maintenance*

Chapter 18	Lime and Liming Materials	147
18.1	Liming Terms	147
18.2	Liming Materials.....	148
18.3	Liming Materials and Their Calcium Carbonate Equivalents (CCEs).....	149
18.4	Mesh Size	151
18.5	Quality Factor Designation	152
18.6	Lime Requirement (LR)	152

18.7	Soil Test Ratio of Ca to Mg Determines Form of Limestone to Apply	153
18.8	Liming Rate Determined by Acidifying Effect of Fertilizer	153
18.9	Lime Shock.....	154
18.10	Lime Incorporation.....	154
18.11	Depth of Incorporation	154
18.12	Subsoil pH	155
Chapter 19	Inorganic Chemical Fertilizers and Their Properties	157
19.1	Definitions	157
19.2	Fertilizer Terminology	157
19.3	Characteristics of the Major Elements as Fertilizer	160
19.4	Conversion Factors for the Major Essential Fertilizer Elements	160
19.5	Characteristics of the Micronutrients as Fertilizer.....	164
19.6	The Physical and Chemical Properties of Fertilizers.....	165
	19.6.1 Inorganic	165
	19.6.2 Fertilizer Factors	165
	19.6.3 Soil Factors.....	166
19.7	Naturally Occurring Inorganic Fertilizers	167
	19.7.1 Rock Phosphate	167
	19.7.2 Potassium Chloride (KCl) and Potassium Sulfate (K_2SO_4).....	167
	19.7.3 Limestone	167
Chapter 20	Organic Fertilizers and Their Properties	169
20.1	Value.....	169
20.2	Composted Animal Manures	169
20.3	Animal Manure Major Element Composition.....	169
20.4	Other Organic Materials.....	170
20.5	Soil and Plant Factors	171
Chapter 21	Fertilizer Placement	173
21.1	Objectives	173
21.2	Methods of Fertilizer Placement	174
	21.2.1 Banding	174
	21.2.2 Surface Strip or Dribble Banding.....	174
	21.2.3 Deep Banding.....	174
	21.2.4 High Pressure Injection	175
	21.2.5 Point Injection of Fluids	175
	21.2.6 Point Placement of Solids.....	175
	21.2.7 Starter.....	175

21.2.8	Sidedressing.....	175
21.2.9	Fertigation	175
21.2.10	Foliar Fertilization	176
Chapter 22	Soil Water, Irrigation, and Water Quality	179
22.1	Soil Water Terminology	179
22.2	Soil Factors Affecting Soil Water-Holding Capacity and Movement	180
22.3	Drainage	181
22.4	Irrigation Methods.....	182
22.5	Irrigation Water Quality	183
22.6	Water Treatment Procedures	184
22.7	What Is Water?	185

SECTION VI Methods of Soilless Plant Production

Chapter 23	Hydroponics	189
23.1	Hydroponics Defined.....	189
23.2	Historical Events.....	189
23.3	Hydroponic Techniques.....	190
23.4	Hydroponic Growing Systems.....	190
23.4.1	Systems Without the Use of a Rooting Medium.....	191
23.4.2	Systems With the Use of a Rooting Medium	193
23.5	Rooting Media.....	196
23.6	Water Quality	196
23.7	The Nutrient Solution	198
23.7.1	Elemental Content	198
23.7.2	Elemental Forms	198
23.7.3	Concentration Ranges and Ratios	200
23.7.4	Nitrate and Ammonium	200
23.7.5	Beneficial Elements.....	201
23.7.6	Chelates	201
23.7.7	Nutrient Solution/Water Temperature	202
23.7.8	pH and Electrical Conductivity (EC).....	203
23.7.9	Other Factors	203
23.7.10	Nutrient Solution Elemental Content Determination and Monitoring	204
23.7.11	Use Factors	204
23.8	Reagents and Nutrient Solution Formulations.....	204
23.9	Concentration Ranges and Ratios.....	206
23.10	pH Interpretation-Hydroponic Nutrient Solution	206
23.11	Reconstitution of the Nutrient Solution.....	207
23.12	Accumulation of Nutrient Elements and Precipitates	207

Chapter 24	Soilless Rooting Growing Media	209
24.1	Soilless Media Ingredients	209
24.2	Soilless Media Formulations	211
24.3	Physical Properties	213
24.4	Physiochemical Properties	213
24.5	Control of pH.....	213
24.6	Use Formulations.....	213
24.7	Bag Culture Systems	213
24.8	Fertility Determination Procedure for an Organic Soilless Mix.....	215

SECTION VII *Miscellaneous*

Chapter 25	Organic Farming/Gardening.....	219
25.1	Chemicalization of Crop Production.....	219
25.2	“Organically Grown” Defined.....	220
25.3	Suitable Inorganic Fertilizers	220
25.4	Suitable Organic Fertilizers.....	221
25.5	Organic Soil Fertility Management.....	222
25.6	Soil Physical Properties.....	222
25.7	Food Safety and Quality Issues.....	222
Chapter 26	Weather and Climatic Conditions	223
26.1	Definitions	223
26.2	Climatic Factors	224
26.2.1	Air Temperature	224
26.2.2	Rainfall.....	224
26.2.3	Wind	225
26.2.4	Solar Radiation Intensity and Duration.....	225
26.2.5	Carbon Dioxide (CO ₂)	226
26.3	Weather as a Diagnostic Factor	226
Chapter 27	Best Management Practices (BMPs)	229
27.1	Origin	229
27.2	Best Management Practice Application Broadened	229
27.3	Best Practice	230
27.4	Important Protocol Considerations	230
27.5	Precision Farming	231

APPENDICES

Appendix A: Glossary	235
Appendix B: Formulation and Use of Soil Extraction Reagents	251
B.1 Historical Background.....	251
B.2 Extraction Reagents.....	252
B.3 Soil Sample Preparation	253
B.4 Extraction Reagent Formulations and Use	253
B.5 Extraction Procedures for the Micronutrients	255
Appendix C: Preparation Procedures and Elemental Content	
Determination for Plant Tissue.....	257
C.1 Plant Tissue Preparation Procedures.....	257
C.1.1 Moisture Removal.....	257
C.1.2 Particle Size Reduction	257
C.1.3 Organic Matter Destruction	258
C.2 Elemental Content Determinations	259
C.3 Tissue Testing Extraction Procedures	259
Appendix D: Weights and Measures.....	261
Metric Conversion Chart	261
Equivalent GFS Package Sizes (not exact conversions).....	261
Units of Length and Area	261
Units of Capacity	262
Units of Liquid Measure.....	262
Temperature Conversions	262
Liquid Measure.....	263
Length of Row per Acre at Various Row Spacings	263
Number of Plants per Acre at Various Spacings.....	263
Length of Row per Acre at Various Row Spacings	264
Number of Plants per Acre at Various Spacings.....	265
Reference Books and Texts	267
References	271
Index.....	275
